Dear Mr. Vince,

RE: Econo Clean

This is in reference to your e-mail of September 10, 2024, seeking our comments on the acceptability of the subject product for use as a cleaner in food processing establishments, on behalf of Econo-Chem.

Based on the information submitted, we can advise that we see no reason to object to the composition and use of the subject product as proposed in food processing establishments, provided that:

- a) there will be no contamination of food, as a result of its use or storage;
- b) it is used in the minimum amount required to achieve the intended technical effect;
- c) prior to application (spraying) of the product in food handling areas all foods should either be removed from the vicinity or otherwise protected from the spray; and
- d) Equipment and surfaces subject to direct contact with food are hard and non-porous in nature and are thoroughly **rinsed with potable water after the treatment** with the product to remove any chemical residues resulting from its use.

We trust that the foregoing will be of use to you.

Yours truly,

X Khadejeh Ziabasharhagh
