Veteran-led fabrication for complex materials and shutdown work

Agapex Group is a Melbourne-based metal fabrication and welding business, veteran owned and operated, backed by four decades of combined industry experience. While the company is new, the team's capability is proven across shipbuilding, power generation, oil and gas and industrial

shutdown environments. Agapex specialises in multi-material fabrication and on-site delivery, supported by drafting and design, rigging and QA/QC documentation. Safety is non-negotiable, with disciplined planning and execution so teams go home safely and projects stay on schedule.

MULTI-MATERIAL EXPERTISE, ONE ACCOUNTABLE PARTNER

From stainless and carbon steel through to duplex, super duplex and specialised alloys, Agapex supports demanding scopes in-house, reducing handovers and simplifying delivery for project teams.

SAFE DELIVERY AND CONSISTENT QUALITY, EVERY TIME

Agapex brings experienced supervision and a proactive safety culture to every job. Clients get clear communication, controlled risk and work completed to specification, without cutting corners.

One team for complex fabrication, multiple materials and quality outcomes delivered without delays.

WHY CHOOSE US

Complex materials, critical environments, a team you can rely on

Agapex is built for clients who value certainty, quality and consistent delivery. Our team brings decades of fabrication and welding experience across Australia and overseas, including high pressure and high consequence environments.

We work across a broad range of materials and deliver quality outcomes through efficient planning and disciplined execution.

The result is fewer handovers, clearer communication and dependable delivery from start to finish.

MULTI MATERIAL CAPABILITY, DELIVERED BY ONE TEAM

We weld and fabricate across stainless steel, carbon steel, aluminium, titanium, duplex and exotic alloys, plus copper, brass and nickel based materials. That breadth lets you engage one team for complex scopes, supporting smooth coordination, clear accountability and consistent delivery across the full job.

DECADES OF PROVEN EXPERIENCE BEHIND EVERY WELD

Our welders and fabricators bring 15 to 20 years of experience each, including shipbuilding, power plants and oil and gas. You get capability built on real project delivery in demanding conditions, with the discipline, attention to detail and workmanship that quality focused environments require.

EFFICIENT TURNAROUND

We deliver with efficiency because industrial timelines matter and coordination needs to stay tight. Clients come back to us because they get quality workmanship and a solution delivered on time. We plan carefully, communicate clearly and execute with discipline so delivery stays smooth from mobilisation through to handover.

DIRECT COMMUNICATION AND FULL ACCOUNTABILITY

We built Agapex to deliver a higher standard of workmanship and a professional, disciplined experience on every job. Our veteran team brings a structured approach on site and in the workshop. You get clear communication, aligned leadership and a team that takes ownership of outcomes.

When the work is critical, Agapex delivers reliable outcomes with efficiency, backed by deep multi material capability.

End-to-end fabrication for complex industrial projects

Agapex delivers welding, fabrication, installation support and technical drafting for industrial projects where quality, speed and material capability matter. From shutdown maintenance to custom builds, modular skids and high-alloy work, each job is backed by decades of hands-on experience across demanding environments.

With a team that can work across a broad range of metals, projects move faster, coordination stays simpler, and outcomes remain consistent.

*Multi-material expertise
and efficient delivery for
complex fabrication.*

SHUTDOWN MAINTENANCE AND ON-SITE WELDING SUPPORT

On-site welding, repairs and maintenance fabrication support shutdown schedules without compromising quality. Fast response and reliable delivery help reduce downtime, protect production targets, and keep crews focused.

MULTI-MATERIAL AND SPECIALTY ALLOY WELDING

Multi-material welding covers stainless, carbon steel, duplex grades, titanium and other non-standard alloys. Fewer subcontractors are needed, handovers reduce, and complex scope can be delivered through one capable team.

WORKSHOP FABRICATION AND BUILD TO SPEC

Workshop fabrication is carried out to specification, including structural steel and pressure pipework. Controlled fabrication conditions improve consistency, speed up delivery, and help ensure components fit first time.

DRAFTING AND DESIGN (3D MODELLING, FABRICATION DRAWINGS)

3D modelling, drafting and fabrication drawings support accurate builds and smoother approvals. Clear documentation reduces rework, improves communication across stakeholders and provides clear record drawings that reflect what was installed.

SKIDS AND MODULAR PACKAGES (FABRICATION AND ASSEMBLY)

Skids, modular packages and assemblies are fabricated and prepared for efficient installation. Modular delivery reduces site complexity, simplifies coordination, and supports smoother commissioning for project teams.

RIGGING AND INSTALLATION (INCLUDING MECHANICAL INSTALLATIONS)

Rigging and installation support helps take components from workshop to site with fewer delays. Mechanical installations and safe handling practices keep scope moving and reduce interface risk.

Proven fabrication support across critical applications

Agapex Group supports industrial operators and project teams with fabrication, welding and shutdown delivery where capability and reliability matter. With deep hands-on experience across complex materials and high-risk environments, scope is completed efficiently without compromising quality.

That means fewer handovers, stronger confidence in the outcome and a partner that understands what it takes to perform when timelines are tight.

Complex materials expertise supporting critical operations in demanding environments.

OIL AND GAS

Complex materials and strict standards are familiar territory. High-alloy welding and fabrication experience supports critical assets, planned upgrades and shutdown works, with a focus on quality that protects reliability and reduces rework.

POWER GENERATION

Pressure pipework, structural steel and on-site repair support helps keep essential systems operating. Fast response during outages and shutdowns reduces downtime, keeps schedules on track and supports safe, compliant outcomes.

SHIPBUILDING AND MARINE

Marine environments demand precision and material expertise. Experience gained through shipbuilding supports fabrication and welding work where corrosion resistance, fit-up accuracy and consistent workmanship matter to long-term performance.

INDUSTRIAL MAINTENANCE AND SHUTDOWNS

Shutdown windows are short and delays are expensive. On-site welding and maintenance fabrication support helps isolate issues quickly, complete work efficiently and return assets to service with confidence in the finish.

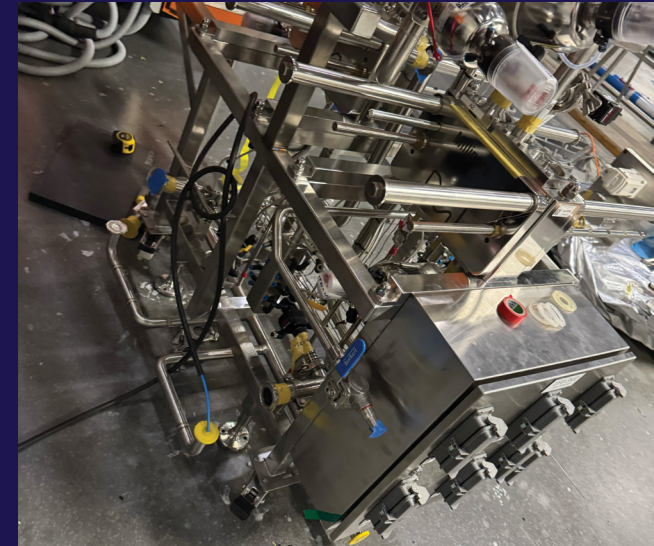

Multi-material capability. High standards. Reliable delivery.

Agapex is a metal fabrication and welding team built on decades of hands-on experience across demanding industrial environments. While the business is new, our capability is not: our team brings deep multi-material expertise, strong QA/QC discipline, and a practical, solutions-first approach that helps clients keep projects moving.

From workshop fabrication through to shutdown support and on-site installation, we deliver work that is safe, compliant, and built to spec.

EXPERTISE AT A GLANCE

Multi-material welding • workshop fabrication • shutdown support
skids and packages • drafting and design • rigging and installation

Relevant project experience

The following examples reflect projects our team members have contributed to across previous roles. They demonstrate the environments, standards, and project types Agapex is equipped to support.

INDUSTRIAL AND ADVANCED MANUFACTURING

Samsung (Semi-Conductor)
South Korea

CSL Behring (Factory new build & upgrades)
Victoria

CSL Seqirus (Factory new build)
Victoria

Ego Pharmaceuticals (Line upgrade)
Victoria

EDUCATION AND RESEARCH

Monash University
(World Mosquito Lab)
Victoria

FOOD AND BEVERAGE MANUFACTURING

Treasury Wine Estates
(Penfold-Wolf Blass expansion)
South Australia

Remedy Drinks
(Factory expansion)
Victoria

La Casa Del Formaggio
(Factory new build)
South Australia

Mondelez International
(Cadbury line upgrades)
Victoria

INFRASTRUCTURE, UTILITIES, AND RESOURCES

Australian Royal Air Force
(Jet fueling station upgrade)
South Australia

OI-Glass
(Furnace upgrade)
Victoria

Beach Energy
(Gas wellhead)
South Australia

DSME
(Ship building)
South Korea

SAFETY, QUALITY AND ENVIRONMENT

Quality workmanship backed by a culture of safety

Agapex is built for high consequence work where safety and quality cannot be left to chance. Our team brings decades of hands-on experience across complex industrial environments and applies strong supervision, hazard reporting and immediate corrective action on every job. The result is reliable workmanship, controlled risk and efficient delivery, without compromising the standard of finish.

COMMUNITY ENGAGEMENT

Veteran-led business with practical community impact

Agapex is a veteran-owned and operated business that believes strong communities are built through steady employment, genuine relationships and giving back where it matters. Alongside supporting local industry through our workshop and on-site capability, we contribute to community initiatives through faith-based outreach, including support for Australian Indigenous communities and missionary teams delivering assistance in Cambodia.
