PERGOLAS

Extra space
to spend time outdoors

This is the next step to create a complete range of joinery from LWS&I. With one transport, we can provide our clients with everything they need to complete the investment. This saves money and time.

NEW IN OUR OFFER!

PERGOLA EQUIPMENT

- movable lamellae with LED lighting,
- LED lighting - around the perimeter of the structure,
- rain and temperature sensor,
- wind sensor,
- durable, extruded aluminum,
- automatic control systems.

SPECIFICATION

- height from 2.2 m to 3 m,
- width from 1.2 m to 4 m,
- maximum projection 6.8 m.

Innovative design

makes our pergola suitable for many types of buildings and gardens, being a luxurious decorative element of the space around the house.

Durable construction and proven components

will allow you to enjoy your home terrace for many years. The structure consists of a stable aluminum frame and an opening roof, thanks to which the amount of light on the terrace can be adjusted.

The backyard terrace is a place where social and family life is vibrant in spring and summer. The pergolas we produce offer several square meters of additional space for spending free time outside, regardless of the weather conditions. The rest will not be disturbed by excessive sun, rain or wind.

THE PERGOLA IS:

- extension of the living room to the garden part,
- several m² of additional space,
- spending free time outdoors,
- terrace accessible regardless of weather conditions.
