CONNECTING SOLIS WI-FI DONGLE

STEP 1:

- Make sure you have the details of your home Wi-Fi network (name and password).
- Your Wi-Fi router should operate on 2.4GHz frequency.
- Position your phone close to the inverter (within 1-2 meters)

STEP 2:

- Turn **OFF** your Mobile Data.
  (**iPhone**: Go to Settings → Mobile → Mobile Data → Off)
  (**Android**: Go to Settings → Connections → Data Usage → Mobile Data → Off)

STEP 3:

- **Forget** your home Wi-Fi connection (make sure you record your password before completing this step)
 (Go to **Settings**→ **Wi-Fi**→ Click on ⓘ or ⚙ → Click on **Forget**)

STEP 4: The Wi-Fi inverter dongle will show up as a Wi-Fi network (Solis_5A12*********)
in your available Wi-Fi List. The number after Solis will be same as the Serial Number of
your Wi-Fi dongle. See example below for **iPhone** (left) and **Samsung** (right).

*Connect to Solis_5A12**********
Password: 123456789*

NOTE: *The number shown here is just an example, you will have a different number that will be same as your Wi-Fi dongle Serial Number (Solis_5A12*************).*

*Once connected it should say "No Internet Connection" or "Unsecured Network".*

The Wifi signal name may **be D_5A12XXXXXXX**

STEP 5: Open your internet browser e.g. **Safari** or **Chrome** and type the IP address **10.10.100.254** on the search bar. Then press **Go/Search**. See example below for **iPhone** (left) and **Samsung** (right).

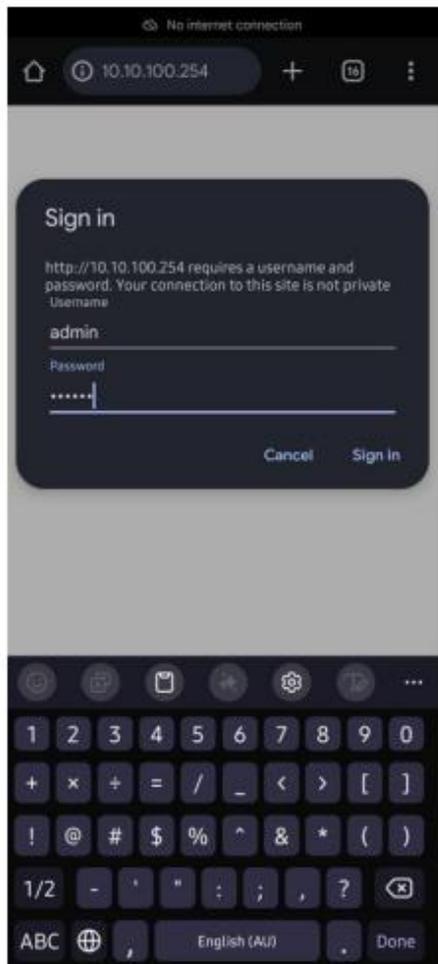

For the first time login, please **Select** and **Enter New Password** (for example: **Solis1**).

Once you enter a **New Password**, system will ask you to **re-login**.

STEP 6: You should get a screen prompt asking for **Username** and **Password**.

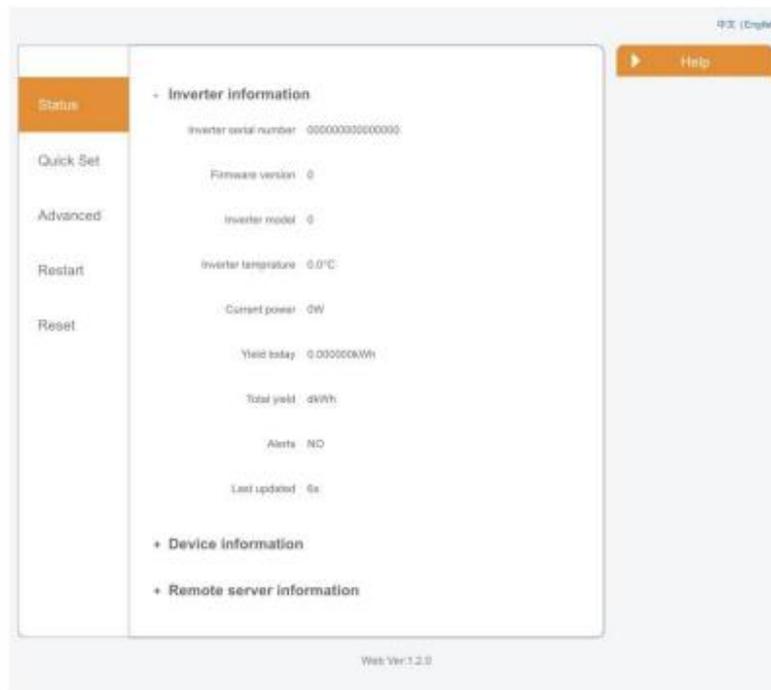

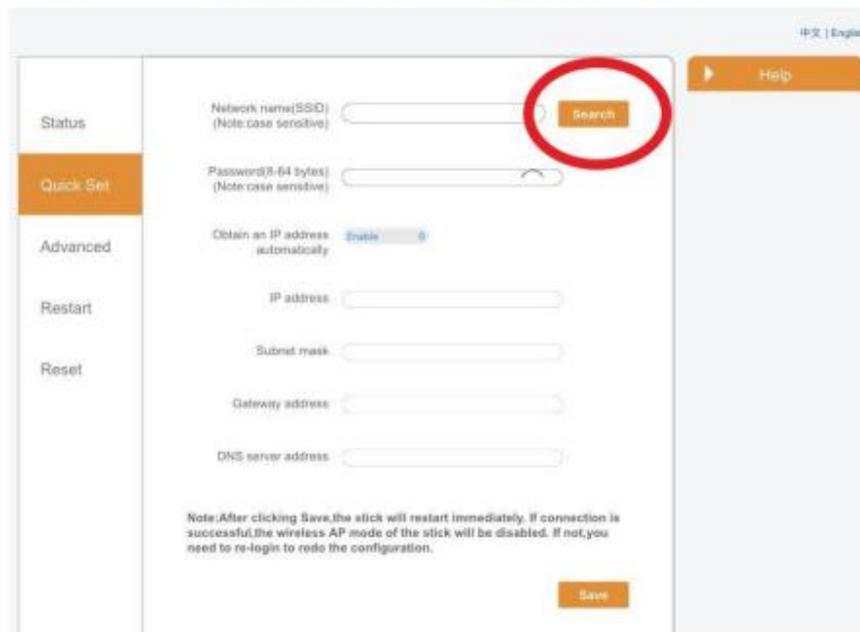

Username: *admin*

Password entered in step 5: *Solis1*

Then Press Sign in.

STEP 7: You will see a screen as shown below. From the top left corner, press **Quick Set** (second option).

STEP 8: Then Press "**Search**" button and look for your house Wi-Fi.

STEP 9: **Select your Wi-Fi name** and ensure that the **RSSI** (signal strength) is more than 30%. Anything below 30% is not recommended.

Click **OK** once you have selected your network.

STEP 10: Enter your home Wi-Fi's password. To verify, **click Eye Symbol** to see the password and then click **Save**. Do not fill up any other fields.

STEP 11: Once you see the message below, you can open your SolisCloud app and check your Datalogger Status.

Status	Note:
Quick Set	It takes about 10s for the monitoring stick to connect to the network. If the green LED on the stick turns solid,it means the setup was successful.
Advanced	If the green LED keeps flashing,and the AP is still available,please get_by_idnect to the stick and redo the setup. Make sure you enter the correct Wi-Fi password.
Restart	For more assistance and troubleshooting,please see the installation manual or Dealer Support website.
Reset	

'ALL DONE'

NOTE: If setup is completed & there is no update in SolisCloud after 5 minutes. Please double check the **Wi-Fi password**, reset the dongle, and repeat all steps again.
