Have you noticed that conversations are becoming harder to follow or that people seem to be mumbling? Join us for an informative and engaging presentation on presbycusis (age-related hearing loss). Learn why our hearing changes as we age, how hearing loss can affect communication and everyday life, and what options are available to help you hear your best.

The presentation will conclude with an interactive Q&A session, giving you the opportunity to ask questions and get expert advice from an audiologist.

Come learn how better hearing can help you stay connected, confident, and engaged!
