

## 250,000 SQUARE FOOT MALL | \$143,528

On May 5th at 6 a.m., a 250,000 square-foot mall experienced a fire affecting their HVAC system. Guarantee Restoration Services received a call about the loss at 2 p.m., and was able to arrive onsite within 20 minutes. After assessing the damage, GRS had a full crew in place two hours after receiving the initial call. Guarantee set up appropriate equipment to meet cost expectations and to minimize safety hazards. The equipment used included High Efficiency Particulate Air (HEPA) filtration, hydroxyls, ionizers and axial fans. The crews worked from 9 p.m. - 7 a.m. to accommodate the shopping center and the safety of others. On May 12th, the facility was released back to the owners, and it was fully cleaned and deodorized.
