MORE THAN A CAR WASH

Most places can wash a vehicle. Some can detail one. Fellowship Auto Repair approaches detailing with the same professional mindset we bring to automotive repair. We use professional products, proper processes, careful workmanship, quality control and documented vehicle inspection. Our goal is not simply to make your vehicle shine for a day; it is to care for the vehicle as a whole.

While your vehicle is already in our care, we inspect key visible systems, photograph concerns, add technician notes and prepare repair or maintenance estimates where appropriate. You receive professional detailing and meaningful vehicle-care value in the same visit.

BUILT ON CHRIST

Fellowship Auto Repair is built on Christ. Our standard is not to do the least we can get away with. We want to serve people with integrity, stewardship and excellence. Your vehicle should be treated with care, your concerns communicated clearly, and recommendations documented honestly - without pressure.

WHY THE INCLUDED ASSESSMENT MATTERS

THIS IS NOT A QUICK COURTESY CHECKLIST.

Our automotive team performs a comprehensive 70-Point Vehicle Health Inspection. Visible concerns are documented with digital photographs and technician notations. When appropriate, we then prepare itemized parts-and-labor estimates for identified maintenance and repair needs.

You leave with more than a clean vehicle. You leave with a roadmap.

Important: The complimentary vehicle health assessment is a visual inspection and estimating service. It does not replace diagnostic testing required to determine the cause of warning lights, electrical faults, noises, driveability concerns, internal mechanical problems or other symptoms requiring testing. The stated \$400 value reflects the combined professional inspection, digital documentation, technician notations, review of findings and estimate preparation included with the detail.

Pricing: Vehicle size and condition may affect final pricing. Any additional condition-related charge is discussed and approved before additional work is performed.
