

Medical Assisted Recovery

First off our policy supports a wholepatient approach, where medication is used alongside counseling and behavioral therapies. Brighter Paths accepts MAT/MAR residents.

All medications must come in with a valid prescription. We store all medications in a safe locked location away from all other residents in which the house manager will self-administer and be witnessed by the house manager. The resident then places closed medication back into safe for next dose. This is followed with weekly counts initialed by resident and house manager . we follow with random drug screening.
