

CASE STUDY

Client: Mrs Waters, Hemingford, Cambridge

Project: Design, construct and install under-stair cabinetry

Value: £5700

Programme: 6 Weeks

OBJECTIVES

Enhance the under-stair space with a contemporary, streamlined design that elevates the aesthetic appeal of the entire area.

THE CHALLENGE

The challenge was to maximise the use of the available space within the constraints of the staircase geometry, creating a practical storage solution without compromising the overall design aesthetic. The result was a functional, refined installation that balanced efficiency with style.

OUR APPROACH

We first cleared and carefully prepared the under-stair area. We then developed a 3D visualisation to help the interior designer and client fully envisage the bespoke wine cabinet, refining every detail before production, ensuring smooth and reliable execution through to installation, and full protection to floors, walls and surrounding areas during installation.

THE SOLUTION

- Premium joinery European oak for maximum character
- High quality finish natural oil finish - Low VOC level
- Remote controlled LED lighting with dimmer control
- Variety of storage and display options

RESULT

The result was a beautifully crafted bespoke wine cabinet that delighted both client and interior designer, showcasing our high-quality workmanship, strong customer service, and trusted collaboration with design professionals.

STEVE MASON

Master carpenter

For over 10 years we have been continually improving our service to our valued clients. Our aim is to provide an excellent customer experience from the initial contact to handover.
