¿SABÍA QUE?

Los peligros de la exposición a la pornografía

Sabemos que la pornografía es un gran mal, y el fácil acceso al internet hace que sea muy probable que muchos niños se vean expuestos a ella a edades cada vez más tempranas, incluso aunque no la busquen activamente. Los niños que están expuestos a la pornografía son más propensos a sufrir abusos o a volverse indiferentes ante comportamientos inapropiados en sus propias relaciones. La pornografía también puede alterar el cerebro de un niño, activando la dopamina en patrones similares a los de la adicción a las sustancias. Para mayores informes lea el artículo de VIRTUS® "The real danger of children being exposed to pornography" (Los peligros de la exposición a la pornografía) en lacatholics.org/did-you-know.

DID YOU KNOW?

The real dangers of pornography exposure

We know that pornography is a great evil, and easy access to the internet makes it all too likely that many children will be exposed to pornography at increasingly young ages — even if they are not actively searching for it. Children who are exposed to pornography are more likely to be abused, or to be desensitized to inappropriate behavior in their own relationships. Pornography can also change a child's brain, activating dopamine in patterns similar to substance addiction. For more information, read the VIRTUS® article "The real danger of children being exposed to pornography" at lacatholics.org/did-you-know.
