Skid Steer Hydraulic Post Hole Digger

The time-saving 924HC Hydraulic Post Hole Digger offers easy reach and access to difficult areas. Features include exceptional up-front visibility and control, and the ability to apply down pressure for productivity in difficult conditions. A large selection of augers is available, with hardened alloy steel teeth for tough digging. Reversible rotation permits quick backout when unusual obstructions are encountered. Without leaving the seat, operators can dig hundreds of holes for fence posts, utility poles, sign posts, trees and shrubs, foundation footings and other applications with this hydraulic post hole digger attachment.
