DESCRIPTION OF SERVICES

Professional and Staff Services:

This service includes the availability, expertise and work done by our licensed funeral directors on behalf of the client. This would include the coordinating and directing of services of our staff and agents with those of the hospital, care facility, cemetery, or crematorium in transferring the remains from the place of death and making the necessary arrangements for final disposition. It also includes the services of our support staff in preparing contracts, correspondence, and invoices, and in placing notices, booking staff and vehicles and other support functions.

Basic:

This includes the staffing, cleaning and maintenance of premises and grounds, staffing of offices and 24-hour telephone answering.

Visitation Hours:

This service includes the preparing for visitation, staffing during visitation hours, receiving, arranging and caring of floral tributes, coordinating memorial contributions and other duties associated with the rites and services during visitation.

Funeral Day:

Documentation:

This service includes obtaining the necessary information to complete the documentation legally required in connection with the disposition of the remains, arranging for filing of the documentation and registration of death, procuring proper burial or cremation documents, and providing copies of our Funeral Director's Statement of Death for proof purposes.

Embalming:

This service includes the professional vascular injection of the remains by a licensed technician to accomplish preservation and disinfection. Embalming is not a requirement of the law. Our funeral home policy is that some arrangements, such as a funeral with viewing, holding the body for a period more than 48 hours between death and final disposition, or being held for spring burial, requires that embalming be performed. You are usually free to select a funeral service which will not require embalming if you so wish.

Other Body Preparation:

These services include general handling of the remains, the dressing or shrouding of the body, placing the body in the casket or container, and sanitation and exterior disinfection of the body where no embalming is authorized.
