

SCALABLE DRAFTING SUPPORT FOR A JOINERY MANUFACTURER

ADDMORE CASE STUDY

(702) 751-3916, ext. 3916

addmoreservices.com

CLIENT OVERVIEW

The client is a well-established joinery manufacturing company known for producing high-quality custom woodwork for both residential and commercial construction projects. With a large-scale production facility and a reputation for precision craftsmanship, the company services a wide range of contractors, architects, and developers.

Their operations are highly dynamic, often experiencing significant fluctuations in workload depending on project timelines and seasonal demand. To maintain their competitive edge, the client relies heavily on accurate and timely shop drawings to guide factory production and ensure seamless project execution.

CHALLENGES FACED

The client faced several operational challenges:

Inconsistent workload volumes made it difficult to maintain a drafting team that could handle peak periods without being underutilized during slower times.

During high-demand phases, the in-house drafting team was stretched thin, leading to potential delays in producing shop drawings critical to factory operations.

The client needed a flexible and scalable solution that could integrate seamlessly with their internal processes and maintain the high standards required for production.

ADDMORE'S SOLUTION

To address these challenges, ADDMORE Services provided a customized professional talent solution:

Deployed a team of experienced CAD drafters with specific expertise in joinery and architectural detailing.

Offered flexible engagement terms, allowing the client to scale resources up or down based on project needs.

Fostered a collaborative working relationship, enabling the ADDMORE team to gain a deep understanding of the client's workflows, standards, and factory requirements over time.

This approach ensured that the client could maintain consistent output quality while adapting to changing project demands.

IMPLEMENTATION HIGHLIGHTS

The client faced several operational challenges:

Rapid onboarding of drafters during a critical production period, minimizing disruption to ongoing projects.

The ADDMORE team used industry-standard CAD tools and followed the client's documentation protocols to ensure compatibility and accuracy.

Over time, the partnership evolved into a highly efficient collaboration, with the ADDMORE team anticipating needs and proactively contributing to process improvements.

RESULTS AND IMPACT

The client was able to manage workload peaks without overburdening their internal team or compromising delivery timelines.

Improved efficiency in producing shop drawings led to smoother factory operations and better alignment with project schedules.

As the ADDMORE team became more familiar with the client's operations, the collaboration resulted in ongoing productivity gains and reduced onboarding time for new projects.

The client gained a trusted external partner who could be relied on for consistent, high-quality drafting support.

CLIENT TESTIMONIAL

"ADDMORE Services have given us the ability to manage the peaks and troughs of our business. The flexible resource was essential for us to produce joinery shop drawings for the factory in a period where our 'in house' team was not large enough to cope with the demand. The more we worked with ADDMORE, the more they understood how we operated and the demands of our huge factory. Over time, we were able to benefit from the efficiencies gained by the ADDMORE Team knowing us better and better."
