

Dry Ice by Eco newsletter

September, 2026 | Volume 11

Dry Ice by Eco is a multi award-winning Dry Ice blasting business, fully qualified and SQA accredited company offering the highest level of Dry Ice cleaning service with over 15 years of experience.

One Cleaning Technology – Multiple Industries

Dry ice cleaning is a versatile cleaning solution used across a wide range of industries, helping businesses tackle difficult contamination while reducing downtime, water usage, chemicals, and secondary waste.

Industries we support:

- Food & Beverage
- Automotive
- Printing & Packaging
- Laundry & Textile
- Manufacturing & Engineering
- Plastics & Rubber
- Power Generation & Renewables
- Marine
- Nuclear & Decommissioning
- Oil & Gas
- Aerospace
- Pharmaceutical
- Commercial Kitchens & Ductwork
- Rail & Transport
- Defence

From production machinery and dryer drums to generators, printing equipment, and ductwork, one cleaning technology can provide solutions across multiple applications.

Latest News – Dry Ice Academy by Eco

The Dry Ice Academy by Eco helps businesses bring dry ice cleaning in-house with a dry ice blaster, certified operator training, dry ice supply and ongoing technical support.

Designed to reduce downtime and improve productivity, it provides everything needed to introduce dry ice cleaning into your operations.

Recent Dry Ice Cleaning in Action

The results from this recent dry ice cleaning project demonstrate the difference dry ice cleaning can make on heavily contaminated equipment. By cleaning machinery in situ, downtime can be reduced while achieving an effective clean, with no secondary waste and minimal use of water or chemicals.
