MEET THE RECIPIENTS

Govinda Thapa serves as the coordinator for the Bhimapur community in Bardiya District, Mid-West Nepal. Most residents belong to the Tharu and Dalit communities and work as laborers or farmers, with many migrating to India for employment. Before the hand pump was installed, there was no nearby public source of drinking water.

Around six to seven households did not have their own wells and were required to walk nearly 100 meters to collect water from a neighbor's private hand pump. Because this single pump was used by many people each day, it often caused inconvenience, delays, and occasional misunderstandings.

The community had previously built a clubhouse through small financial contributions from local residents. While the clubhouse serves as a meeting place for various groups, it did not have a water facility. A school is located close to the clubhouse, and both students and teachers struggled due to the lack of a reliable drinking water source. During hot weather, children frequently became thirsty and had to walk long distances to fetch water, disrupting classes and causing fatigue and frustration.

**THANKS TO YOUR DONATION, THIS
WELL WAS DRILLED AND DEDICATED!**

WELL REPORT

MEET THE RECIPIENTS (CONT.)

The installation of a hand pump near the walking path and clubhouse has brought significant improvement to daily life. Residents no longer need to travel far for water, meetings can be held without concern for water availability, and students now have easy access to drinking water. More than 80 people benefit directly and indirectly from this hand pump each day. With the support of the Quenched team and the cooperation of the villagers, the pump was installed efficiently in a location convenient for nearby households, the clubhouse, and the school. After completion, the community took responsibility for maintaining the pump to ensure its long-term use. This project has led to positive changes within the community. It has shown that Christians are actively engaged in serving and caring for the well-being of others, helping foster a more positive perception of the Christian fellowship. Govinda Thapa expresses deep gratitude to all who supported this effort. The hand pump has truly become a blessing for the entire community. Praise God, and thank you, Quenched

THANK YOU FOR YOUR PARTNERSHIP!
