Responsibility for generations

The Hörmann family business has over 85 years of experience as a construction component specialist. This gives us an obligation to both current and future generations. That's why environmental responsibility plays such an important role for us. With this in mind, we develop innovative solutions for sustainable products and intelligent environmental protection.

"A GOOD REPUTATION MUST BE EARNED."
August Hörmann

In keeping with the tradition started by the company's founder, the name Hörmann delivers brand name quality with extensive product expertise. With over 80 years of experience as a construction component specialist, Hörmann is your trusted partner from the very beginning of building and renovation projects. Supported by two state-of-the-art UK manufacturing facilities—Garador and IG Doors, ensures the highest standards of production, reinforcing its position as one of Europe's most successful door providers. Choosing a Hörmann door is a reassuring, quality-driven investment.

WE THINK AND ACT GREEN. As a family business, we are very conscious of our responsibility to future generations. The Hörmann climate protection strategy aims to reduce and avoid CO2 emissions. We cover 100% of our electrical power needs at all European production locations with purchased green electricity. We are also investing in a clean future with other measures such as the use of recycled paper, CO2-neutral postal shipping and the recycling of transport packaging to save more than 75,000 tons of CO2 every year. We work with ClimatePartner to offset the emissions that we do generate by supporting certified climate protection projects. In particular, we offset all CO2 emissions produced in manufacture of products for residential construction as standard.

Quality products from Great Britain

All Hörmann composite doors are proudly developed and manufactured in Britain, ensuring that neither the doors nor their components are imported from Asia. Our highly qualified employees are dedicated to creating innovative products, continuously improving designs, and refining every detail. This commitment to quality results in patented and unique products. Rigorous endurance tests, under real conditions guarantee, that each product meets Hörmann's high standards for quality and durability.

STATE-OF-THE-ART MANUFACTURE IN THE UK. Our doors are manufactured in one of the most advanced door manufacturing facilities in the UK. Our new factory creates doorsets from slab to finished product. This is overseen by a dedicated production team with over 300 years of experience between them.

Best thermal insulation
U-Value: Less than 1 (Clima63 Door)

TOUGH & ROBUST AS STANDARD. All of our manufactured GRP door slabs are not only able to comply with the Secured by Design scheme, but are also expertly finished with a high-quality ABS Edge Banding. This ecologically sound, impact-resistant, and thermally resilient material ensures your doors are not only beautiful, but also built to last. For a high level of thermal insulation, we supply all door designs with a PU-foamed 44mm door leaf.

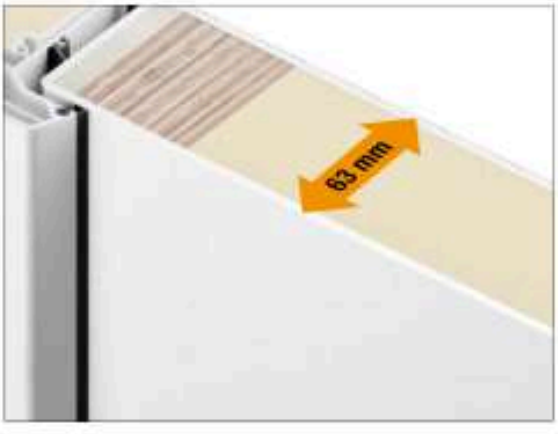

NEW. Our Clima63 Doors with a 63mm thick door leaf offer the best thermal insulation with U-values up to approx. 0,8 W/(m²·K).

➔ For more information, see page 62.

44mm thick door leaf (Classic44)

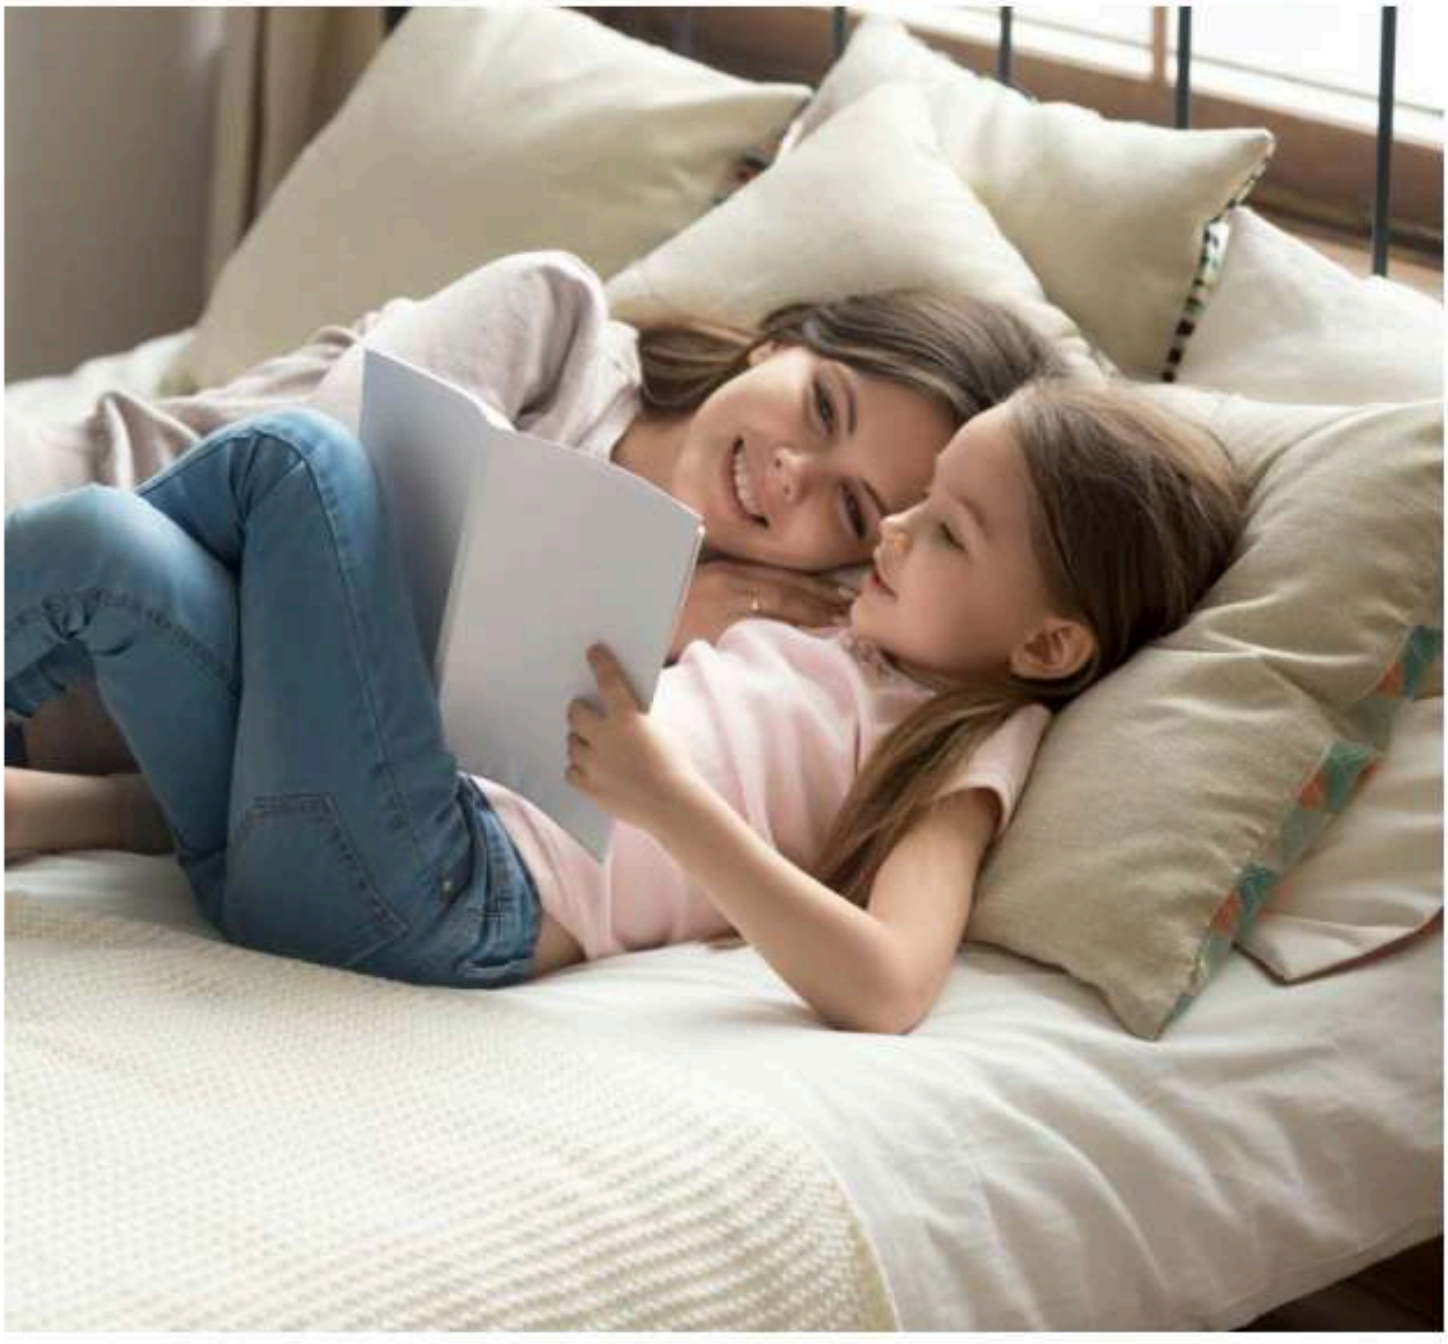

NEW. 63mm thick door leaf (Clima63 Door) with U-values up to approx. 0,8 W/(m²·K)

We protect you from unwanted visitors

A home is broken into every five minutes, making it even more important to equip your entrance door with a high security standard. If a burglar is not successful within approximately 90 seconds, they generally give up their break-in attempt. For this reason, nearly half of all break-in attempts fail if the entrance door is break-in-resistant.

Secured by Design

PATENTED ANTI-BUMP KEYS

★★★

TS007:2014
KM543106

SECURED BY DESIGN. Secured by Design is a crime prevention initiative operated by the Police Services of the United Kingdom. It aims to utilise design principles and products in the build environment that reduce the risk of crime. This is achieved by combining minimum standards of physical security and proven principles of natural surveillance and defensible space. Independent research has shown that these principles can lead to a reduction in crime of up to 75%.

Protect your home with a high security Hörmann composite door
★ ★ ★ £ 4,000 ANTI-BURGLARY GUARANTEE*

Please register your details online.
uaplimited.com/register/

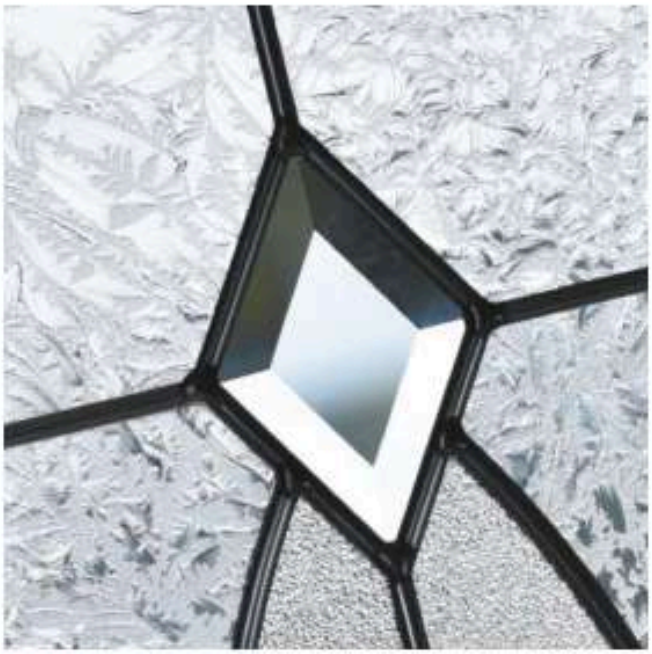

*Please note: The guarantee covers damage and replacement to the lock cylinder only.

10 SPECIALLY SELECTED DOOR STYLES, 10 POPULAR COLOURS, ALL AVAILABLE IN 10 DAYS*. Introducing The Tremendous 10 – a standout collection of composite doors, available in just 10 days. With 10 stylish designs and 10 colour options to choose from, this range offers fast, reliable service with no compromise on quality. Each door comes with standard glazing (where applicable), a multi-point lock, and polished chrome handle and letterplate, all manufactured sustainably in the UK.

Design your Tremendous 10 door using our online Door Designer.

*Standard doors only no SBD, side panels, slam lock, pull bars etc. Midday cut-off point for orders; anything after will go to following days orders. 10 day delivery to Hörmann trade partner. Not to be used in conjunction with any offers/vouchers.

GLAZING. Making these doors even more special is the fact that each decorative glass panel has been hand crafted with bevels to complement the door. Most glazing is also available as Secured by Design.

→ For more information, see page 50.

CREATIVE COLOUR. If you're feeling adventurous, go for strong, bright colours for your front door but choose a shade that complements your own personal style and the rest of your home. If you're not feeling brave, black is always a safe bet, or opt for darker shades of blue, plum and green that will still make a design statement.

→ For more information, see page 66.

THE DETAILS MAKE THE DIFFERENCE. It's always worth investing in good quality door accessories such as letterboxes, eye viewers and knockers, and try to make sure you choose door furniture that is in keeping with the style and age of your property.

→ For more information, see page 70.

There’s no place like home

After a hard day at work there is nothing better than coming home to a relaxing environment and enjoying your home comforts. To be able to enjoy time with your loved ones, you have to feel safe and at ease in your own four walls, it all begins with your entrance door.
For a style to suit your taste and the security to put you at ease, Hörmann entrance doors will provide you with that and more.

Glazing options

Hörmann's new glazing range offers versatility and style, with all 14 glazing options available across every door style in the Traditional, Cottage, Contemporary and Platinum collections. From clear and obscure glass to decorative designs, including the handcrafted Harmony range with coloured bevels, every option adds character and charm. These options ensure flexibility, allowing customers to personalise their doors beautifully.

View all our glazing options on our website.

THERMAL EFFICIENCY BUILT IN. Hörmann's unique glazing cassette system features an innovative foam sealant that enhances thermal performance, sound insulation, and protection against water ingress. Double-glazed units come as standard, while triple glazing is used on Clima63 doors for even greater energy efficiency. With these advanced features, Hörmann glazing ensures your home stays warmer, quieter, and more comfortable—all while maintaining exceptional durability and design.

→ For more information about our Clima63 doors, see from page 62.

SECURED BY DESIGN. Every Hörmann glazed unit is crafted from toughened security glass, adhering to the rigorous standards of the Secured by Design certification. These features guarantee exceptional strength and protection without compromising on visual appeal. Whether choosing clear, obscure, or decorative glazing, every door delivers peace of mind with safety and security built in.

→ More information about our door security can be found on page 72.

Secured by Design

SBD

Police Preferred Specification

Obscure Glazing

Cotswold & Satin

Cotswold

Cotswold glazing features a natural textured design resembling cascading water, offering privacy and elegance while allowing soft, diffused light through.

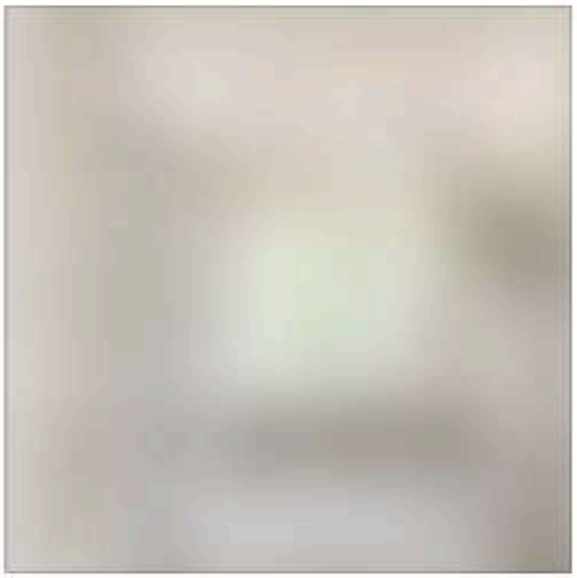

Satin

Satin glazing offers a sleek frosted finish, providing privacy with a modern touch while softly diffusing natural light into your home.

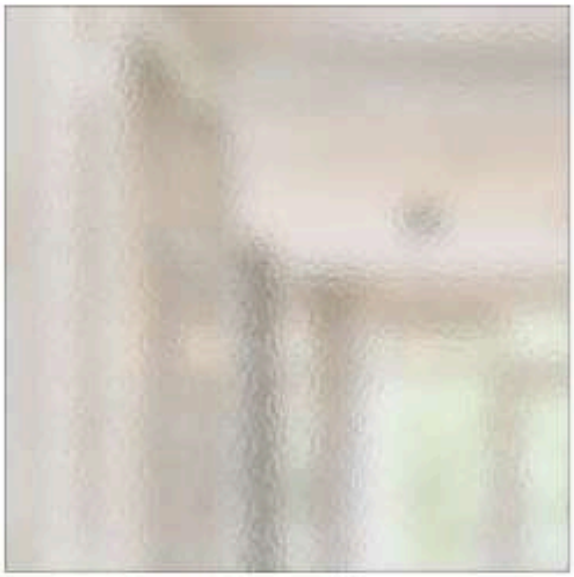

Stippolyte

Stippolyte glazing features a textured, softly dappled surface that provides excellent privacy while allowing natural light to brighten your space.

Clear

Clear glazing offers an unobstructed view and maximum natural light, creating a bright and open feel while maintaining a sleek, modern look.

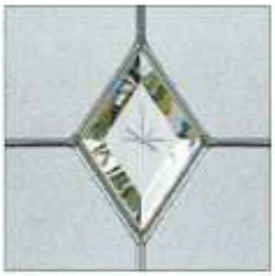

Decorative Glazing

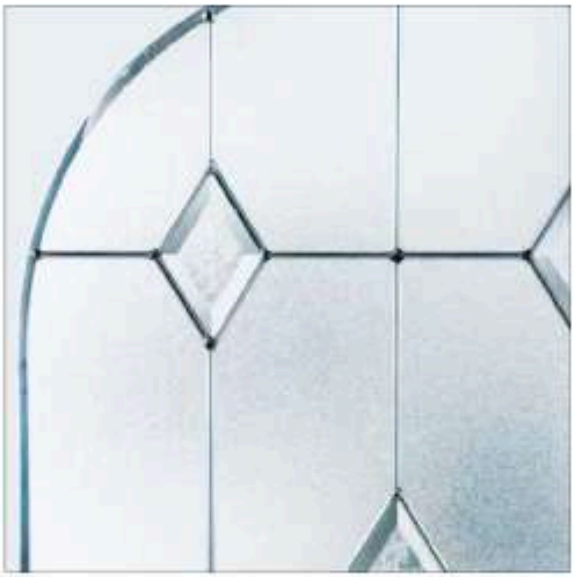

Duo Diamond & Glacier

Duo Diamond

Duo Diamond glazing combines dual decorative diamonds with intricate bevel detailing, set against an obscure background for privacy and elegance.

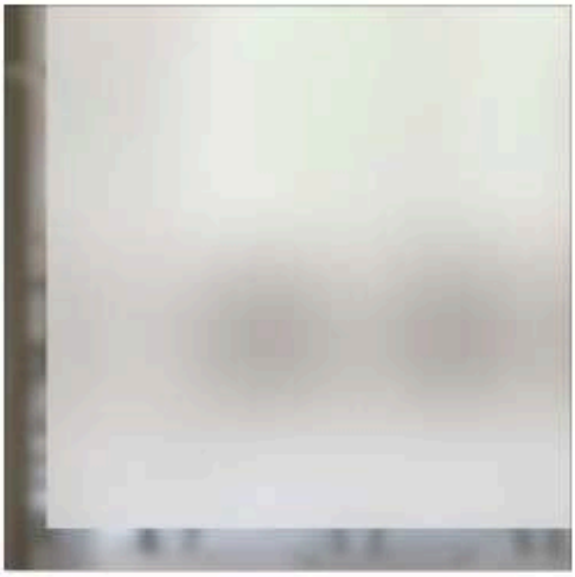

Glacier

Glacier glazing features a satin-frosted centre framed by clear edges, creating a contemporary look that balances privacy and light.

Traditional Etch

Traditional Etch glazing features timeless etched patterns with subtle detailing, combining privacy with classic elegance for a refined finish.

Nordic

Nordic glazing features crisp, etched lines forming a symmetrical grid pattern, creating a contemporary aesthetic with subtle privacy.

Decorative Glazing

Grace & Sycamore

Grace

Grace glazing showcases intricate crystal-like bevels and elegant leading, offering a timeless design that enhances style and privacy.

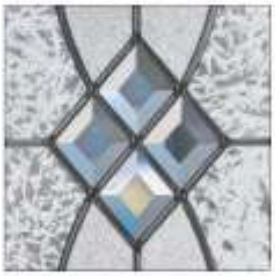

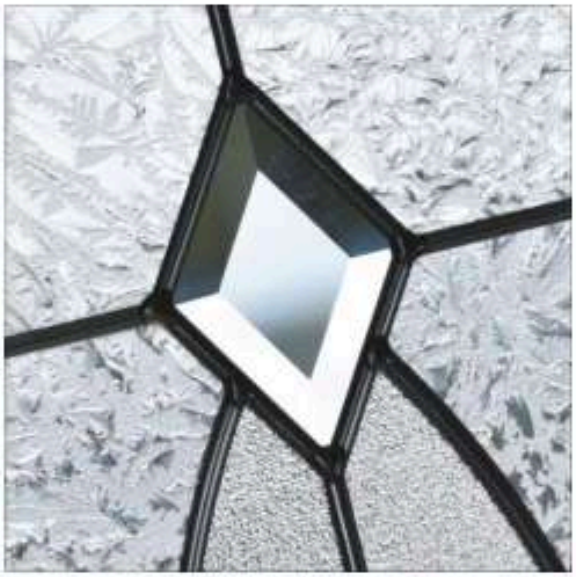

Sycamore

Sycamore features frosted textures and bevelled diamond elements, creating a refined and light-enhancing design with intricate leaded details.

Turin

Turin showcases a bold geometric design, with frosted textures, bevelled glass accents, and intricate leadwork creating modern elegance.

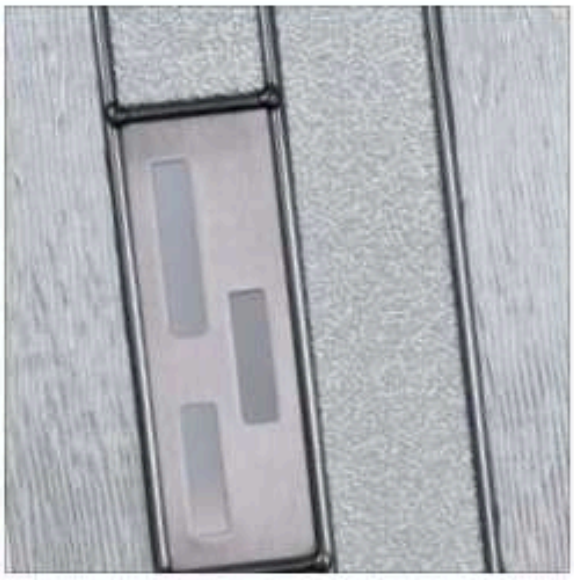

Triline

Triline features sleek horizontal glass panels with brushed stainless steel inserts, combining textured detailing for a striking contemporary aesthetic.

Decorative Glazing

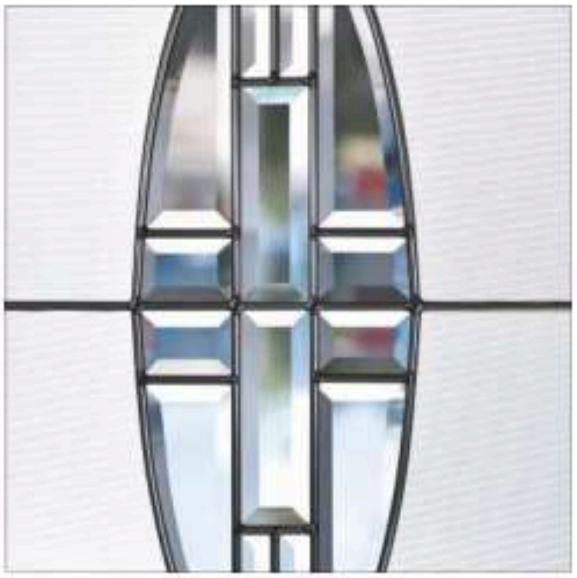

Majestic & Oasis

Majestic

Majestic glazing features intricate black leadwork and striking crystal bevels, combining to create a refined and luminous design.

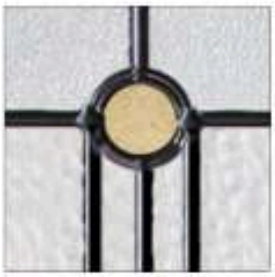

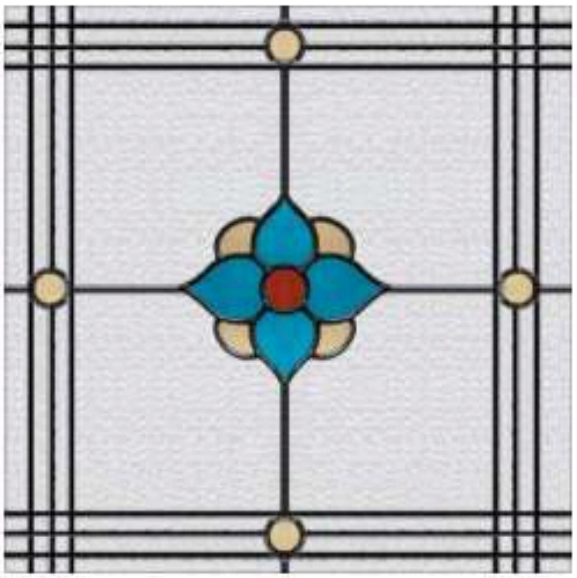

Oasis

The Oasis glazing style features a decorative floral centrepiece in vivid turquoise and red, framed with intricate leadwork detailing.

Harmony Glazing

COLOUR-MATCHED GLAZING. Harmony glazing blends elegant crystal detailing with vibrant coloured bevel inserts that harmonise beautifully with silver grey or chartwell green door finishes. Its frosted, obscure glass areas balance privacy with visual appeal, offering a sophisticated, customisable look.

Designed to complement door colour, this glazing adds a personalised, high-end aesthetic to your entrance while maintaining functionality and style. Harmony glazing is perfect for creating a striking first impression with a cohesive, seamless design.

Clima63 Thermal Doors

FUTURE-PROOF YOUR HOME. The Clima63 door range represents a leap forward in energy-efficient design, created to meet the demands of the Future Homes Standard 2025. With a focus on sustainability and insulation, Clima63 doors feature a reinforced 63mm insulated slab, triple glazing, and a triple seal system to deliver outstanding thermal performance.

Perfectly suited to both traditional and modern styles, these doors combine innovative engineering with exceptional aesthetics. Manufactured sustainably in the UK, Clima63 doors not only enhance your home's energy efficiency but also reflect our commitment to creating sustainable, secure, and stylish housing solutions for the future.

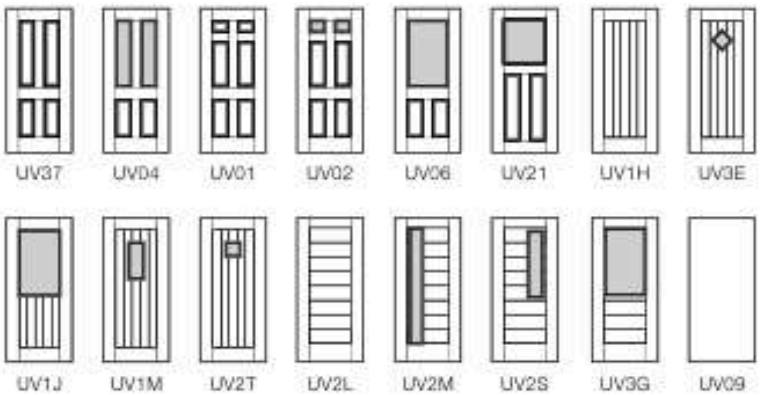

OUR MOST THERMALLY EFFICIENT DOOR EVER. Clima63 doors deliver remarkable thermal insulation, achieving U-values under 1 W/m²K with A-rated energy performance. Innovative steel-free frames, 30% more efficient than traditional designs, ensure sustainability without compromise. Designed for superior energy efficiency, these doors lead the way in modern, future-focused homebuilding.

→ Go to page 4 to find out more about sustainability at Hörmann.

Classic44 Standard Doors

COMPOSITE TECHNOLOGY. The Classic44 composite door range combines traditional craftsmanship with modern technology, offering stunning aesthetics, durability, and low-maintenance performance. Its GRP construction ensures resistance to impacts, scratches, and the harshest weather conditions.

Steel Reinforced Frame

The Classic44 door features a robust steel-reinforced frame for enhanced strength and security, giving homeowners peace of mind with a durable door that stands strong against daily wear and weather.

Double-glazed Cassette

Fitted with double-glazed units in a secure cassette system, the Classic44 ensures durability, energy efficiency, and a flawless, stylish appearance.

44mm Standard Composite Slab

The 44mm GRP slab combines timber-like aesthetics with superior strength, offering exceptional performance and low-maintenance durability.

Edge Banding

High-quality ABS edge banding protects the door edges against daily wear and tear while providing a sleek, refined finish that's built to last.

Clima63 Thermal Doors

WARMING YOUR HOME, NOT THE PLANET. The Clima63 composite door combines exceptional thermal performance with modern style, helping homeowners reduce energy bills while enhancing comfort, security, and sustainability—perfect for creating an eco-friendly and efficient home.

Thermally Insulated Frame
A thermally insulated, steel-free UPVC frame with a unique triple-seal system offers exceptional energy efficiency and environmental benefits.

Triple-glazed Cassette
Innovative triple-glazed units with foam sealant provide enhanced thermal performance, superior sound insulation, and stylish visual appeal.

63mm Insulated Composite Slab
The 63mm insulated door slab ensures incredible thermal performance while maintaining strength and durability in both traditional and contemporary styles.

Thermal Threshold
The precision-engineered thermal threshold reduces heat loss and water ingress, delivering energy savings and long-lasting performance.

Police Preferred Specification

TRIPLE-HINGE BOLTS. To take the security of our composite doors to an even higher level, we also supply our specially designed dog bolt system as standard. This involves two sets of triple-hinge bolts that secure the composite door to the frame, protecting you against intruders. Designed to complement our existing high security multi-point lock.

3 STAR CYLINDER. The Secured by Design-approved UAP Kinetica Kitemarked 3 Star cylinder offers advanced protection against snapping, bumping, drilling, and picking. Now available across the Hörmann door range, it's designed to withstand external attacks while ensuring the door remains secure and fully functional from the inside, providing homeowners with safety and peace of mind.

SPLIT-SPINDLE. We supply a split-spindle option with every door which further enhances security. The composite door then locks on the latch as soon as the door is shut and requires a key to unlock it from the outside. We can also offer other composite door furniture as an alternative if required.

Design your high security door on our online door designer.

1. High security, stainless steel multi-point locking system
2. 2 sets of triple-hinge bolts exclusive to Hörmann doors
3. Toughened safety glass to BS EN 12600
4. 2 Star handle and 3 Star cylinder
