Photography and Filming Children Policy

At Family Tree Day Nursery we wish to share and celebrate our children's achievements, including images of activities, experiences and opportunities they enjoy when in our care. Photographs and videos help us document children's learning, communicate with families and, where appropriate, promote our setting through our website, social media channels and other publications.

This policy should be read in conjunction with the following policies and procedures:

- Access, storage and retention of records policy
- Critical incident policy
- General data protection regulation (GDPR) privacy notice
- Mobile phone and electronic device use policy
- Online safety policy
- Safeguarding children and child protection policy
- Social networking policy
- Supervision of visitors policy.

The safety and wellbeing of every child is our highest priority. This policy explains how we take, use, store and share images of children safely, lawfully and respectfully.

The purpose of this policy is to:

- Protect babies and children, specifically those where photographs and videos may be taken
- Set out the overarching principles that guide our approach to photographs/videos being taken of babies and children
- Ensure that we operate in line with our values and within the law when creating, using and sharing images of babies and children.

We have a responsibility to promote the welfare of all babies and children through taking, sharing and using images of children safely so that they do not inadvertently experience abuse through:

- Images being misused out of context or modified using AI, for example to create child abuse images
- A child being identified for the purpose of future grooming and abuse
- A vulnerable child being identified by an existing perpetrator of abuse
- A child or family being located or targeted, such as for identity theft or impersonation.

We recognise that:

- Sharing photographs and films of our activities can help us celebrate the successes and achievements of our children, provide a record of our activities and raise awareness of our nursery.
- There are potential risks associated with sharing images of children online and the welfare of the children attending our setting is paramount
- Children and their parents have a right to decide whether their images are taken and how these may be used, regardless of age, disability, gender reassignment, race, religion or belief, sex or sexual orientation
- Consent to take images of children is only meaningful when children and their parents understand how the images will be used and stored and are fully aware of the potential risks associated with the use and distribution of these images.

We will seek to keep our babies and children safe by:

- Asking parents to sign a permission form, supplying written consent to use children's images, such as for learning journeys on the Tapestry App, weekly parents newsletters, the nursery website or social media platforms.
- Clearly explaining how images will be used, stored and shared, including informing parents that once an image has been published online, it may not be possible to remove it if consent is later withdrawn
- Not naming the children whose images are being used in our published material
- Never publishing personal information about individual children and disguising any identifying information (for example, our setting name, uniform or logo)
- Reducing the risk of images being copied and used inappropriately by:
 - Only using images of children in appropriate clothing, including no nursery branded clothing
 - Avoiding full face and body shots of children; where close-ups are used, we aim to use images that capture children side on
 - Using images that capture an activity from a distance, or exclude the child's face by capturing images of their engagement in the activity, e.g. just their hands
 - Using images that positively reflect children's involvement in the activity, experience or event and avoid images that may be prone to misinterpretation or misuse
 - Where children/s faces are visible we will reduce the resolution of images to limit the potential for them to be repurposed
 - Regularly reviewing the photo and video content on our website and social media platforms to assess if they meet the guidelines; where necessary, replace images of children with more generic visuals or illustrations
- Following our reporting procedures if we become aware of the abuse or misuse of images of our children.

Photography and/or filming for personal use:

- We do not allow parents to take any pictures or videos while in the nursery

- We do allow parents to take photographs at nursery events, such as Christmas performances, school leavers' party and summer sports day.
- We will share guidance about image sharing before the start of an event where parents or spectators are taking photographs or filming at our events. We clearly state that any and all images/videos are for personal use ONLY, such as festive celebrations or graduation ceremonies.
- We will stipulate that photos/videos taken during the event are not to be shared on social media
- If parents share photographs or images of their own children from the event, remind parents that there should be no clear identifying information (such as uniform or logo) and no other child must be present (unless permission from other parents is gained prior to sharing photographs and videos that include their child)
- Reminding parents to check the privacy settings of their social media account to understand who else will be able to view any images they share
- Reminding parents to talk to the designated safeguarding lead (DSL), Seife, if they have any concerns about images being shared.

Photography and/or filming for setting use:

- Staff must only take images or videos using the setting's own devices, as per the Mobile phone and electronic device use policy
 - We do not hire external photographers for special events.
 - Photographs for graduation photos are taken using a digital camera with no internet connection capabilities.

We will store photographs and videos of children securely, in accordance with our safeguarding policy and data protection law.
