

# JM<sup>®</sup> Insulating Firebrick Series

## Product Data Sheet

### Product Description

The JM Insulating Firebrick (IFB) series are industry leaders in applications such as Petrochemicals, Metals, Ceramics, and Glass, where the ability to operate in environments with a classification temperature up to 1650°C (3000°F) is critical.

JM IFB series are manufactured from high-purity refractory clays, with graduated additions of alumina for the higher temperature products and a carefully graded organic filler, which burns out during manufacture to give a uniform, controlled pore structure.

Each grade is formulated to meet specific thermal and physical requirements and are machined to precise tolerances on all six faces.

Our IFB range - JM, K, and TJM - delivers big energy savings for many markets, and our global manufacturing footprint enables Morgan to meet your regional and global application demands.

A comprehensive range of mortars are also available to suit the different grades of brick.

### Features

- Low thermal conductivity
- Low heat storage
- High purity, consistent raw materials
- Low iron and alkali flux content gives high refractoriness under load in operating conditions
- High hot compressive strength
- Tight dimensional tolerances
- Large bricks or slabs and special shapes available
- Purpose-designed packaging protects bricks in transit and facilitates on-site handling

### Applications

- Aluminium anode bake furnaces, primary electrolytic cells, holding and melting furnaces and secondary remelt furnaces
- Petrochemical heaters, flues, refining vessels and reactor chambers
- Iron and steel industry, hot blast furnace stoves, hot blast main and bustle pipe, heat treatment and galvanizing furnaces
- Metals, heat treatment and atmosphere furnaces
- Ceramic industry, including kilns for domestic and laboratory use
- Glass industry
- Hot Face and Backup insulation in industrial furnaces

# JM<sup>®</sup> Insulating Firebrick Series

## Product Data Sheet

Properties	JM23	JM26	JM26HD	JM28	JM30	JM30HA
ISO 2245 Classification	125 0.5L	140 0.8L	-	150 0.9L	160 1.0L	-
Classification Temperature, °C (°F)	1260 (2300)	1430 (2600)	1400 (2600)	1540 (2800)	1650 (3000)	1650 (3000)
Brick markings	23	26	26-HD	28	30	30 HA
