MANAGEMENT**

## MEET THE RECIPIENTS

A new water tap and well have been installed at Janapremi Basic School, to address a major water shortage. The school serves 312 students and staff, but previously had only one well, making access to water difficult throughout the school day.

Students often had to wait in long lines for drinking water, sometimes missing class as a result. During breaks, the area became overcrowded, and in the dry season, there was often not enough water. Younger children especially struggled with the long waits and crowded conditions.

The lack of water also affected hygiene and sanitation. Many students were unable to wash their hands properly, and the toilets were difficult to keep clean.

The new well and water tap have brought a major improvement to the school. Students and staff now have reliable access to clean water throughout the day. Long lines are gone, students can focus better on their studies, and hygiene has greatly improved. Toilets are cleaner, handwashing is more consistent, and the overall school environment is healthier and more comfortable.

Overall, this project has created a safer, cleaner, and more peaceful learning environment for everyone at the school. Thanks to Quenched for making this possible.

**THANKS TO YOUR DONATION, THIS  
WELL WAS DRILLED AND DEDICATED!**

# WELL REPORT

## MEET THE PASTOR

My name is Samuel Chaudhary, and I serve as a pastor and coordinator for this well project at the school. With 312 students, this is the largest school in the area. Most students come from lower- and middle-income families, and before the project, access to clean water and proper sanitation was a major challenge.

Since the installation of the new water tap and facilities, conditions have greatly improved. Students now have easy access to clean water, hygiene has improved, and the overall school environment is healthier and more comfortable. The principal, teachers, and parents have all expressed their gratitude to Quenched for supporting the school and helping their children.

This project has also positively impacted the wider community. Through this support, people are seeing the love and care of Christians in a practical way, bringing joy and hope to many families.

In addition, we conducted a WASH training at the school focused on hygiene and sanitation. The training was very impactful and helped students and staff better understand the importance of cleanliness and healthy habits.

THANK YOU FOR YOUR PARTNERSHIP!
