WAVE HEADING - RECOMMENDED RETAIL PRICE LIST - April 2026

Vanda Wave Information Sheet

The Vanda Wave Tape is a simple but elegant heading comprising of a unique hook and tape system. The tape is stiff, transparent and 77mm wide which allows for a consistent Ripple shape throughout the curtain giving it a very uniform look.

The gliders are spaced 6cm apart, held by nylon cord.

**PLEASE NOTE:** The amount of hooks provided with the tape **must** be used in order for the tape to marry up with the carriers when attaching to the track.

The pockets on the tape are exactly 1cm wide, which allows variation in wave size. Every tenth pocket/cm is marked which enables quicker attachment of hooks without counting the pockets, therefore quicker and easier to attached hooks.

By inserting the hook where marked the curtain would be approx double the fullness, however the hooking position can be adjusted according to your requirements (for a smaller fold, hooks are spaced closer together, for a larger fold space the hooks further apart).

There is a marking every 10<sup>th</sup> pocket indicating where the hook should be placed. If placed in this pocket then the curtain will be nearly double the fullness, however should you not have enough fabric then you can adjust the hooking position and the tape can be cut down however the amount of hooks supplied

**WAVE TAPE PRICING**

TAPE PER METER (includes hooks, 18pm)	\$41.70 pm	per meter
VANDA WAVE CARRIERS PER METER	\$41.70 pm	per meter

**PREMIUM WAVE TAPE BY THE ROLL PRICING**
