FOREST INFORMATION - APRIL 2026

FOREST PRODUCTS - TRACKING

All Forest Drapery Hardware Systems are distributed,
marketed and installed globally.

There are numerous tracks available from simple hand drawn & corded
tracks to motorised tracking

Various tracks can be bent, reverse bent & curved.

All brackets are interchangeable and are an easy click fit system
Designed to be easy & fast to install

All tracks available in White & Silver as standard
Black available (35% surcharge applies)

PRICING IS RECOMMENDED RETAIL (includes GST)

VANDA WAVE HEADING

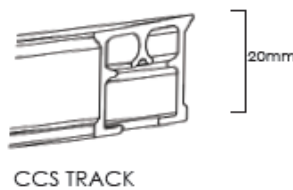

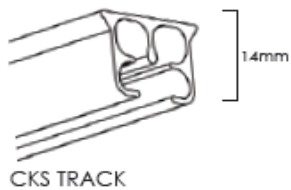

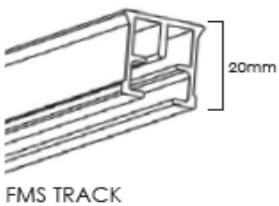

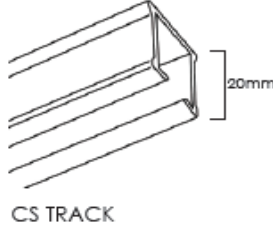

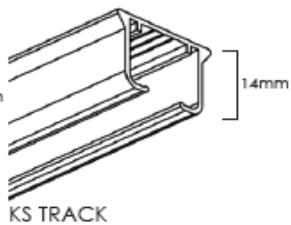

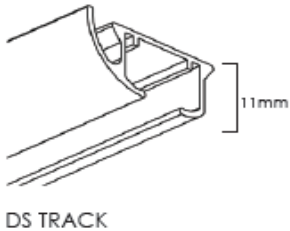

The Vanda Wave Heading is available in all Forest tracks except for the CKS Track

The Tape can be sent directly to the workroom to be sewn onto the fabric

A sewing instruction sheet is sent out (on request) to the workroom with the tape

FOREST TRACKS & BRACKETS - APRIL 2026

FOREST TRACK PROFILES

HAND DRAWN TRACK OPTIONS

The hand drawn track options are DS, KS & CS tracks.

All tracks can be ceiling mounted or face fixed. Tracks come in White or Silver. Tracks come with standard glides for pleated curtains. They can also take the Vanda Wave Heading

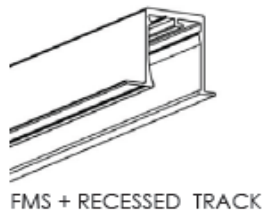

CORD DRAWN TRACK OPTIONS

The cord drawn track options are CKS & CCS tracks.

All tracks can be ceiling mounted or face fixed. Tracks come in White or Silver. Tracks come with standard glides for pleated curtains. The CCS track can also take the Vanda Wave Heading

FOREST TRACK HOOKING POSITIONS

KS TRACK - 25mm
DS TRACK - 20mm to cover track

WE RECOMMEND ADDING ADDITIONAL BRACKETS IF YOU HAVE A LONG TRACK WHICH IS ONE WAY DRAW
THIS WAY YOU CAN PUT ADDITIONAL BRACKETS AT THE STACKING END (IF REQUIRED)**

WAVE HEADING - RECOMMENDED RETAIL PRICE LIST - APRIL 2026

Vanda Wave Information Sheet

The Vanda Wave Tape is a simple but elegant heading comprising of a unique hook and tape system. The tape is stiff, transparent and 77mm wide which allows for a consistent Ripple shape throughout the curtain giving it a very uniform look.

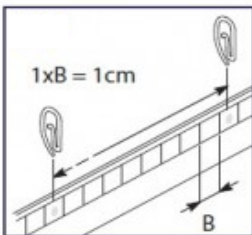

The gliders are spaced 6cm apart, held by nylon cord.

PLEASE NOTE: The amount of hooks provided with the tape **must** be used in order for the tape to marry up with the carriers when attaching to the track.

There is a marking every 10th pocket indicating where the hook should be placed. If placed in this pocket then the curtain will be nearly double the fullness, however should you not have enough fabric then you can adjust the hooking position and the tape can be cut down however the amount of hooks supplied originally must be used.

HEADING – 2mm

The pockets on the tape are exactly 1cm wide, which allows variation in wave size. Every tenth pocket/cm is marked which enables quicker attachment of hooks without counting the pockets, therefore quicker and easier to attach hooks.

By inserting the hook where marked the curtain would be approx double the fullness, however the hooking position can be adjusted according to your requirements (for a smaller fold, hooks are spaced closer together, for a larger fold space the hooks further apart).

WAVE TAPE PRICING
