## Profile

A committed and driven Occupational Therapist with clinical expertise in adaptations, equipment provision, moving and handling and rehabilitation, developed within an NHS, local authority teams and private practice. Within these roles I have worked with paediatric, adult, and older adult individuals with a wide variety of physical disabilities and long-term conditions.

I am a reliable, responsible, and hardworking individual. As an enthusiastic forward-thinking team player, I thrive on sharing my experiences and learning new skills from my colleagues to continue my professional development to be the most effective practitioner I can be.

## Key Achievements

- Sensory Integration Practitioner (due for completion January 2026)
- Complex Moving and Handling Risk Assessment
- Medico-legal Arena Working
- Wheelchair Accessible Vehicle (WAV) Assessments
- Major Housing Adaptations (including DFG process)
- Specialist Equipment provision
- Postural Seating and Wheelchair Assessment
- Clinical Report Writing and Presentation Skills

## Professional Memberships

- HCPC Registration
- Royal College of Occupational Therapist (RCOT) Membership including SS Independent Practice
- National Back Exchange Membership
- Registered with DBS Update Service

## Work Experience

Sept  
2025

-

Present

### Occupational Therapist & Moving and Handling Practitioner

SupportiveAction Ltd

In my role as an Occupational Therapist and Moving & Handling Practitioner, I carry out thorough assessments and develop tailored treatment plans for adults and children with a range of functional, motor, and sensory needs. I have experience working with clients recovering from complex physical injuries, brain injuries, and neurological conditions.

My work includes coordinating property adaptations with architects, identifying and implementing specialist equipment, and creating detailed moving-and-handling plans with robust risk management. I also analyse daily living activities to support independence, provide training to care teams, and deliver focused hand therapy and functional rehabilitation. I am currently expanding my practice through ongoing study in Sensory Integration.
