This table sets our 2026 specimen rates. These rates are provided to give clients an insight into their options. Retainer rates are paid monthly and include up to the stated volume of work in that month. We appreciate that work load can be unpredictable so we provide for reduced hourly rates for additional work exceeding the retainer cap as well as provision for rolling over some unused hours into the next month. Recognizing that not every client is ready for a body of work that would make a retainer agreement practical, Bioconsultx also provides for hourly service rates with no minimums and a sliding charge scale based on work volume.

These rates are for illustrative purposes. Actual rates may differ based on availability and duration or nature of an engagement. These rates do not constitute an offer to provide services. All rates require a Consulting Agreement, Master Services Agreement or equivalents. Other combinations of commitments, rates, notice periods and deposits can be tailored to meet a client's needs. However, commitment to a planned body of work and the volume of work undertaken will be charged at lower rates than would be required to undertake similar work on an unpredictable and/or occasional basis.
