

EPSIS Technologies delivers cybersecurity, cloud modernization, IT asset management, and managed technical operations for federal agencies, state and local organizations, and commercial enterprises operating in regulated, distributed, and high-availability environments. Existing capabilities in hybrid cloud migration, Infrastructure as Code, 24/7 service delivery, ServiceNow-enabled automation, and compliance-driven security operations support positioning across both public-sector and enterprise buyers.

CORE COMPETENCIES

Cloud & Infrastructure Services

Hybrid cloud migration across AWS GovCloud, Azure Government, and hybrid environments.
Legacy system refresh, technical modernization, and infrastructure optimization.
Infrastructure as Code (IaC), automated provisioning, and repeatable deployment standards.
Managed cloud operations supporting resilience, scalability, and availability for mission-critical applications.

Technical Operations & Managed Services

Managed support for geographically distributed corporate, hospitality, and public-sector environments.
24/7/365 NOC, SOC and Service Desk support.
ITIL-aligned incident, problem, and change management.
Multi-site WAN/LAN, wireless, and infrastructure operations.

Program & Project Management

PMO establishment, QA/QC, and Earned Value Management support.
Risk register management, subcontractor coordination, and deliverables tracking.
Structured execution for modernization, security, and operational transformation programs.

Cybersecurity & Compliance

NIST SP 800-53, FISMA, and CMMC 2.0 control implementation.
Continuous monitoring, vulnerability management, and zero-trust-aligned security operations.
Security authorization documentation and compliance support for regulated environments.
Security governance services adaptable to both federal requirements and commercial enterprise risk programs.

DIFFERENTIATORS

- 20+ Years Federal/DoD Execution: Direct support to U.S. Army PEO-STRI with zero audit findings & full SLA compliance
- 100% Federal Audit Accuracy: Proven accountability across \$50M+ in government IT assets
- ServiceNow-Enabled Automation: 28% faster ticket resolution; 99.2% asset data accuracy
- 24/7 Mission-Critical Operations: Continuous monitoring ensuring uninterrupted federal mission readiness
- Low Onboarding Friction: Pre-cleared personnel, established agency relationships, ITIL-certified teams ready for immediate execution

PAST PERFORMANCE / PROOF POINTS

U.S. ARMY PEO-STRI

IT & Cybersecurity Services

Scope: Secure, high-availability IT operations, cybersecurity compliance, and asset management across multi-site networks
Scale: \$50M+ IT assets; 24/7 operations supporting training & simulation missions
Outcomes: Zero audit findings; 100% SLA compliance; on-time, under-budget delivery

DoD ENTERPRISE

Cybersecurity & Compliance

Scope: NIST/FISMA/CMMC control implementation, continuous monitoring, security authorization documentation
Scale: Enterprise-wide security posture management
Outcomes: Full framework alignment; improved audit readiness; reduced security risk exposure

FEDERAL/STATE IT MODERNIZATION

Cloud & Infrastructure

Scope: Hybrid cloud migration, legacy system refresh, infrastructure optimization
Scale: Multi-environment deployments supporting mission-critical applications
Outcomes: Increased system availability & resilience; enhanced efficiency via automated provisioning

CORPORATE DATA / HOW TO BUY

PRIMARY NAICS:
