## Coatings Reduction Chart

Product: VLX18462-01 3.5 Gray Ultra Primer

Blended Viscosity: 25-30" #2 Zahn Recommended Reducer: MEK or MAK

| <u>Date</u> | Lot Number | Paint Temp | Checked Viscosity | Additions / Type & Amount | Reduced Viscosity |
|-------------|------------|------------|-------------------|---------------------------|-------------------|
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
|             |            |            |                   |                           |                   |
