

CASE STUDY

Client: Mr Phillips, Milton, Cambridge

Project: Design, construct and install mobile media wall with concealed door

Value: £4000

Programme: 3 Weeks

OBJECTIVES

Design a contemporary media wall featuring a concealed access door for a clean, seamless finish.

THE CHALLENGE

This unique project created a modern media wall that concealed access to a storage room while blending seamlessly with the room's design and colour scheme. The key challenge was incorporating a large wall-mounted television without obstructing access to the storage room located behind the feature wall.

OUR APPROACH

We created a 3D visualisation to help the designer and client fully envisage the media wall before installation. The existing door was removed, and the rotating media wall was installed and finely adjusted for smooth movement and a seamless finish, ensuring precise execution. Full protection of customer's existing furnishings throughout installation.

THE SOLUTION

- Smooth, reliable rotating media wall system
- Seamlessly concealed storage room access
- Integrated LED lighting within the front panelling
- Fully integrated electrical and media connections
- Secret hinges and pivoting wheels

RESULT

The result was a unique 90-degree pivoting media wall that seamlessly concealed the storage room. The project demonstrated high-quality craftsmanship and expertise in complex bespoke solutions.

STEVE MASON

Master carpenter

For over 10 years we have been continually improving our service to our valued clients. Our aim is to provide an excellent customer experience from the initial contact to handover.
