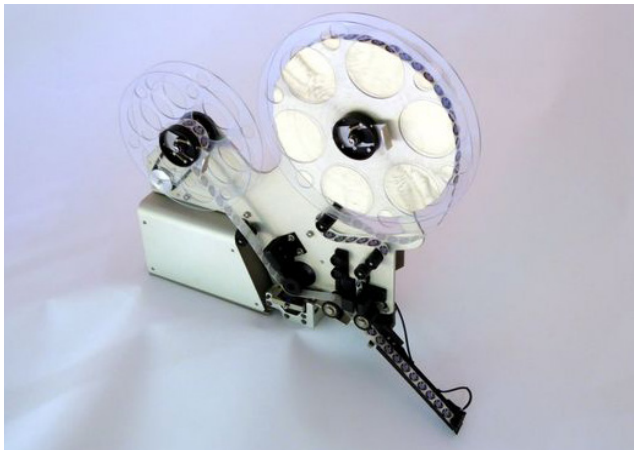
PL 2000

Automatic Produce Labeling Machine

Pro Label International, Inc.

The PL 2000 is engineered for dependable performance in demanding packing environments, without the expense of frequent repairs or maintenance. With over 20 years of expertise in designing labeling machinery for fruits and vegetables, it's equipped with the latest technology and integrated features that ensure easy deployment, smooth operation, and minimal upkeep, making it a reliable choice for your packing needs.

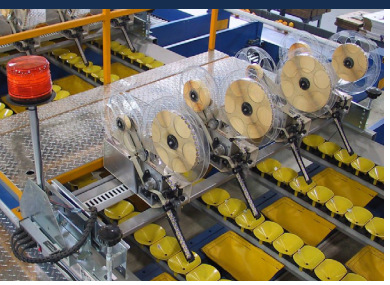
- Quick changeover reduces downtime for smooth production.
- Soft touch applicator for gentle and accurate label application.
- Fast issue identification with electronic diagnostics.
- Precise label placement for consistent, accurate labeling.
- Fast label size adjustment accomodates easy label switching.
- Flexibility to integrate seamlessly with most sizers or operates as a stand-alone unit on singulated conveyors.
- Affordable pricing

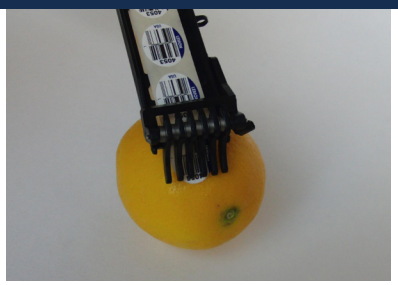


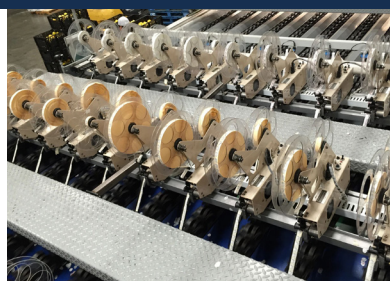
Specifications

E-Diagnostics	Real-time feedback to quickly identify service and operational issues.
Easy Maintenance	All moving parts are mounted on a single service plate for simple access
Precise Control	Independent encoder ensures precise label placement without the timing pulse.
Durable Construction	Built to deliver superior performance year after year
Compact Size	Easily deploy on narrow conveyor lanes.

The PL 2000 offers cutting-edge technology and integrated features for easy deployment, operation, and maintenance at a competitive price. With no long-term contracts, it's a flexible, cost-effective solution for today's packing houses.







Solutions Without Boundaries

Pro Label International values our client relationships and is committed to ensuring optimal performance of your Pro Label applicators. We offer flexible machine support services, tailored to meet your needs.

Onsite Time & Materials Repairs

- Hourly travel charges (1-hour minimum) plus mileage
- Hourly on-site labor (1-hour minimum)
- Replacement parts charged separately

Depot Service

Pro Label machines are designed for easy shipment to our depot for servicing. This service offers an economical option for prepping your machines during the off-season or for handling less urgent repairs. It is the most cost-effective alternative, as it eliminates travel charges and mileage costs.

- Hourly labor charges apply
- Replacement parts charged separately

FDA-Approved GS1 Labeling / PLU labels for direct application to edible surfaces of fruit and produce labeling.

Food Safety is our priority, and all our labels are approved for use in direct food contact applications.

ADHESIVE AND COATINGS The contact surfaces of the PROLITE paper stock and PROFLEX plastic stock labels conform the Code of Federal Regulations CFR 21 sections as follows: FDA 176.170, FDA 176.180, FDA 175.105, FDA 175.125, FDA 175.300. Only substances in the FDA, EEC, BGA and CFIA guidelines regarding materials and articles coming into contact with foodstuffs are used in the manufacture of PROLITE and PROFLEX.

From high-speed labelers to produce labels, Pro Label can help you achieve your produce labeling objectives by providing a complete, turn-key labeling solution that includes both equipment and labels.

Contact Pro Label today for cost-effective solution for your produce labeling needs.
