RE: Dealer Manual Updates

Dear HydraLine Dealer:

CW Mill recently engineered an inline pump mounting kit for the 2011-13 Ford 6.2 liter gas engine. Testing has proven that this configuration will transfer the horse power that the Hydra Bed system requires. This will give you an additional option in addition to the FMK484-8 that requires the replacement of the water pump. So attached are (2) updated Hydra Bed application sheets for insertion in your HydraLine Dealer Manual. This shows the addition of the FMK484-6 kit to pages 21 & 26.

Sincerely,

Heath Ploeger
