SAT DATA®

MOBILE SATELLITE INTERNET & 5G FOR BUSINESS

Seamless connectivity, wherever you are

Patented, portable solutions that combine satellite, 5G and 4G into one fast and reliable connection.

Satellite | 5G | 4G | Bonding

We keep you connected, worldwide.

YOUR CHALLENGE, OUR SOLUTION

Always online, even beyond standard coverage

Remote locations, unstable networks or unexpected outages: for organisations that need to stay connected at all times, SatData combines satellite internet with 5G and 4G. No interruptions, no compromises.

400+ Mbit/s
download speeds for business users

30 sec.
switch on, wait a moment and you are online

On the move
use in motion included in all subscriptions

Mobile and portable
Take it along in a vehicle, case or backpack and set up a secure internet point within minutes.

Unique patented design
Ultra-flat and rugged: the straight design was developed from real-world experience.

Bonding
Satellite, 5G, 4G and fixed lines combined into one fast, stable data stream.

Multi-WAN & static IPv4
A static public IPv4 address for VPN, remote management and critical applications.

Independent power supply
Integrated LiFePO4 batteries or swappable Bosch ProCORE batteries.

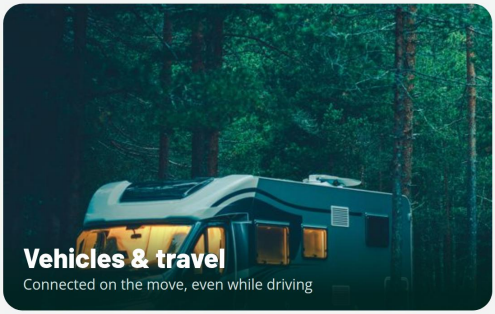

Business-critical
Ideal for video calls, cloud applications, cameras, telemetry and live streaming.

Fully autonomous operation
The connection stays available, even without mains power or infrastructure.

CONNECTIVITY WHERE YOU NEED IT

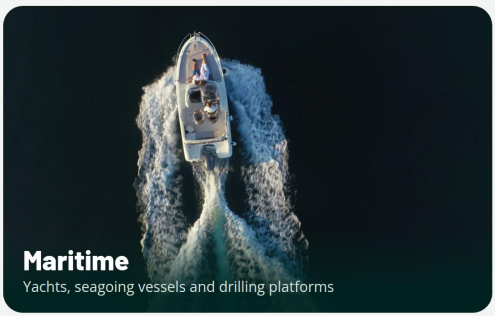

On the road, on site, on the water

Vehicles & travel
Connected on the move, even while driving

Business
Primary and back-up connectivity at your premises

Maritime
Yachts, seagoing vessels and drilling platforms

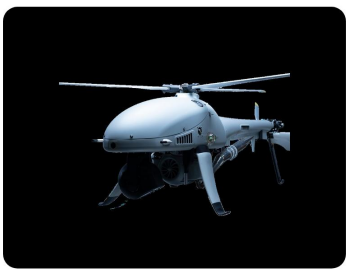

Public safety
Connectivity where it matters in crisis situations

LIVE ON TELEVISION

Connected with SatData

René Lunshof Producties relies on SatData for live broadcasts, including for RTL Nieuws. In live television, every second counts, and so does a connection you can trust.

HIGH EYE · DRONES

Connected in the air and on the ground

SatData provides the connectivity for both High Eye's drones and its ground station: commands, telemetry and payload data, even beyond visual line of sight.

SATDATA MODELS

Choose the version that suits you

Six models with one foundation: Starlink satellite internet and LTE/5G in a rugged, portable unit.

COMPACT AND COMPLETE

SatData PortLink

Starlink Mini, LTE/5G multi-network and WiFi, with a built-in 10 Ah battery.

LTE/5G · WiFi · 10 Ah

ROUTER OF YOUR CHOICE

SatData Core

Starlink Mini with a Teltonika or Peplink router and swappable Bosch ProCORE batteries.

Teltonika · Peplink · ProCORE

LONG WITHOUT POWER

SatData Nexus

Starlink Mini and LTE/5G with a 10 or 20 Ah LiFePO4 battery. Bonding as an option.

10 or 20 Ah · Bonding option

BONDING AS STANDARD

SatData Fusion

Starlink and LTE/5G bonded into one connection, with a Peplink or Teltonika router.

Bonding · Peplink · Teltonika

HIGH SECURITY

SatData SecureLink

Encrypted LTE/5G with Zero Trust by Zscaler or Stacuity, with Starlink Mini or Performance.

Zero Trust · Encrypted

HARSH CONDITIONS

SatData VanGuard

Water- and dustproof to IP67 and IP69K and can be hosed down, with a router of your choice.

IP67 · IP69K

Which version suits you?

We are happy to advise you. Each model has its own brochure.
