SINKS + TAPS.

Collection 25

Contents.

INTRODUCTION

02

The finishing touches can make all the difference when it comes to creating your dream kitchen. Upgrade your kitchen with our Sink and Tap collection – where form meets function effortlessly!

CERAMIC SINKS

08

Ceramic sinks are known for their timeless appeal and durability. At home in a period drama but also fantastic in a modern setting, ceramic sinks tick both the aesthetic charm and offer long lasting performance and easy maintenance.

GRANITE SINKS

31

One of nature's most robust materials, granite is a superb choice for a robust and much-used sink. Crafted from a composite material composed of crushed granite stone mixed with acrylic resin and available in an array of stylish colours to match your décor.

STAINLESS STEEL SINKS

40

Stainless Steel sinks offer a practical choice for busy households. They complement various kitchen styles and appliances due to their neutral and modern appearance.

STEAMING HOT WATER TAPS

108

Steaming hot water taps are the perfect blend of form and function, delivering an unparalleled experience of comfort and convenience. Enjoy the luxury of hot water without the hassle of waiting for the kettle to boil or dealing with bulky water heaters. Say goodbye to the waiting game and experience the ultimate in time-saving and energy efficiency. Whether you're brewing a quick cup of tea, preparing instant meals, or simply need hot water on demand, our steaming hot water taps are your go-to solution.

PURITI TAPS

117

With a Caple Puriti filter tap you can have ordinary hot and cold water, as well as purified water from one single fitting. The activated carbon filter removes chlorine, rust and sediment so you can feel better about the water you consume. You might also find it improves the taste!

PULL OUT + SPRAY TAPS

122

Pull out + spray taps operate like single-lever designs, offering standard hot and cold functions. The pull-out tap features a flexible hose for easy movement, while spray taps deliver a powerful, high-pressure spray for efficient washing and rinsing. For ultimate convenience, some taps combine both pull-out and spray features.

POT FILLERS

129

Conveniently installed above your hob, they bring water right where you need it. Available in modern and traditional finishes, they're the perfect blend of function and design.

SINGLE CONTROL TAPS

132

Simplicity itself, with everything controlled by a single lever - move it left and right for temperature, or up and down for pressure.

BRIDGE TAPS

146

A Victorian inspired design characterised by a bridge-like structure connecting the separate hot and cold water inlets.

DUAL CONTROL TAPS

150

With separate levers for hot and cold water, allowing precise control over the water temperature, letting you find your preferred mix of hot and cold water.

Your Home Your Style.

The finishing touches can make all the difference when it comes to creating your dream kitchen. Caple sinks are made in Ceramic, Granite or Stainless Steel and our taps range from the classic to the hi-tech. They bring your kitchen to life by combining practicality with style, whatever your taste or budget.

Whatever kitchen design you've decided on, Caple has the perfect sink and tap to set it off. Making some key decisions now will help you find just the right combination.

UNDERMOUNTED SINKS

Mounted beneath the worktop, which is cut to fit the size of the bowl. A distinctive, fully integrated look available in Ceramic, Granite and Stainless Steel. Taps can be mounted into the worktop behind the sink. Granite, solid surface or wooden worktops are compatible with undermounted sinks.

FARMHOUSE SINKS

A period Victorian design usually found in a traditional home [not only farmhouse kitchens]. Butler or belfast sink styles are usually ceramic but also available in contemporary granite [see pg 31]. These sinks strike the perfect balance between tradition and modernity. Not to be missed is our CPBS5BK black ceramic sink, a sleek standout in its own right.

Usually mounted into the worktop [Granite, solid surface or wooden], although some sink models allow for them to be fitted to the laminate. They can be installed under the worktop with the front face visible - to accommodate the depth, you'll need a short height cabinet.

INSET SINKS

The feature lip around the sinks edge fits on top of the worktop. With finishes available in Ceramic, Granite and Stainless Steel. Taps are fitted to the sink itself, however, individual bowls may require the tap to be mounted into the worktop. Granite, solid surface, wooden or laminate worktops can be used with inset sinks.

Traditional Tastes.

Often the heart of the home, the traditional kitchen is warm and inviting. With elegant detailing and subtle design elements it has a comforting, old world charm.

AN ABSOLUTE CLASSIC

If your kitchen is traditional or country style, you can't go wrong with a classic ceramic. You can choose from the ever-popular and practical farmhouse style for more subtle and sophisticated designs in many shapes and sizes.

LUXURY ON A BUDGET

Don't have the budget for expensive solid worktops but want a farmhouse style sink? Our latest range of Inset Butler Ceramic sinks have been designed with inset edges for installation into a laminate worktop, which means you get all the benefits of an inset sink without compromising on the traditional.

MODERN TWIST

Although Ceramic sinks are notably traditional in appearance they are also beautifully adaptable. Why not pair a single bowl Belfast with a contemporary single lever spray tap to give a fresh take on a classic look.

SUITABLY SIZED

They don't come more traditional than the generously proportioned sit-on sinks. Or a smooth and sophisticated inset design might be more to your taste. Whichever you choose, Ceramic sinks are hard-wearing and easy to maintain with their smooth, gleaming white glaze.

Modern + Minimal.

The last thing you want from the kitchen you choose today is for it to go out of fashion tomorrow. But smartly designed contemporary styling retains its freshness through clean lines, bold colour and striking aesthetics. Where do you start when choosing a contemporary sink and tap?

STEAMING HOT WATER TAPS

Perfect if you are always on the go, steaming hot water taps supply fresh cold water, regular hot water and filtered 98°C steaming water. Our 4 in 1 taps also offer purified and filtered cold water.

NATURALLY GOOD LOOKING

The practical granite sink has become a style icon. Quite right too, as it offers immense durability and comes in an array of glamorous colours.

PICK AND MIX

In the spirit of modernity, why not combine different shapes and sizes? Mix bowls together to reflect your individuality and add the ultimate designer tap for a real talking point.

PROFESSIONAL PULL-OUTS

Try an industrial look with a pull-out or choose a slim line tap for that fresh, contemporary feel. Modern styling is all about contrasts so you can mix and match to your heart's content.

ALL SINKS

LIFETIME GUARANTEE

All Caple sinks have a free lifetime guarantee against manufacturing defects as standard, giving you complete confidence when you buy Caple. Subject to Terms and Conditions.

CERAMIC SINKS

At home in any kitchen, a ceramic sink offers you the simple elegance of a bygone era, yet can look the part in the most contemporary settings.

Farmhouse Sinks.

These time-honoured classics will stand the test of time in today's busy kitchen. Their generous proportions are perfect if you want to make a sizeable design statement.

Each sink is hand finished, so no two sinks are ever alike - sizes may vary by plus-or-minus 2%. We recommend measuring the actual sink before fitting.

HYGIENE FINISH

A selection of our handmade Ceramic sinks are specially glazed to reduce surface bacteria by 99.99% preventing germs from spreading. Unlike a thin coating, the anti-bacterial glaze will last the lifetime of the sink and is safe to use in every environment.

MATCHING METALLICS

With our range of metallic wastes and overflows you can match your sink accessories to your chosen tap. Fits any sink with a 90mm waste outlet. Take a look at all the finishes on pg 99.

Inset Butler.

These beautiful ceramic sinks are the perfect solution to attaining a luxurious farmhouse aesthetic without the price tag.

GOODBYE EXPENSIVE SOLID WORKTOPS

Don't have the budget for expensive solid worktops but want a farmhouse style sink?

These inset butler sinks have been designed with inset edges for installation into a laminate worktop, which means you get all the benefits of an inset sink without compromising on the traditional farmhouse look.

Look out for the icon below on relevant sinks.

EASY INSTALLATION

At Caple, we design with you in mind. That's why we have created these models to be installed in a standard base unit.

Individual Bowls.

Round, square, rectangular, there's a shape and size to complement your kitchen perfectly. Or pair two bowls of your choice for a unique style.

Our elegantly proportioned individual Ceramic bowls are more than just practical and hard wearing. They give you complete design flexibility, so you can choose the size, shape and number of bowls to suit your lifestyle.

For a clean and classic look, try our traditional round bowl. For something chic and contemporary, how about a single Ceramic bowl paired with a Gold tap with matching waste and overflow?

MATCHING METALLICS

With our range of metallic wastes and overflows you can match your sink accessories to your chosen tap. Fits any sink with a 90mm waste outlet. Take a look at all the finishes on page 99.

Our range consisting of 5 families are made from Geotech, which is available in 7 sophisticated colourways. Our stunning Black and Anthracite finishes are infused with a sparkling metallic fleck, guaranteed to add a touch of glamour to your kitchen.

Desert Sand has a warm, natural feel if you're looking for understated elegance and Chalk White's rich white tones provide the ultimate in relaxed sophistication. If you prefer a slightly industrial, yet ultra modern tone, Grey or Pebble Grey is perfect to create this look.

Material Innovation.

[MATT]

KIND ON THE ENVIRONMENT

Geotech is made up of around 80% natural materials and manufactured using low energy consumption.

HIGHLY DURABLE

Produced to be extremely hard-wearing, it takes the knocks and scrapes of daily life in its stride.

NATURALLY GOOD LOOKING

These sinks offer the beauty of natural stone, yet can be moulded into an unlimited number of inspiring designs.

KEEPS ITS COLOUR

Completely colourfast, the metallic and matt colour finishes will both stay fresh and vibrant.

STAIN RESISTANT

Geotech is resistant to permanent staining. As long as it's cleaned regularly, it won't discolour or stain.

CUT-RESISTANT

Both cut and scratch resistant, Geotech will retain its unblemished surface through thick and thin.

EASY TO CLEAN

All you need to keep Geotech sparkling is warm water and washing-up liquid.

STAINLESS STEEL SINKS

Stainless Steel has been the automatic choice for professional cooks over many years. Why not make it yours? It is tough, resilient and highly practical – and in our range of styles, shapes and colours, it looks sensational too.

Metallic Magic.

PVD COATING

All our metallic sinks, taps, wastes and overflows are coloured using physical vapour deposition. PVD refers to a variety of thin film deposition techniques where solid metal is vaporized in a high vacuum environment and deposited on electrically conductive materials as a pure metal or alloy coating. Commonly used on high end watches and formula one cars, PVD is the most effective way to colour metal.

MIX + MATCH

All of our Saso sinks are supplied with a matching waste and overflow. However, if choosing a metallic coloured sink, you can make an extra statement, why not mix and match with a contrasting metallic waste and overflow? See page 99.

Introducing SASO.

The SASO worktop sink collection has been specifically designed to work with three work surfaces – quartz, solid surface and stone. Each side of the base is also angled for easier access to clean the corners and edges.

SMOOTH TRANSITION

The waterfall worktop lines the side of the sink bowl, revealing only the base and the overflow for a truly minimalist look. An installation that's even more discreet than traditional undermounted sinks.

EASY ACCESS

Slanted bowl edges to aid the cleaning process, making every corner easy to access.

Mode Individual + Multiple Bowls.

Chic, modern and sophisticated sums up our Mode collection. These smart Stainless Steel bowls provide a wide variety of options that will finish off your modern kitchen – beautifully.

MODERN MODE

Mode's distinctive look combines ultra modern straight edges and subtly curved corners. The result? A contemporary sink with a touch of class.

TRULY VERSATILE

Whether you prefer an inset or undermounted look, Mode sinks are flexible enough to accommodate any worktop and tap of your choice.

Metallic Magic.

PVD COATING

All our metallic sinks, taps, wastes and overflows are coloured using physical vapour deposition. PVD refers to a variety of thin film deposition techniques where solid metal is vaporized in a high vacuum environment and deposited on electrically conductive materials as a pure metal or alloy coating. Commonly used on high end watches and formula one cars, PVD is the most effective way to colour metal.

MIX + MATCH

All of our Mode sinks are supplied with a matching waste and overflow. However, if choosing a metallic coloured sink, you can make an extra statement, why not mix and match with a contrasting metallic waste and overflow? See page 99.

Zero Individual + Multiple Bowls.

For the razor-sharp, minimalist look adopted by designer kitchen aficionados, nothing is better than Zero. These bowls feature crisp square edges and clean lines in an uncluttered design.

LOOKING SHARP

The clean lines and minimalist styling of our Zero sinks suit modern kitchens to a tee. Featuring a unique angular bowl with a zero degree radius and tapered base, they'll take your designer kitchen to a new level.

PERFECT FIT

The striking geometric bowls come in many sizes and can be inset or undermounted for countless creative possibilities. With multiple bowls and a sleek shallow drainer also available you can let your imagination run riot.

Team a Zero bowl with a matching drainer, adding a unique touch to your kitchen. If you're really out to impress why not try a combination of two Zero sinks and a matching drainer.

Form Individual + Multiple Bowls.

With its rounded design the Form collection combines the advantages of Stainless Steel with traditional styling.

The charming, individual bowls come in a selection of shapes and sizes. Or if you want a more personalised combination of sinks you can choose from our multiple bowl options.

You have the choice of an undermounted sink for use with wooden, granite or solid surface worktops, or one of our inset models that can be used with laminate surfaces.

Crafted from Stainless Steel, Form sinks will keep their good looks whatever you throw at them. Practical, stylish and functional, this collection meets the most demanding kitchen criteria.

Inset + Sit-on Sinks.

LOW PROFILE

Low profile sink edges create a seamlessly, sleek look. Choose a sink featuring a low profile edge of 1mm or less to achieve a smooth, almost flush, appearance.

PERFECT FIT

Inset sinks are the only sink that can be neatly fitted into any surface type.

TO THE LEFT?

Do you need a drainer on the left or right side? With many of these sinks you have the flexibility to choose. For a conventional look, go with a single bowl with drainer. Or for something a little different, try a one and a half bowl.

Waste Disposal Units.

A waste disposer hidden away under the sink can help you recycle your food scraps and leftovers like potato peelings, chicken bones, egg shells and tea bags. It's clean, it's green and it leaves you less to clutter up your bin.

Simply turn on the cold tap and the disposer, then empty everything into the sink. The disposer grinds the food waste into fine particles and flushes the waste away down the drain.

Since more than 25% of household refuse is food, that means less rubbish for the dustmen to take away to clog up our landfill sites, and a reduction in the amount of greenhouse gases emitted.

Disposer waste can be recycled into a soil conditioner once it reaches the water treatment plant so you will be making a positive contribution to your environment.

BIO SHIELD ODOUR PROTECTION

Treated with an Antimicrobial agent, Bio Shield odour protection provides ultimate defense against the growth of bacteria and subsequent odours.

Features a 1.25hp motor and grinding system with a superior torque grind speed for along system life and maximum power.

All models carry a lifetime corrosion proof guarantee, this warranty covers against failure due to corrosion.

EASY INSTALLATION

The lightweight and compact design of the Caple waste disposal units feature easy mount installation, to make fitting a breeze. Fits in any standard 90mm waste outlet.

WASTE DISPOSAL UNITS

WDU050

GENERAL FEATURES

- 2 YEAR GUARANTEE

Accessories.

It's the little details that make a big difference and these handy additions should not be overlooked.

Accessorise your sink with a wooden chopping board that sits neatly on top of the drainer or worktop and always on hand when you need it.

COORDINATING COLOURS

With our new range of metallic wastes and overflows you can match your sink accessories to your chosen tap.

What's Your Type?

The Inside Story.

WRAS APPROVED

The Water Regulations Advisory Scheme [WRAS] is the UK Water Industry's approval scheme.

Our range of WRAS approved taps have been fully tested and are fully compliant with the requirements of the water regulations and byelaws. WRAS Approval is considered the best way to demonstrate compliance as it is granted directly by representatives of the water suppliers and is therefore accepted by every water supplier in the UK.

WATER PRESSURE

Some taps need more pressure than others to flow at the same rate. A pressurised water heater system will provide enough water pressure for any of our taps. However, an unpressurised system may not. You will need to calculate the pressure before choosing a tap that has a minimum requirement - otherwise it might not work properly. To do this, measure how far the water tank is above the tap in metres and divide by 10. This gives the water pressure in bars. Remember that any bends or junctions in the pipework will reduce the pressure.

If you are not sure how to calculate your hot water pressure, ask your plumber. Water pressure can be increased by adding a separate water pump.

VALVE TYPES

You can choose from many different valve options to control how your tap works. In a single lever model, the lever is moved in two directions to control the tap. Other types of tap use either basic compression valves or the superior quarter turn valves that respond quicker.

A progressive valve allows you to control your water flow with a simple rotating motion. The water flow starts cold and gradually gets warmer. The more you turn the control, the hotter the water temperature, whilst the water pressure gradually increases.

PROGRESSIVE VALVES EXPLAINED

WATER EFFICIENT CSH COMPLIANT TAPS

We have developed a collection of taps specifically designed to conform to Water efficiency requirements. These taps have a flow rate of 4 litres per minute or less when measured at 3 bar of pressure. Look out for the water efficiency logo.

AERATORS

If you want more choice but still want the benefits of water efficiency, you can buy an aerator. Sitting within your tap spout, these economical accessories reduce the flow of water to $\leq 4\text{L/pm}$, meaning less water consumption and wastage from your tap. The aeration of water makes for an efficient and cost-effective solution, ensuring that you still experience the same rinsing and washing effect while saving money on your bill.

Tap Colours.

Explore a world of aesthetic possibilities with our extensive range of tap finishes, each designed to elevate your space with a distinctive touch. From the bold and timeless allure of Anthracite to the classic sophistication of black, our collection spans a spectrum of tap colours that cater to diverse styles and preferences.

With our diverse range of tap colours, you have the creative freedom to personalise your space and make a lasting impression. Whether you seek timeless sophistication, modern flair, or a touch of vintage charm, our collection ensures that your taps reflect your unique style and taste.

It pays to experiment. Contrasting colour in the kitchen can work surprisingly well. Teaming a dark sink, nestled under a white worktop, with Copper accessories may seem unusual but, surprisingly, makes a successful combination. If you prefer to coordinate, matching metallics has never been easier with our ever growing family of co-ordinating metallic products. From our Black Steel or Gunmetal appliances to our stunning choice of metallic sinks, taps and furniture handles, there is a metallic finish for everyone!

PVD COATING

What is PVD? Physical Vapour Deposition known as PVD, this highly innovative technique vaporises solid metal in a high vacuum environment. It then deposits this on electrically conductive materials, such as a pure metal or alloy coating. The result? A finish, which is highly resistant to scratches, corrosion and tarnishing.

The colours we use, which feature the PVD method, are Gold, Copper, Black Steel and Gunmetal. PVD is also a process, which is used to coat certain super-premium watches – and Formula One cars – so it's renowned for its longevity. This means that your Gold, Copper, Black Steel or Gunmetal sink [or tap] will be able to withstand plenty of wear and tear. And you can feel confident this will provide long-lasting colour in your kitchen for many years to come.

BENEFITS OF PVD

- › Highly resistant to tarnishing, corrosion, scratches and scrapes
- › One of the most environmentally friendly methods of coating
- › Used for a wide range of decorative finishes with colours that do not fade PVD produces highly brilliant finishes

Steaming Hot Water Taps.

Steaming hot water taps are the perfect blend of form and function, delivering an unparalleled experience of comfort and convenience. Enjoy the luxury of hot water without the hassle of waiting for the kettle to boil or dealing with bulky water heaters. Say goodbye to the waiting game and experience the ultimate in time-saving and energy efficiency. Whether you're brewing a quick cup of tea, preparing instant meals, or simply need hot water on demand, our steaming hot water taps are your go-to solution.

With sleek and stylish designs that complement any decor, these taps not only enhance the functionality of your space but also add a touch of sophistication. 3 in 1 taps supply fresh cold water, regular hot water and filtered 98°C steaming water. While 4 in 1 taps provide the additional feature of filtered cold water too. Quick and simple installation allows the tap, filter, boiler, and solenoid valve [4in1 taps only] to be easily retrofitted.

OUTSTANDING WATER FILTRATION

Offering a new standard of water filtration technology, providing extraordinary accuracy for scale and PH control. This water filtration and conditioning technology effectively combines hardness reduction, mineral stabilization and corrosion inhibition by maintaining a controlled low carbonic acid level in the water.

It delivers the best available water quality for hot drinks by removing limescale build up in the boiler [provided filters are installed and maintained/exchanged in line with manufacturer recommendations].

It includes DuoBlend® valve technology for the most accurate bypass ratio and a 5µm Carbon block membrane for particle protection, reducing tastes and odours such as chlorine and chlorine by-products, THM's, PAH's and pesticides such as Simazine, Atrazine, Lindane and Dieldrin. Each filter lasts approximately six months and is easily changed without tools.

Order your replacement filter cartridge [PURIT13] or full fitting kit including the cartridge [PURIT14] at caple.co.uk for next day delivery.

4in1 Steaming Hot Water Taps.

A TAP BUT 4 TIMES SMARTER

The Fosso 4-in-1 steaming water tap is the perfect combination of versatility and style. Providing not only regular hot and cold water, but also with just the touch of a button, you can enjoy purified and filtered cold water and 98°C steaming hot water too!

The cold water from your water supply passes through the filter into the 3.5L boiler. The water temperature can be easily adjusted from 25°C - 98°C to suit your requirements by simply adjusting the controls located at the front of the boiler.

A safety feature is added for steaming hot water, so you must press the boiling water button twice to receive 98°C filtered steaming hot water and then hold the button to continue the flow. Releasing the button will stop the boiling water flow.

WRAS APPROVED

The Water Regulations Advisory Scheme [WRAS] is the UK Water Industry's approval scheme.

Our range of WRAS approved taps have been fully tested and are fully compliant with the requirements of the water regulations and byelaws. WRAS Approval is considered the best way to demonstrate compliance as it is granted directly by representatives of the water suppliers and is therefore accepted by every water supplier in the UK.

Electronic buttons control the distribution of your selected water type. A single press of the filtered water button provides a continual flow until it is pressed again, while the steaming water safety mechanism requires a double press and hold of the button which automatically shuts off the water once released.

It couldn't be easier to change the filter. There is no need to cut off the water supply, just twist the used filter to release it - this automatically isolates the water supply making it easy to twist the new cartridge into place.

So, Here's The Technical Bit...

Diagram below shows Fosso 4in1 steaming hot water tap.

FOSSO 4IN1

FOS/4IN1/SS - Stainless Steel FOS/4IN1/GM - Gunmetal FOS/4IN1/BS - Black Steel FOS/4IN1/CO - Copper FOS/4IN1/GD - Gold

GENERAL FEATURES

- Made from solid Stainless Steel
- Metallic PVD coating for coloured taps
- Supplies fresh cold water, filtered cold water, regular hot water and filtered 98°C steaming water.
- WRAS approved
- Includes touch control pressurised boiler
- Water conditioning technology providing exceptional accuracy for scale and acidity control for increased boiler protection, plus increased food and beverage quality.
- 3.5Ltr tank, up to 120 cups per hour
- Temperature range of boiler 25°C - 98°C
- Single lever valve for normal hot and cold

TAP FEATURES

- Minimum 0.5 bar pressure required
- Safety mechanism for steaming water control
- Electronic button control for 98° steaming + filtered water
- Cool touch spout
- Separate flow for steaming water

OPTIONAL EXTRAS

- PURIT3 Replacement filter
 - FILTERMETER Digital water capacity meter
- Available to buy online caple.co.uk

DIMENSIONS

- 4 x 35mm worktop cut out required

3in1 Steaming Hot Water Taps.

3in1 taps supply fresh cold water, regular hot water and filtered 98°C steaming water, the perfect temperature for preparing tea, blanching vegetables and assisting the cooking of pasta or rice.

PROGRESSIVE VALVE

Control your Joya 3in1 tap with a simple rotating motion. The water flow starts cold and gradually gets warmer.

The more you turn the control, the hotter the temperature whilst the water flow gradually increases.

PROGRESSIVE
VALVE EXPLAINED

All caple accessories are available to buy online at caple.co.uk

So, Here's The Technical Bit...

The cold water from your water supply passes through the filter into the 3.5L boiler. The water temperature can be easily adjusted from 25°C - 98°C to suit your requirements by simply adjusting the controls located at the front of the boiler.

A safety feature is added for steaming hot water on all 3in1 taps although the child safety mechanism differs for each model.

For the Joya 3in1 taps there is a button on the back of the steaming water handle which when pressed allows you to turn the handle. For the Vapos 3in1 taps, use the smaller lever on the left hand side of the tap, then turn and hold to start a steady flow of steaming water. When you are finished, the unique spring loaded lever automatically shuts off the steaming water.

It couldn't be easier to change the filter. There is no need to cut off the water supply, just twist the used filter to release it - this automatically isolates the water supply making it easy to twist the new cartridge into place.

All Caple accessories, including replacement filters and fixing kits, are available to buy at caple.co.uk for next day delivery.

Puriti Taps.

FANCY PURIFIED, FILTERED COLD WATER ON TAP?

Choose a Caple Puriti tap to deliver regular hot and cold water with the added benefit of fresh filtered water. It is either dispensed using a third lever or sometimes fully integrated into the standard design.

An ingenious filtration system is hidden from sight in the kitchen unit, and by turning the filtration tap, your normal cold water supply is diverted via the Caple filter to the tap and in to your glass. It is also great for areas with particularly hard water. By using the filtered water in kettles and cooking you greatly reduce the damaging impact of lime-scale build up in appliances and reduce the effect of water impurities during food preparation, whilst also improving tea and coffee.

HOW IT WORKS

As the filter tap is turned the normal cold water supply is redirected through a series of filtration processes including activated carbon. This removes almost all chlorine improving the taste, and other impurities such as particulates, bacteria, rust, heavy metals and pesticides, while also acting as a scale inhibitor. It also helps maintain the pH balance of the water, which is much healthier than consuming overly acidic or alkaline normal tap water.

WHY IT'S GOOD

Caple Puriti filter can last up to 4 x longer compared to other filtration systems on the market. Puriti filters up to 6000 litres compared to only 300 - 1500 litres.

The Caple Puriti filter is discreetly installed under the sink. It will be easily accessible for changing which will need to be done about every six months. This is a very straight-forward process that does not require any tools.

Replacement filters and fixing kits are available to buy online at caple.co.uk

Pull-Out + Spray Taps.

PULL OUT TAPS

With technology taken from professional kitchens, pull out taps work on the same principle as a single lever tap design with the standard hot and cold functions. A pull-out tap has a long flexible hose that can be pulled out allowing you to move the tap freely around the sink.

SPRAY TAPS

With spray taps, the secret is in the nozzle. By pressing the button on the side of the spray head the nozzle produces a high-pressured shower like spray or jet of water versus the normal flow from a tap. The powerful spray makes it so much easier to wash and rinse items. Used in most professional kitchens worldwide, it's a must-have for accomplished chefs.

PULL OUT SPRAY TAPS

Some taps really have it all, when they combine both pull out and spray features and offer the option of normal flow or a pressured spray along with the flexibility to reach every corner of the sink!

Single Control Taps.

ENDLESS CHOICE

With Caple's single control taps you can be sure that the engineering that goes in to one of our taps is second to none. Smooth gliding operation, robust seals and a solid finish. So now all you have to do is decide which style and finish is best for you. With various finishes in so many designs from the classic to the contemporary, it maybe harder task than you think.

SINGLE LEVER SIMPLICITY

Everything controlled by a single lever
- move it left and right for temperature, or up and down for pressure.

PROGRESSIVE VALVE

Control your tap with a simple rotating motion. The water flow starts cold and gradually gets warmer. The more you turn the control, the hotter the temperature whilst the water flow gradually increases.

NOLITO

NOL/SS - Stainless Steel

Stainless
STEEL

GENERAL FEATURES

Bridge Taps.

Bridge taps have a Victorian inspired design characterised by a bridge-like structure connecting the separate hot and cold water inlets. Previously, the design and styling of bridge taps has made them a popular choice for traditional kitchens, with our popular Putney and Knightsbridge models. However, our newest bridge taps, Ember and Kora offer an ultra-contemporary twist on the classic bridge taps design.

With a single, central spout and an integrated cold-to-hot water connection, you're in complete control. Easily adjust and achieve the perfect water temperature for your needs. Experience the beauty of balance with bridge taps – where form meets function.

EMBER BRIDGE

MAKE A STATEMENT WITH THE NEW EMBER BRIDGE TAP!

With its diamond-knurled accents and on-trend Matt Black finish, the new Ember Bridge tap will add a touch of modern design.

But that's not all - Its cog-style handles and accessories come in 3 colours, Copper, Gold and Black to complement any kitchen style.

Plus, with its bridge design, this tap offers unbeatable form and functionality.

Dual Control.

CLASSIC, COOL AND CONTEMPORARY

Classic does not mean old fashioned. For many of us dual control taps are a matter of personal preference. Hot on the left, cold on the right. It's as simple as that.

But even with the classic dual control, designs vary. There is the monobloc design or bridge design. Choose ceramic handles to match your ceramic sink. Sleek solid Stainless Steel – a premium material and very contemporary. Chrome - bright and reflective. Brushed Nickel – subtle and blemish free. Pewter. Distinctive with a traditional twist. All meticulously designed and beautifully engineered.

Whichever you choose you can be sure that they all have one thing in common Caple's uncompromising quality.
