

TRANSFORMER REPAIR

Lakeport Power offers in-house transformer and switchgear testing, repair, and refurbishing services from our facility in Colborne, ON. For over 20 years, utilities and contractors have relied on us for fast turn-around and affordable re-certification of their inventory. In today's new market, the demand for transformation has never been greater.

Specifications or voltage changed? We will buy these units from you.

Contact your Lakeport representative today to learn more about how we can turn otherwise stranded assets into certified units safe for re-deployment.
