

Embryo #3
Euploid
Male

The **overall score** taking into account **all** the **diseases** included

	Risk	Avg Risk	Ratio	Risk Percentile
Asthma	8.0%	5.0%	1.6x	90
Atrial Fibrillation	41%	30%	1.4x	88
Basal Cell Carcinoma	26%	26%	1.0x	56
Coronary Artery Disease	36%	43%	0.82x	23
Inflammatory Bowel Disease	1.4%	1.2%	1.2x	72
Malignant Melanoma	2.6%	2.6%	0.99x	52
Prostate Cancer	14%	14%	1.0x	57
Schizophrenia	1.0%	1.3%	0.76x	45
Testicular Cancer	0.54%	0.52%	1.0x	64
Type 1 Diabetes	0.57%	0.70%	0.82x	42
Type 2 Diabetes	14%	31%	0.45x	1

Full list of individual diseases depends on sex and ancestry

The risk percentile is a number between 0 and 100 that shows the embryo's risk of a specific disease compared to the general population

Risk percentage for this particular embryo for this particular disease

Lifetime risk percentage for the general population

The ratio between the embryo risk and general population risk
