

Triple C Waste Paint & Primer Disposal

11/16/2011

XLV18462-01 Gray Ultra R/I Primer R/V. The dry primer can be disposed of in the garbage as long as it is 100% dry. (For Future Reference When Cleaning) Wear a half face respirator with N95 cartridges because the primer contains Crystalline Silica.

IC-9626 Gloss Black Acrylic Enamel L/F. The dry paint and filters can be disposed of in the garbage as long as it is 100% dry. (For Future Reference When Cleaning) No special PPE is needed for clean up.

You can place the dry paint, primer, and filters in the garbage. If the solvents were still liquid then we would have to dispose of them through the use of a hazardous or non-waste removal service.

If you have any other questions please let me know. If you would like copies of the MSDS sheets I can fax them.
