Tamperproof Static Hot & Cold Water Washers

HOT AND COLD PRESSURE WASHER

The tamperproof static hot & cold pressure washer is housed in a strong lockable cabinet manufactured from either mild or stainless steel, and all models would be frost protected as standard. One of the main advantages with this installation is it can be spec'd and built for your cleaning requirements to eradicate any historical issues you may have had with pressure washers (dirty fuel, or starvation of water,) the fact this unit is bolted down and that the users only have the operation controls at the side of the unit to use again limits any possible down time.

Features

- Single or twin cabinets
- Internal hose reels
- Flame failure cut out
- Larger coils for increased heat
- Insulated cabinets
- Remote controls
- Fleet colour scheme
- Various chemical application
- 24v switching for operator safety
- Thermostatically controlled heat
- Low fuel and water warnings
- Lockable control panel door for anti-vandalism
- Thermal overload protection
- Emergency stop button

Optional Extras

- Due to the nature of our production facilities - we can custom build units to any specification - I.E special sizes; different pumps or motors; with remote control - all available in painted zintec or stainless steel.
