

At Squeaky, we're on a mission to create a better web for everyone, offering an **innovative web analytics suite** that's designed to help you **understand how visitors are using your website or web app, without invading their privacy**.

#### THE PROBLEM:

# Legacy analytics tools are going dark

Growing consumer awareness around privacy, coupled with regulations like GDPR and CCPA, mean that existing analytics tools are often missing up to 67% of their usage data, or used illegally.

This deprives businesses of vital information they need when trying to understand their customers and improve their websites.

#### **OUR SOLUTION:**

We've created an analytics tool that captures all the missing data, by putting user privacy first.

Incredible features, 100% of the data:

- Session recordings
- Heatmaps
- Analytics
- Event tracking
- Journey mapping
- **<u>Quality</u>** Customer feedback

#### <u>Privacy measures</u> that make it work:

- ⊕ Privacy-first by default
- 100% cookieless
- No IP tracking
- Client-side anonymisation

#### WHY SQUEAKY WILL WORK FOR YOUR BUSINESS:

# Putting data and privacy first will give you a competitive edge

# 56%

of websites are using analytics tooling to better understand their visitors. By offering you amazing, privacy-friendly analytics we can make that 100%.

# 2/3

website traffic can be missed by the cookie-based and invasive analytics tools your competitors are using. We've solved that with cookieless analytics.

# 8/10

of web professionals we surveyed felt that their current tools were missing key data, so we're plugging those gaps by offering truly comprehensive data capture and analysis.

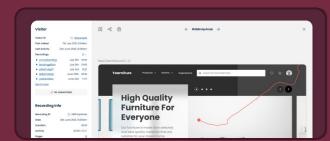

# 93%

of the customers we surveyed said that Squeaky was helping them to **improve the user experience** of their website each month.

## 84%

of our customers say gathering direct <u>user</u> <u>feedback</u> linked to <u>sessions recordings</u> is helping them to improve their customer support.

## **OUR CORE FEATURES:**

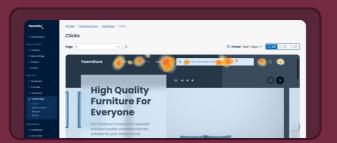

## **Session Recording**

See what your customers see.

### <u>Customer Feedback</u>

Listen to your customers.

## **Heatmaps**

Understand which content matters.

### <u>User Journey Mapping</u>

Visualise your customer journey.

# <u>Analytics</u> & <u>Event Tracking</u>

Let data drive your decisions.

# Private by design

Putting people and privacy first.
