ENGINEERING

SCADA Services

At Seifert Engineering, we specialize in best-in-class SCADA system integration, offering seamless automation solutions that enhance productivity and operational efficiency.

Our expertise in custom control panel design, PLC and HMI programming, and industrial network communication ensures that your systems are scalable and future-ready, while maintaining security and connectivity for all critical systems.

With real-time centralized data monitoring and control, you gain complete visibility over your industrial processes, reducing downtime and optimizing resource utilization.

Our team of certified and experienced engineers delivers end-to-end services tailored to diverse industry needs. We work with all major control system brands and platforms, providing vendor-agnostic solutions to provide significant value. SCADA systems are designed to grow with your business and adapt to new technologies. System retrofits, upgrades and modernization have been proven to improve performance while reducing costs by lowering maintenance expenses and increasing energy efficiency.

Partnering with Seifert Engineering means leveraging cutting-edge technologies for smarter and more efficient operations. Our proven experience, innovative solutions and commitment to excellence will help your business be more productive.

SCADA/HMI Platforms Include:

- VTScada
- GE Digital Proficy iFIX
- Wonderware
- Rockwell Automation Factory Talk View SE/ME
- MapleSystems

PLC Platforms Include:

- Rockwell Automation/Allen Bradley
- Wago
- Automation Direct
- Keyence

Industries Served

- Manufacturing & Industrial Automation
- Water and Wastewater Treatment
- Food & Beverage Processing
- Many More!
