### The Spring Edit: Jose Pizarro's new cookbook, Scandi fitness trends and Tel Aviv's first gin bar

The new season brings a wealth of fresh design, travel, fitness and food trends to break you out of winter hibernation

New York's Soho district is getting an injection of style with the opening of 11 Howard ([designhotels.com](http://designhotels.com)) in April. The 221-room property has been designed in collaboration with Danish firm Space Copenhagen, which was responsible for the aesthetic behind Michelin-starred restaurant Noma. It will be big on technology – think self check-in and smart room service – and also feature a co-working area as well as hanging space for contemporary artists. 11 Howard is the latest addition to the Design Hotels [portfolio](#), which also launches its new book on April 1.

Conscious hospitality: 11 Howard hotel in New York
