# Outsourcing Architects to the Philippines

A Smarter Way to Scale Your Architecture Team Without Compromising Quality

![ADDMORE SERVICES — Architectural, Engineering, and Construction — Professional and Technical Offshore Outsourcing]

Executive Summary

Architectural firms today face increasing pressure to deliver more, faster, and with fewer resources. Rising design demands, a shortage of skilled professionals, and tight project timelines have become the norm across the industry. Many firms find themselves at a breaking point struggling to balance quality, cost, and capacity.

Outsourcing architectural support to the Philippines offers a practical, strategic solution. Professionals from the Philippines bring strong technical expertise, excellent communication skills, and a deep understanding of global standards. With the right partner, you gain reliable architectural support without sacrificing quality or control.

ADDMORE Services LLC helps you access top architectural talent through flexible and scalable models. Whether you need help during peak periods or want to build a remote division, we provide the structure, oversight, and talent to make it work.

Why the Philippines for Architectural Support

The Philippines has become one of the most trusted sources of offshore architectural talent. Here is why leading firms continue to invest in Filipino professionals:

↗ Skilled and Accredited Talent

The country produces over 3,000 architecture graduates annually from CHED-accredited programs. Many are licensed and trained in international standards.

↗ Time Zone Advantage

With a 12–15 hour time difference from North America, overnight turnaround becomes a real operational advantage.

↗ English Proficiency

The Philippines ranks among the top 20 countries in the EF English Proficiency Index, making collaboration seamless and reducing the risk of miscommunication.

↗ Advanced Software Proficiency

Filipino architects are fluent in industry-standard software including AutoCAD, Revit, ArchiCAD, SketchUp, and Lumion.

↗ Cultural Compatibility and Professionalism

Filipino professionals are known for their strong work ethic, accountability, and adaptability to Western work styles.

These advantages allow your firm to increase output while maintaining quality and reducing costs.

The Real Challenges You Are Up Against

Architecture firms today are stretched thin. You are juggling multiple deadlines, managing client expectations, and trying to keep your team from burning out. But the reality is:

You have skilled architects working overtime just to keep up with drafting.

Important projects get delayed because you are short on hands during peak seasons.

Hiring locally is **expensive**, especially for tasks that can be done more **efficiently** elsewhere.

You are forced to say no to new projects because you simply do not have the capacity.

Bottlenecks in documentation are slowing down your entire pipeline.

This is not sustainable. Offshore architectural support from the Philippines is not just a stopgap. lit is a smart, scalable way to eliminate these pressure points and get your firm back on track.

What Architectural Tasks You Can Outsource

The Philippines is ideal for a wide range of architectural services. Our clients typically outsource:

2D CAD Drafting and Detailing:
Accurate, fast, and consistent documentation for construction and design teams.

3D BIM Modeling and Coordination:
Using Revit and Navisworks to produce detailed models.

3D Visualizations and Renderings:
High-quality visuals for presentations, marketing, and client approval.

Design Development Support:
Assisting with schematic design and concept iterations.

Construction Documents and Permit Sets:
Ensuring accurate deliverables for submittals.

Redline and As-Built Revisions:
Making timely updates based on field markups and project changes.

These deliverables are produced with speed and consistency, allowing your team to focus on creative and client-facing work.

Our Solutions for Architecture Firms

At ADDMORE Services LLC, we offer two delivery models tailored for architectural firms:

On-Demand Project-Specific Outsourcing Services

✅ Best for short-term needs, on-demand project-specific outsourcing support, or unexpected work overflow. We step in when your team needs backup, providing skilled architectural professionals who can deliver on time with minimal ramp-up.

ADDMORE or Client Managed Offshore Professional Talent

✅ Ideal for firms looking to build a long-term, remote extension of their team. Through our Professional Offshore Division (POD) model, we assemble dedicated teams that operate under your direction, with our leadership and quality control in place. We handle the logistics, infrastructure, and oversight so you can focus on results.

What Overnight Support Really Looks Like

It is 6:00 PM. Your local team submits markups and change requests. By the time they log in the next morning, your offshore architect in the Philippines has already sent back updated drawings, ready for approval.

This model has helped firms:

40%

Accelerate project timelines by up to 40%

Reduce internal workload and stress

60%

Save up to 60% compared to local staffing

Reclaim valuable time for design, strategy, and client relationships

Why ADDMORE?

With over 40 years of combined AEC industry experience, ADDMORE understands the pressures you face. We are not a general outsourcing agency. We specialize in architectural, engineering, and construction support. We know what quality looks like, and we deliver it.

AEC Expertise

We speak your language and understand your workflows.

Flexible Engagement

Start with a small task or build a full POD. We adapt to your needs.

Built-In Oversight

Every engagement includes our project coordination and quality assurance.

Transparent Pricing

No hidden fees, just clear, upfront costs.

Ready to Scale?

Outsourcing architectural services to the Philippines is not just about filling gaps. It is about building smarter, more sustainable operations. Whether you need temporary support or a long-term offshore team, ADDMORE makes it easy to scale with confidence.
