PEACE OF MIND IS WORTH A LOT

In the working man's world you lead, follow, or get out of the way. Getting the most for your money can mean the difference between just getting by or getting ahead. J&I solves these problems! J&I's truck beds have been proven workers for over three decades now.

If you are going to hay cattle, pull a rig, or just headed to the store J&I truck beds are there.

Here at J&I we go beyond the cookie cutter truck beds by changing with the time. With the needs of our customers constantly changing we continually update truck bed makes and models.

Truck beds are only a small part of what J&I has to offer. Visit our main website for a complete line of farm and ranch, metal building supplies, and trailers. From ornamental fencing to trailer parts we truly are your one stop shop!

Imitation is the sincerest form of flattery and we thank the competition for making J&I beds number one!

*Knowledgeable sales
staff and customer
service*

The standard NS Rack has the "Ears" to hold material with larger gussets for superior strength

The rounded racks follow the curves of the cab without the "dimples" as seen on competitors

We put stock in our gooseneck boxes with built in safety chain holders and our drop hitches feature optional receiver hitches and safety chain holders

J&I paint will stick with you where as powder coat is subject to chipping and rust pockets and cannot be touched up.

We can custom build beds to cater to your needs.

We make the bed match the truck or application-No "cookie cutter" beds

**YOUR IMAGINATION IS
OUR ONLY BOUNDARY!**
