

Dry Ice by Eco newsletter

July, 2026 | Volume 09

Dry Ice by Eco is a multi award-winning Dry Ice blasting business, fully qualified and SQA accredited company offering the highest level of Dry Ice cleaning service with over 15 years of experience.

Introducing the Dry Ice Academy by Eco

We are proud to announce the launch of the Dry Ice Academy by Eco, a unique subscription programme that combines Qualifications Scotland accredited operator training, industry-leading dry ice blasting equipment, ongoing technical support, and a guaranteed dry ice supply into one complete solution.

Designed to help businesses bring dry ice cleaning in-house, the Academy enables organisations to reduce downtime, improve productivity, lower maintenance costs, and develop a fully competent workforce with nationally recognised training.

If you'd like to learn how the Dry Ice Academy can benefit your business, get in touch with our team for more information.

See the Results Before You Commit

Demo Days and On-Site Trial Cleans let you see the results before you invest. We assess your equipment and carry out a live demonstration on your machinery, allowing you to evaluate cleaning performance, reduced downtime, and ROI.

Whether you're considering our dry ice cleaning service or the Dry Ice Academy by Eco, our trial cleans help you make an informed decision.

Get Your Car Ready for Summer with Dry Ice Cleaning

Give your vehicle the care it deserves this summer with professional dry ice cleaning.

Our non-abrasive process safely removes road salt, grease, oil, underseal residue, and years of built-up dirt from the underbody, suspension, engine bay, and other hard-to-reach areas - without damaging sensitive components.
