

***Pro Label 2000 Labeling  
Machine for Produce.***

Throughout our more than 25 years, Pro Label has been committed to several guiding principles with respect to our equipment:

**Durable construction:**

Our machines perform year after year in challenging, packing shed environments without costly repairs or maintenance.

**Compact size:**

Our 2000 is compact and easy to install on narrow conveyor lanes. Compact size also means easy, low cost shipping for cost-effective routine maintenance at our service depot.

**Flexibility:**

The 2000 is easily integrated with most sizers or used as a stand-alone on singulated conveyors.

**Low Price Point**

We offer a low price point for our machines with no long-term, multi-year contracts

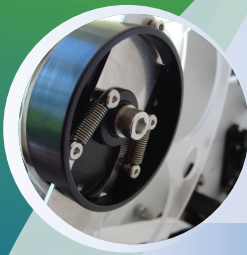

- *Designed for use with Pro Label FDA-Approved labels for direct contact with edible surfaces of fruit and produce*
- *Electronic diagnostics provide feedback to quickly identify service and operational issues.*
- *Our updated label path and controls provide super-easy label changeover and excellent performance.*
- *Moving parts are mounted on a single service plate for lower cost maintenance*
- *Able to operate with its' own encoder - not dependent on the sizer's timing pulse. This means precise control of label placement on the fruit.*
- *Adjusting the machine for different label sizes is simple and fast.*

## QUICK CHANGEOVER

Quick release Surlok un-wind and rewind is simple to use and reduces label change over.

## Print-on-demand

Pro Label International, Inc offers the client-driven solution of Print-on-Demand. Print variable information including GTINs, PLU numbers and barcodes as needed. We use an industry-proven printing technology that is reliable, scalable and cost effective.

The PL 2000 can operate in either print or non-print modes.

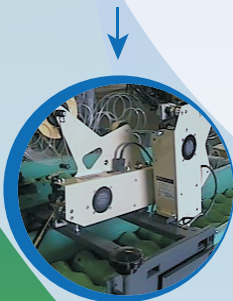

A single power line powers both the machine and printer.

STAND ALONE OPERATION	Y
INTERFACES WITH GRADERS FOR SELECTIVE LABELING	Y
ABLE TO ACCEPT DIFFERENT SIZES WITHOUT MODIFICATION	Y
EXT INTERFACE NEEDED	N
POWERED WASTE TAKE UP	Y
PANEL WITH DIANOGSTICS	Y
PRE-WIRED FOR ENCODER INTERFACE	Y
BALL BEARING MAIN LABEL GUIDES	Y
SurLoc SAFTY REEL LOCKS	Y

Small machine "Foot pint" is easy to install and remove from the line during cleaning.

## Typical Mounting Examples

Mounted over Small Conveyor System with Singulated Lines

Triple Bank Large System

Labelers Integrated with Automated Case Filling
