

## TAKING CARE OF YOUR NEW TATTOO

A professional tattoo artist has done your new tattoo. It is up to you to keep it clean to prevent any issues. Just follow a few simple steps. If you have any questions or concerns about your new tattoo please call or e-mail us immediately.

1. Leave the bandage on between 2 & 4 hours.
2. Wash your hands, and then remove the bandage. Wash your tattoo thoroughly with hot soapy water & pat it dry with a clean paper towel.
3. Apply a topical fragrance free lotion to your new tattoo.
4. **DO NOT** use Neosporin, Aquaphor, A&D Ointment, or Vaseline.
5. A scab will start to form & flake within 4-7 days. **DO NOT** pick at the scab, if it itches apply lotion and rub it in.
6. Keep your new healing tattoo out of the sun(i.e. Tanning Beds)
7. **DO NOT** soak your new tattoo in water(i.e. bathtubs, hot tubs, pools, oceans, etc.)
8. **DO NOT** listen to any **"FREE ADVICE"** about your new tattoo(especially in a bar)
9. Consult the tattoo artist or a qualified health care professional at the first sign of abnormal inflammation/swelling or possible infection.
