

INTEGRATED REEL TRANSPORT FLATBED

REDUCES LABOR & IMPROVES FUNCTIONALITY

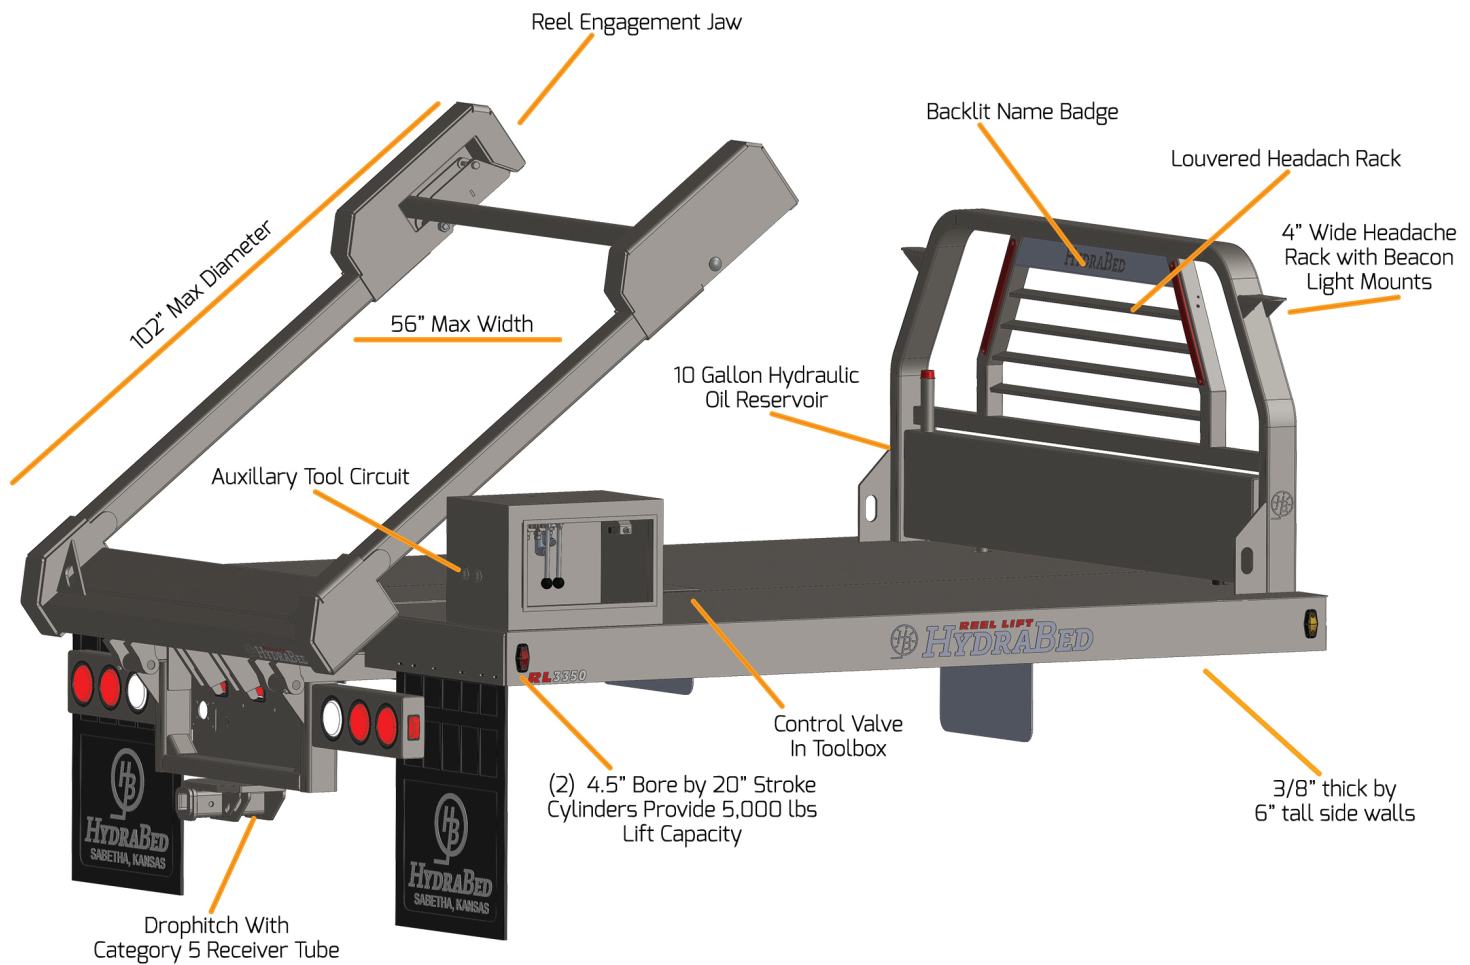

**REDUCE TRIPS TO
THE JOBSITE**

**SAFELY & QUICKLY
SECURE & LOAD REELS
WITH ONE OPERATOR**

**MAXIMIZE WORK
FORCE EFFICIENCY**

"This piece of equipment has helped us be more efficient at all types of jobsites. In crowded metro environments by being able to haul a reel of cable or duct on the truck bed, we can eliminate another trailer... The hydraulic tool circuit can run any of our dual line hydraulic tools and we can run a fiber optic cable blower from the tool circuit, too. Being able to lay the arms flat on the deck when we are not transporting reels allows us to haul more materials and equipment, similar to a flatbed... We recommend the Hydra Bed Utility Series to anyone serious about getting the work done on time."

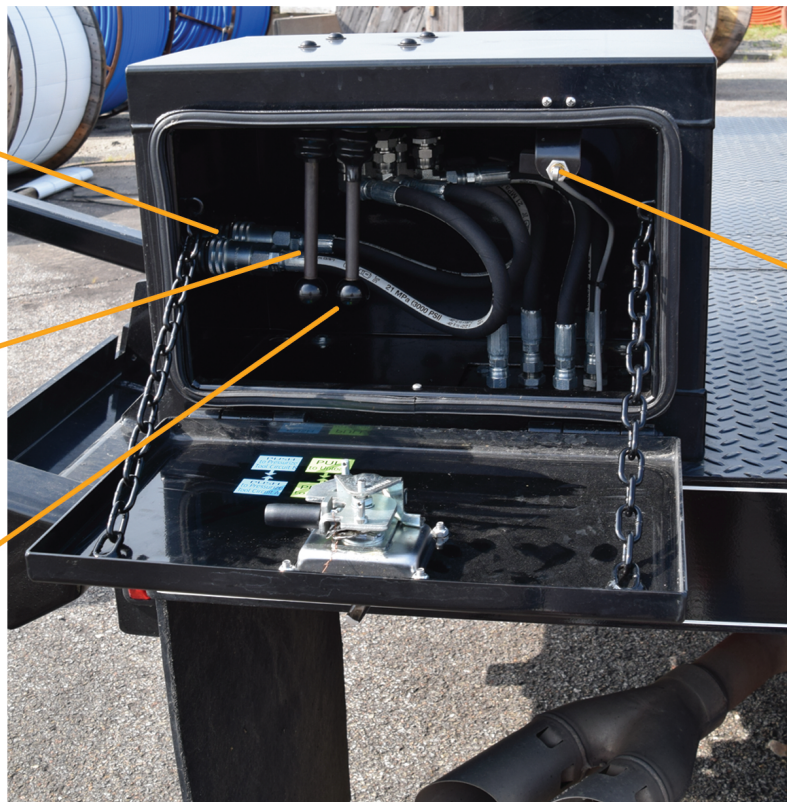

Jay Fischer, Equipment Asset Manager
MP Nexlevel, LLC | Maple Lake, Minnesota

TOOL CIRCUIT
Utilize the under hood hydraulic system to power tools requiring 4.5 to 11 GPM at 2200 psi

TOOL CIRCUIT CONTROL LEVER
Equipped with a detent so valve lever can be locked in position for constant hydraulic flow

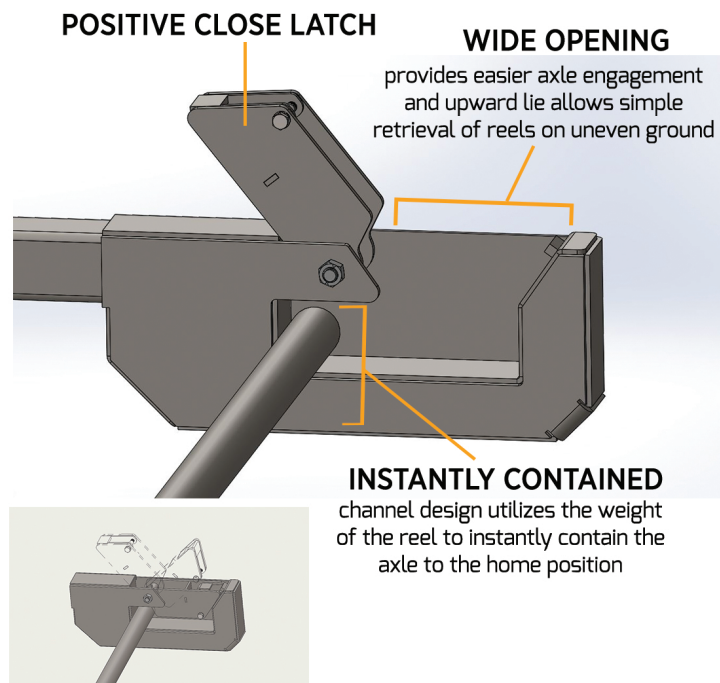

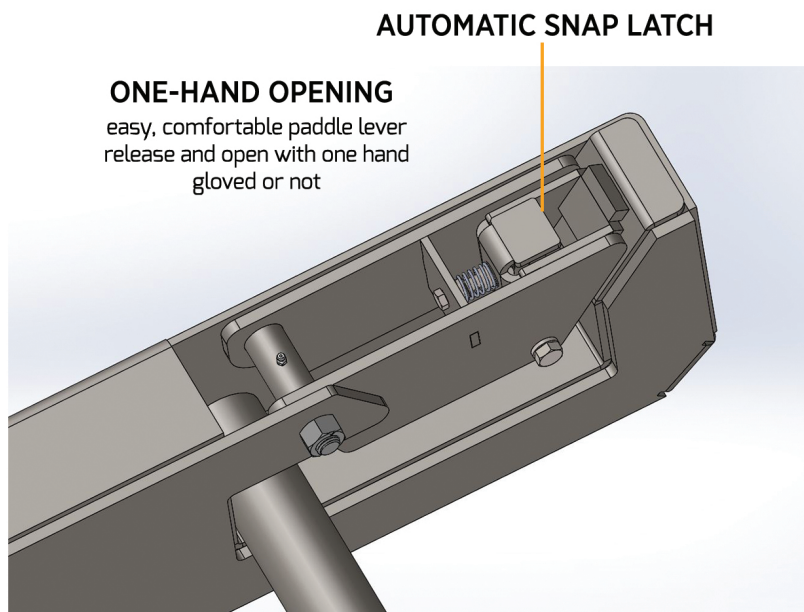

LOAD/UNLOAD
Fully proportional direct acting valve providing maximum safety and valve control

POWER ON/OFF SWITCH
Under hood hydraulic system is turned on when the lid is opened and shut off when the lid closes

REEL LIFT **HYDRABED®**

USAGE DETAILS

REDUCES LABOR & IMPROVES FUNCTIONALITY

**REEL LIFT HYDRABED CAN
ACCOMMODATE TOOL BOXES ON OR
UNDER THE DECK.**

**JOBSITE REEL PAYOUT AND
MATERIAL ENGAGEMENT IS SAFE
AND EFFICIENT.**

**ONE OPERATOR CAN EASILY, QUICKLY
AND SAFELY LOAD AND TRANSPORT
CONDUIT OR CABLE WITHOUT THE
NEED TO PULL A REEL TRAILER.**

**THE OPEN DECK ALLOWS
TRANSPORT OF OTHER MATERIAL
AND EQUIPMENT.**

"Our guys absolutely love this set up! We can load a reel with one person and load more products like pedestals, handholes, marker posts and anything else we want behind the cab and in front of the reel. We can pull other equipment to the jobsite, such as Mini Excavators, Vacuum Excavators, HDD equipment, or bring more reels on a single, double or triple reel trailer. The hydraulic tool circuit also comes in handy when we need it to run pumps, saws, tampers and other equipment."

Warren Sunderland, President
