SAT DATA®

INNOVATIVE CONNECTIVITY

Satellite and 5G, in one portable unit

SatData combines Starlink satellite networks and 5G technology in a portable mobile product. For organisations that depend on uninterrupted data connections.

Patented design
All SatData models are patented. SatData Radome: patent pending.

Starlink | 5G | Battery pack | Bonding

We keep you connected, worldwide.

HYBRID CONNECTIVITY

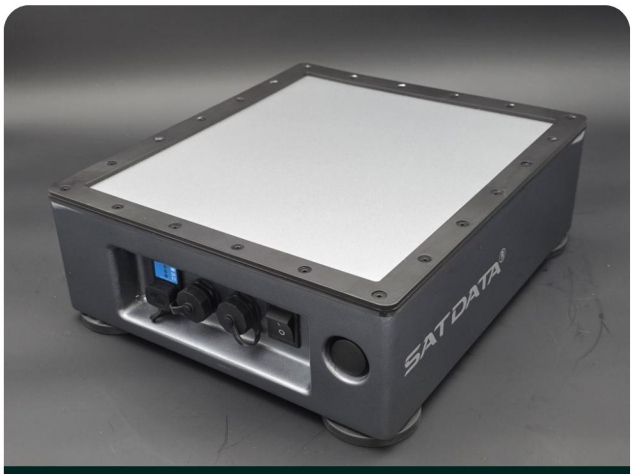

The best of both worlds

Starlink's global satellite coverage, with high speeds and low latency. Combined with a robust, fast 5G connection for urban and well-covered areas.

Starlink satellite
Global coverage, high speed and low latency.

4G/5G mobile
Fast and robust in cities and well-covered areas.

Battery pack
Works where there is no stable power supply.

One SatData unit
Satellite, 4G/5G and power together in one rugged unit. Your team works over WiFi, without interruptions.

400+ Mbit/s
download speeds for business users

30 sec.
switch on, wait a moment and you are online

On the move
use in motion included in all subscriptions

REMOTE LOCATIONS

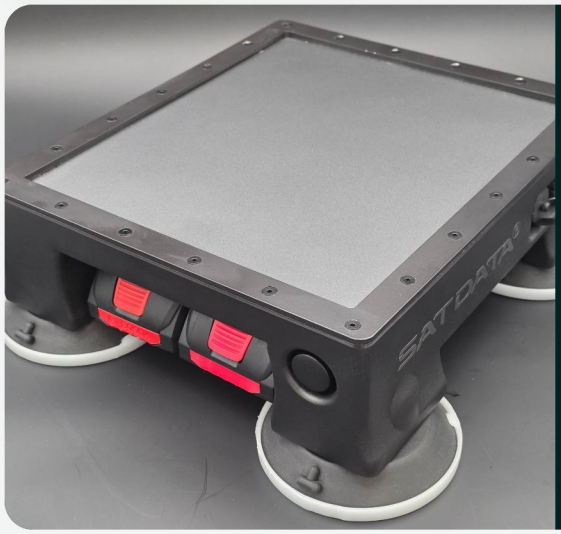

Far beyond the network

Working in remote locations, such as drilling platforms or construction sites, where traditional networks fall short.

IN THE CITY

Backup when the network fails

A backup solution in urban environments. SatData delivers a seamless, uninterrupted experience.

PORTABLE AND RELIABLE

Always powered, always connected

A powerful battery pack provides portability and flexibility. Ideal in areas without a stable power supply and for mobile teams that are constantly on the move. You stay connected, even in extreme conditions.

APPLICATIONS ACROSS MULTIPLE SECTORS

Where SatData makes the difference

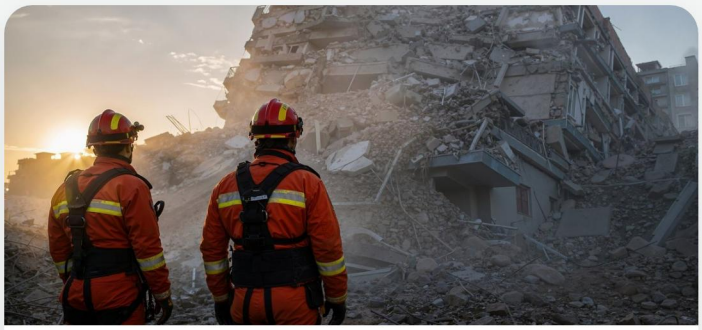

The combination of satellite, 5G and a battery pack makes SatData especially valuable for these sectors.

DEFENCE AND SECURITY

Defence and security

Command vehicles, mobile CPs, drones and sensor networks.

EMERGENCY SERVICES AND GOVERNMENT

Emergency services and government

Fire departments, police, rescue services, mobile command centres and crisis locations.

CONSTRUCTION AND INFRASTRUCTURE

Construction and mobile machinery

Construction sites, cranes, pile drivers, bridge construction and remote installations.

MARITIME

Maritime and yachts

Workboats, ports, yacht building and offshore support near the coast.

EVENTS

Events and temporary locations

Festivals, TV productions, sporting events and emergency locations where high bandwidth is needed quickly.

DRONES

Drones and unmanned systems

UAS for inspection, safety, defence and BVLOS flights.

CONFIGURED TO CUSTOMER SPECIFICATIONS

Every SatData unit, tailor-made

The models in our range provide the foundation. We assemble and configure each unit to meet your requirements, technical specifications and application.

Satellite
Starlink satellite communications for global coverage.

4G/5G
Multi-network mobile internet, also as backup.

Bonding
Via Peplink SpeedFusion, Teltonika WANplex or Celerway.

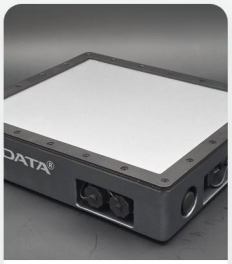

Power supply
Built-in battery, LiFePO4 or swappable Bosch ProCORE batteries.

Brand-independent
Teltonika, Peplink, Celerway or Cradlepoint/Ericsson. Or your own router.

Zero Trust
A Zero Trust SIM by Zscaler or Stacuity.

Not a standard solution, but a SatData unit tailored to your application.

THE FOUNDATION: SIX MODELS

PortLink

Core

Nexus

Fusion

SecureLink

Vanguard
