

ppmc.spot.next[®] contracts

Always have contracts under control

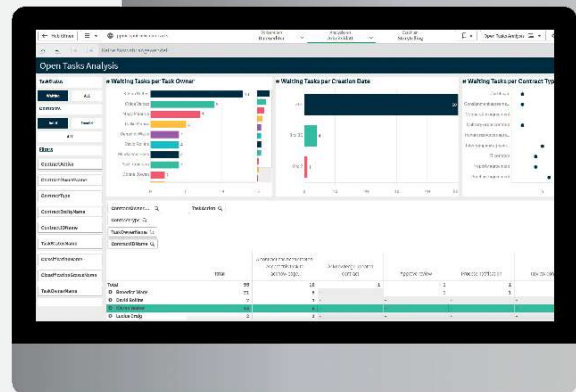

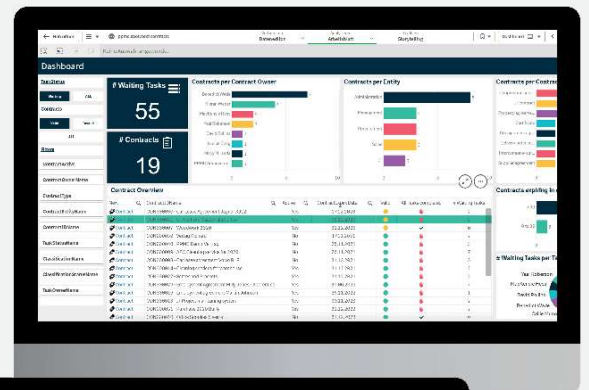

Manage your contracts and agreements with next[®] contracts. Don't miss any deadlines or time spent searching for documents and the right version. With the interaction of ppmc.spot.next[®] contracts, you have a professional and legally compliant document management system with outstanding evaluation options.

Benefits

- All contracts in one place: easy management and filing of all contracts – up-to-the-minute overview
- Compliance with regulations through customized workflows (creation, approval and review of contracts in combination with version control and a reliable monitoring log)
- Protection from prying eyes: all contracts are more secure than a paper archive or file server will ever be
- Ready to use, smooth software updates
- Easy to use, no complex programming, implementation or training required
- The programme runs on your preferred server (Windows, Unix, OSX, IBM i) and even in the cloud

We support you according to you needs

from implementation and training to individual enhancements of the application.

Excerpt from the scope of functions

- Total contract overview
- Contracts with open tasks
- Expired contracts or contracts to be processed
- Analyses per contract type and person responsible
