Integrity's managed IT and communications services are built on partnership. We take the time to understand your business and future plans before we recommend solutions to suit your requirements.

Business Security, Simplified Event

A couple of weeks ago, we were delighted to host our Business Security, Simplified event at Carlisle Racecourse. The event focused on essential security measures for businesses, with expert speakers sharing insights and practical advice on protecting organisations in today's evolving threat landscape. It was a great opportunity for attendees to enhance their knowledge, ask questions, and connect with fellow industry professionals. We were thrilled with the fantastic turnout and would like to thank everyone who joined us on the day.

HP Planet Partners Recycling Program

At Integrity by Eco, sustainability is at the heart of what we do.

We're proud to partner with the HP Planet Partners Recycling Program, enabling the responsible recycling of HP and Samsung ink and toner cartridges.

If your business uses these products, we can help you reduce waste and support a greener future.

Get in touch today to arrange your collection.

Is Your Firewall Secure?

Your firewall is one of the most critical parts of your cyber security defence.

Without the correct setup, monitoring, and maintenance, your network may be exposed to unnecessary risk.

When was the last time your firewall was professionally reviewed?

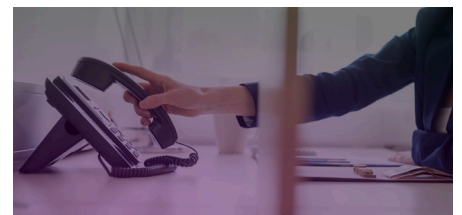

Contact our team today to ensure your business remains secure.

Just 12 months until the analogue switch-off

The UK's copper phone network is being switched off by 31 January 2027.

Within the next 12 months, any systems using analogue phone lines must move to digital. That means a cloud-hosted phone system over full-fibre broadband, with clearer calls and greater flexibility.

At Integrity by Eco, we make the switch simple. We manage your move to Hosted Telephony and full-fibre broadband end to end, keeping your business connected without disruption.

QUICK TIP OF THE MONTH

Be cautious with unexpected Microsoft 365 file sharing emails. Cyber criminals are increasingly using fake SharePoint and OneDrive notifications to trick users into clicking malicious links. Before opening a shared file, always check the sender's email address carefully and confirm you were expecting the document.
