

IN A MEDICAL EMERGENCY,

CALL 911

Every minute matters.

Calling 911 gets you the right help, right away—when it matters most.

DON'T DELAY. CALL 911.

Calling the on-call nurse or security can **delay life-saving assistance.**

CALLING THE ON-CALL NURSE OR SECURITY

Can cause dangerous delays:

- ✗ Messages need to be received and responded to
- ✗ Staff may need to assess the situation first
- ✗ EMS is called after valuable time is lost

IN A MEDICAL EMERGENCY, MINUTES CAN SAVE LIVES.

CALLING 911 GETS HELP FAST:

- ✓ EMS is dispatched immediately
- ✓ Paramedics arrive with life-saving equipment
- ✓ Faster treatment can lead to better outcomes

CALL 911 FOR ANY MEDICAL EMERGENCY, SUCH AS:

Chest pain or pressure

Sudden weakness, numbness or trouble speaking

Trouble breathing or shortness of breath

Severe dizziness, fainting or fall with injury

Any condition that seems life-threatening

WHEN IN DOUBT, CALL 911.

NOT SURE IF IT'S AN EMERGENCY? CALL 911 ANYWAY.

If you are unsure whether a situation is a medical emergency, do not delay seeking help. Trained 911 emergency dispatchers are available 24 hours a day and can assess your situation, provide instructions, and dispatch the appropriate emergency services if needed.

When in doubt, call 911. It is always better to call and be safe than to wait and risk a medical emergency becoming more serious.

WHEN IN DOUBT, CALL 911.
It's the fastest way to the right care.
