Bale Beds

[Home](#) » [Specialty Beds](#) » [Bale Beds](#)

The new squeezer bale bed uses some new and different ideas. We have inverted the lift cylinder so it pushes the bale up instead of pulling it up.

This gives almost twice the power from a single cylinder. All heavy duty construction, low maintenance and easy to grease hinges. A trap door just ahead of the goose neck hitch that pushes up to roll the front bale back for the squeezer to reach for unloading the second bale. Squeezer arms lay flush with bed to leave the bed floor flat when not in use.

Beds are sand blasted, painted with epoxy primer and urethane paint for years of durability and good looks. Eight different sizes to choose from. Straight side and tapered front. Several tool box options and two year warranty on structure. One year warranty on hydraulics and wiring.

Squeezer Bale Bed

Hay is needed all over the country and to transport it you need something that will load it quick. The Squeezer Bale Bed is new and has all the luxuries of a Cadillac. Remote lift makes life easy. The front is tapered so the second bale will slide down for easy reach. Recessed goose hitch ...
