

More of your garden

MORE OF YOUR GARDEN ALL YEAR ROUND

With QOLA you create a living space full of garden enjoyment

A QOLA veranda has a very intelligent system that is made with an eye for quality and can be fully adapted to your ideas and specific wishes. Our aluminum verandas are fully prepared for many extensions, with which you can expand your veranda at any time. Whether it concerns extensions to protect you against wind and rain, sun blinds, heaters, lighting or even a sliding roof - the possibilities are endless!

Spring

In warm weather, open your veranda by sliding the Glass sliding walls and enjoy the fresh scents of spring. When the weather is cooler and changeable, close your veranda and benefit from a pleasantly warm room with an unobstructed view of your garden.

Summer

Relax in your own garden under your veranda. If it gets too hot, you can switch on the blinds at the touch of a button. You decide for yourself when you enjoy the warm sun or the cool shade.

Autumn

During the late summer, open your veranda with a sliding door to enjoy the weather or sit warm and dry under an enclosed veranda during wind and rain. With a veranda in combination with our extensions you can enjoy your garden even in bad weather!

Winter

Seek out the warmth in your garden room. Protected against wind, rain and snow and in combination with our heaters, you can also enjoy your garden in a dry and warm room during winter!

WHERE CAN I FIND WHAT?

We are more than just aluminum verandas!

QOLA is more than just aluminum verandas. For us, it all started with verandas. Everything for us started with the development of a strong and modular veranda system. Based on this system, we have further expanded our range with suitable solutions to further increase your comfort. In addition to all construction and extensions, we offer a range of products that significantly increase the living enjoyment around your home.

Be inspired by our brochure full of ideas and possibilities and make your garden dreams come true!

BUILT FOR THE FUTURE: SOLID & MODULAR

A veranda completely to your custom sizes

Our products are available in many standard sizes. But we also offer you the option of having a veranda, garden room or carport produced completely to your custom size. Do you want more information about the dimensions? Please contact us for all the possibilities.

Our assortment Roofings

Our standard roofings consist of polycarbonate opal, polycarbonate clear and 8 mm Glass.

We also offer heat-resistant roofing. This type of roofing is finished with a UV-reflecting layer that ensures that the solar heat is reflected without loss of light.

Expand your veranda? You decide when!

You can expand your aluminum veranda at any time. Immediately when purchasing a veranda or you make this choice later.

Our existing and future extensions always fit the veranda system.

Standard colors of our verandas

Choice of four standard colours:

- RAL 9016 White
- RAL 7016 Anthracite structure/glare
- RAL 9005 Black structure
- RAL 9007 Grey structure

A RAL color of your choice is available at an additional cost.

THE MODULARITY OF OUR PRODUCTS

Compose and combine your product according to your own wishes!

Every idea is unique and every situation is different. Our modular veranda system and all resulting products have been designed with this in mind. Our veranda system is modular and makes it possible to expand your veranda, carport or outdoor cabin to suit your needs and the situation. It is even possible to combine extensions with each other!

All of this, the way you want it and when you want it. That's what we call customization!

EASY EDITION

With Polycarbonate and Glass

Perfect if you want an **aluminum** veranda without extensions

The Easy Edition is the basic veranda model. This budget-friendly veranda is made of high quality aluminium of german top quality and is provided with slim posts.

The posts are equipped with an integrated rainwater drainage, whereby the water drains away at the front of the post.

The Easy Edition is available with a milky white opal polycarbonate sheet or with clear Glass.

An Easy Edition with a sidewall?

With the optional side walls, you can protect yourself from wind and weather.

LEGEND EDITION

With Polycarbonate and Glass

A versatile veranda that can be combined with many extensions

Opening and closing the roof of your veranda?

With a sliding roof you can enjoy fresh air in good weather and stay dry when it rains or snows.

The Legend Edition is a veranda with a strong and robust system that is basically prepared for extensions and constructions to increase your comfort even further.

Even if you have had one for a long time, you can expand the veranda with our extensions with at any time.

With our extensions you can convert this veranda into a complete one garden room with LED lighting and sun awning. Or what about a veranda with a sliding roof, with which you can regulate the heat in hot weather!

EXPERT EDITION

With Polycarbonate and Glass

Makes the space more open and flexible thanks to the extra strong gutter

The Expert Edition is basically a Legend Edition veranda, equipped with the extra strong GIGA gutter. The GIGA gutter ensures that this veranda can be built with one less post.

Because the Expert Edition has one less post, you can enjoy an obstacle free and clearer view. In addition, the space under your veranda can be arranged more flexible because you do not have to take an extra post into account.

And just like the Legend Edition, the Expert Edition veranda can be expanded into a complete garden room.

Always a clear view?

With sliding glass walls, you can always enjoy a clear view in a closed room.

SUPERIOR EDITION

With Polycarbonate and Glass

A veranda with enormous carrying capacity; up to 42 m² on only two posts

The Superior Edition is a veranda with extremely high load-bearing capacity. It can be constructed up to 7 metres long and 6 metres wide.

Due to thicker beams, a bigger gutter and more stable posts, this veranda has a gigantic carrying capacity and a robust appearance.

In addition to the fact that the Superior Edition is often built in houses, this veranda is also extremely suitable for restaurants and sports clubs to create a large covered terrace.

Pleasant temperature at all times?

With various sun protection solutions you always sit comfortably and glare-free.

FLATROOF EDITION

With Glass

A stylish aluminum veranda with an optical flat roof

The Flatroof Edition is a stylish veranda with an optical flat roof and 22 cm high roof edges. This veranda is perfectly suitable for properties, where a veranda with a standard sloping roof is not possible or desired.

The roof is placed in a minimal slope, so that water can easily drain away through the posts. A robust gutter cover is placed around the roof of the veranda, which makes it appear optically flat.

The Flatroof Edition is supplied with a modern flat edge cover with 5 cm overhang. For a more robust look or integrated LED strips, it is possible to equip the veranda with a flat or round cap cover with 22 cm overhang.

SLIDING ROOF CONSTRUCTION

With Polycarbonate and Glass

A new world opens up for you with a sliding roof construction

A sliding roof literally opens up a world for you! Enjoying the sun or fresh air and sitting dry when it rains. On extra hot days you can regulate the heat under your veranda by simply opening the sliding roof. Your veranda becomes even more functional and flexible with a sliding roof.

The sliding roof is available as a complete roof construction for almost all conservatory brands. In addition, it is also possible to provide one roof field with a sliding roof.

The Sliding roof construction is also available with a heat-resistant roof covering.

FREE-STANDING CONSTRUCTION

With Polycarbonate and Glass

Makes it possible to place your veranda freely in your garden

No veranda attached to your house, but still an ideal seating area in your garden? A free-standing veranda construction makes it possible to place a veranda freely in your garden.

With this construction it is possible to move the gutter of the veranda to the rear and the highest point of the veranda to the front. Instead of mounting on a wall, posts are placed on the spot of the wall. The veranda system remains the same, which means that a free-standing veranda is also suitable for our extensions and comfort options.

ALUMINIUM WALLS

For verandas, carports and outdoor cabins

More privacy with durable and maintenance-friendly walls

Aluminium walls are the perfect solution to close a veranda side and/or back, to create more privacy and enjoy the garden in all weather conditions. Moreover, they are very durable and maintenance-friendly.

The wide range of extensions offers a modern and stylish collection in various and customized variations. A wall completely made from aluminium, a combination of aluminium and glass - everything is possible. Even a combination with glass sliding walls is an option. Therefore you can create your own stylish seating area completely individual to your desire.

SIDE WALLS

With polycarbonate

Enjoy more privacy and protection from rain and wind

Would you like more privacy under your veranda? Do you want to protect yourself against rain and wind? But all this without much loss of light? With a side wall you are protected against wind and rain.

Depending on your wishes, you choose the filling for the side wall: polycarbonate opal or polycarbonate clear. With opal polycarbonate you have more privacy under your roof, which can be at the expense of a bit of light. Do you not want too much loss of light, and privacy does not play a role? Then a clear polycarbonate sheet is the right choice for you.

FRONT- AND SIDE WALLS

With glas

Close your veranda against wind and rain and benefit from maximum light

Close your veranda against wind and rain and without the room being darkened? By choosing for a front or side wall with glass, you retain a maximum light and you benefit from a spatial effect.

In addition to a lot of light, a side and/or front wall with glass has the great advantage that it can be combined with a tilt and turn window, a door or even with aluminum walls.

Tilt and Turn windows or doors?

Fixed walls can be fitted with tilt and turn windows and doors.

SLIDING DOOR

With Glass

A practical connection between your veranda and garden

Matching colors to your window frames?

If you wish, you order your veranda and extensions in a RAL color of your choice.

Isn't it wonderful to open the doors on a summer day and breathe in the fresh summer air? With an aluminum sliding door you make even more of a connection between your house and garden.

While in many cases you have to keep space free with patio doors because of inward or outward opening doors, you can use this space more freely with a sliding door. This includes, for example, your garden furniture.

Another benefit; the sliding door comes with a sturdy handle including a lock, so you can lock up your veranda or garden room!

GARDEN ROOM

With glass sliding doors

A garden room with a completely transparent view to the outside.

With a garden room you create an extra space to your property that perfectly overflows into your garden. When it's just too cold to sit in your garden, you can sit comfortably in a garden room and enjoy your garden.

This garden room comes with sliding glass walls and gables. The glass sliding walls ensure that the garden room warms up faster and retains this heat well. In addition, glass offers the advantage that a lot of light enters the garden room and you can enjoy a magnificent view of your garden.

CLOTH BLINDS

For all verandas and Garden rooms

Determine per roof section whether you want to enjoy sun or shade

With a cloth blind you choose when and how long you want to enjoy the sun's rays. A high-quality cloth is stretched per roof section, which you can slide open and closed with a telescopic rod.

Would you rather have a sun cloth in one piece? That is also possible.

The cloths blinds are produced from high-quality material that is resistant to extreme weather influences. Due to the use of aluminum wires, the cloth has a reflective effect on the sun's rays.

The cloth blinds are available in three colours: yellow, grey and light grey.

UNDER-ROOF SUN AWNING

For verandas and garden rooms

Reduces heat from the sun under the veranda

The sun can cause very hot air conditions under a veranda on a summer day. With an under-roof sun awning the veranda is protected from the heat of the sun and you can enjoy the shade at the right temperature. This rock-solid and stylish solar protection system from Germany has a value for money. It prevents glare from the sun and reduces the heat under a veranda.

Create a shade quickly and easily with the electrical operating system. The sun awning is equipped with a very strong Somfy motor.

A sun shade that hangs tight?

Sun awning with side guides ensures that the fabric hangs taut with a seamless connection.

TOP-ROOF SUN AWNING

For verandas and garden rooms

Prevents the sun's heat from reaching the roof of the veranda

If you have a veranda that is in the sun all day, it can get quite warm under your veranda. To prevent a greenhouse effect from occurring, our top roof sun protection is a perfect solution.

The top roof awning is mounted on top of the roof of your veranda. This ensures that the sun does not hit the roof of the veranda so that it becomes less hot under your veranda.

The top roof sun protection is equipped with an extremely strong Somfy motor. This powerful engine can optionally also be equipped with remote control.

CARPORT WITH A FLAT ROOF

With Sandwich Panels

An elegant and classic carport in a modern aluminum design

In a changeable climate it is a nice idea that your car, caravan, boat or other property is protected against sleet, snow, rain and bright sun. A carport with a flat roof offers the right protection and extra comfort.

A carport with a flat roof also gives you the necessary comfort. For example, dirt on your freshly washed car is almost a thing of the past, your car stays cooler in the summer and you no longer have to stand in the rain when you want to get in or out of your car.

The flat roof carports are made of high-quality aluminum and are easy to install without having to make any adjustments to your home.

DISCOVER THE POSSIBILITIES OF OUR OPTIONS AND ACCESSORIES

Polycarbonate

We supply our verandas standard with two types of polycarbonate; opal or clear.

These variants are also available as heat-resistant roofing at an additional cost.

This roofing is finished with a UV-reflecting layer that ensures that the solar heat is reflected without additional light loss.

Glass

Our verandas with Glass roofing are supplied with 8 mm clear glass as standard.

For an additional charge you can choose for glass with a different look. We offer two types of Glass: Frosted glass; Glass with a matt, milky white film and Clear Stopsol: heat-resistant Glass with a clear silver colour.

Heaters

With our modern heaters you can also enjoy your veranda on cool evenings. Even in the cold months of the year it is possible to sit outside with and make even more use of your veranda.

We offer different types of heaters, most of them are provided with a remote control.

In addition, we also offer heaters with smartphone operation and even with integrated Bluetooth speaker and LED lighting.

Sandwich Panels

Some of our products are available with white Sandwich Panels.

Sandwich Panels consist of two aluminum plates with a layer of insulation material in between. Sandwich Panels have a good insulating effect and look modern and stylish.

Cleaning

Perhaps one of the most tedious tasks of cleaning a veranda is cleaning the gutter.

With the help of a gutter brush, the leaves are collected in the brush. This will not clog the gutter and make it very easy and quickly to clean the gutter by simply tapping the brush.

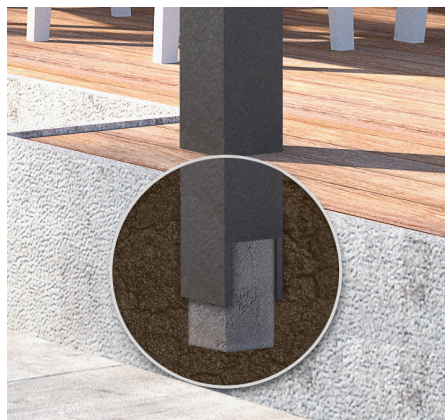

LED-lighting

Create the atmosphere that suits your home and enjoy your veranda even longer in the evening with our attractive and economical LED lighting!

Depending on the LED set, you can operate the lighting with a wall switch or with a remote control. If you choose for a variant with a remote, it is possible to switch the lighting on and off in four parts. With the remote it is even possible to dimm the LED-lighting!

Fundering

A veranda, garden room, outdoor cabin or carport must of course have a solid foundation. That is why it is important to choose the right base for your product.

The right foundation depends on the product, your wishes and the situation on site.

Do you want the rainwater drain underground or through an opening in the post? Or make it yourself easier with an adjustable concrete base, which makes it possible to easily change the height of the post, even after installation.

We have a strong and solid Foundation for every product type and every situation, with which you can be confident that your product will stand firmly in the ground for many years to come.

Do you want more information? Ask your dealer which foundation best suits your situation.

A different RAL-colour

With most products from our range you have the Choice of four standard colours.

Does the color not suit your house? Or do the colors not match your taste? For an additional charge it is possible to order your veranda or extension in a different colour. We offer a wide range of colors from which you can choose a suitable RAL colour.

Operating rod

You can open and close our sliding roof and cloth blinds cloth manually. For this you need an operating rod (sliding roof) or telescopic rod (cloth blinds).

You can order this directly when purchasing your product or at a later time as a replacement product.

More from your garden

With QOLA you create a living space
full of garden enjoyment

A QOLA veranda has a very intelligent system
that is made with an eye for quality and can be
fully adapted to your ideas and specific wishes.

Our aluminum verandas are fully prepared for
many extensions, with which you can expand your
veranda at any time. Whether it concerns
extensions to protect you against wind and rain,
sun blinds, heaters, lighting or even a sliding roof.

The possibilities are endless!
