

CONDOR

senses awakened by water

We did not invent wellness...

However, for the past 25 years, we have been leading the charge in advancing bathtub technology and water therapy, tailoring our innovations to meet the unique needs of consumers and seamlessly integrate into modern spaces, both within and beyond the confines of the bathroom. Our endeavors have redefined the very essence of the bathtub, elevating its purpose to promote wellness, relaxation, and beauty.

The exquisite beauty embodied by the flower of life pattern boasts an illustrious past, having been discovered in Assyrian artifacts housed in the renowned Louvre Museum and also featured in Leonardo da Vinci's Codex Atlanticus.

This geometry signifies fertility, creativity, and harmony, serving as a reminder today that water is not merely a chemical compound consisting of hydrogen and oxygen atoms, but also possesses a life-saving power that is essential to our existence. Consequently, the flower of life has become a significant symbol in the realms of balneotherapy and well-being.

What motivates us

The wellness

The joys of water through its movement and action. The benefits to body and mind from the holistic effect of bubbling water, air, and massages. The enchanted rituals of bathing that immerse us in other cultures through lights and scents. To feel good is to relax and free the mind from the constraints of the day. It is to be fully present in the moment and let the imagination flow. It is to surrender to water and emerge transformed with new perspectives...

The Communion with Nature

The resources of nature are not exhaustible, but they can be renewable. This is the case with water that moves, changes state, but never disappears. In the bath, it's some of these essential elements of nature (water, air, and energy) that we bring together for your well-being to imbue, transform and release in different forms.

Unique whirlpool bathtub made in France

Behind every Jetted bathtub made in France, there are men and women who work every day to advance a common project. They are attached to a territory that they bring to life through their involvement and expertise. They are committed to using resources efficiently, recycling materials, protecting the environment, and manufacturing a durable product.

WHIRLPOOL BATH

Choosing my Whirlpool bathtub

There are several things that can help you choose your whirlpool bath:

Considering the space available and the different possibilities for installing the bathtub.

Choose the model and size.

Think about the best moments of your balneotherapy, thalassotherapy, spa experiences... to transpose them to your new bathroom..

Dedicate time to your Balneo session: short sessions of less than twenty minutes or longer.

Choose your favourite moment to take a bath. In the morning, in the evening, during the week, at the weekend or every day?

Select the Balneotherapy system that fits your bath. Is it a single or two person bath?

Choose your cladding and tap options according to your aesthetic choices.

The tailor-made Balneo by Soko*

Ergonomic rest position

Angled jets
« to the heart »

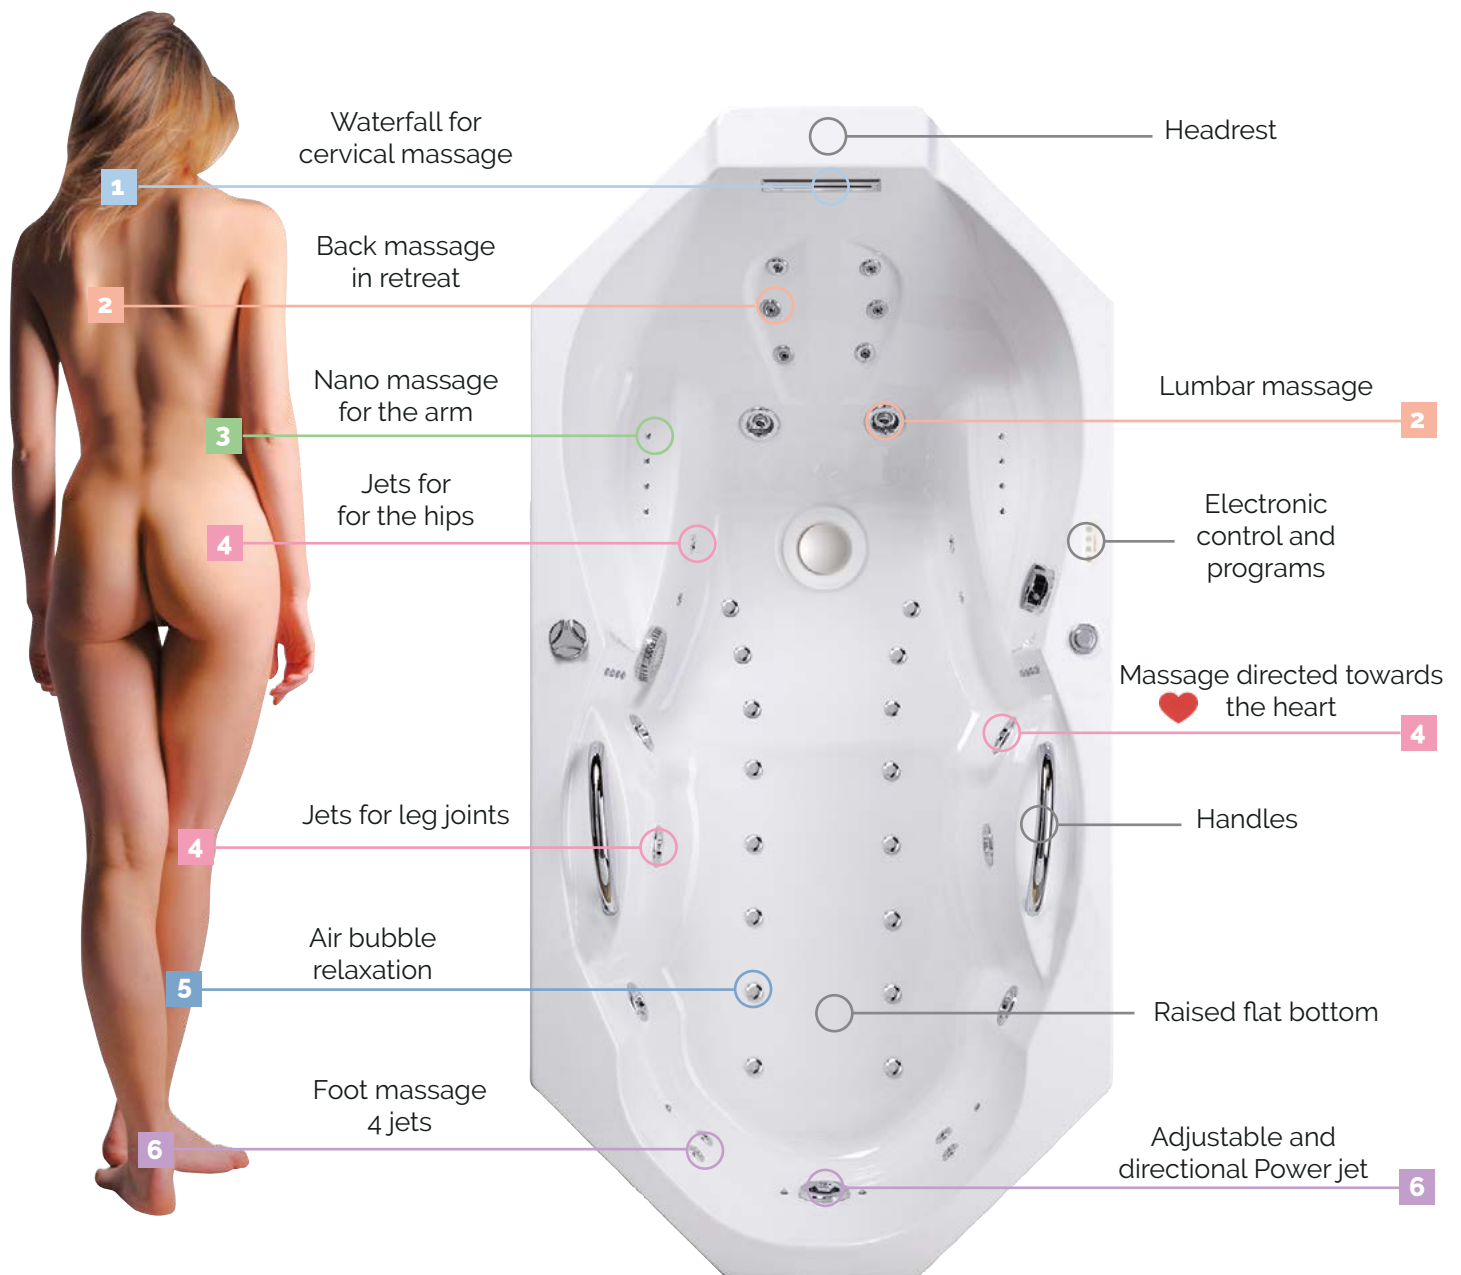

A complete device for the hips and legs.

It is composed of jets located along the leg. What makes them unique? The jets are angled at about 45° and directed from the bottom up towards the upper body.

* Upon quotation

2

1. Neck and Shoulder Massage

The soothing waterfall located just above your shoulders envelops you in warmth and effectively relaxes your neck, shoulders, and upper back.

2. Back Massage

Our spine is an area where tension often accumulates in our bodies. The Soko is designed to offer a complete massage from the upper to lower back, which can loosen knots, stimulate circulation, and deeply relax your muscles.

3. Arm and Forearm Massage

Whether you are an athlete or not, this massage can both relax and tone the tissues. The natural movement of the arm helps distribute the massage across the entire arm. The intensity can be adjusted with a 3-way valve that balances the power between the nano-jets and neck massage, if available.

4. Hip and Leg Massage

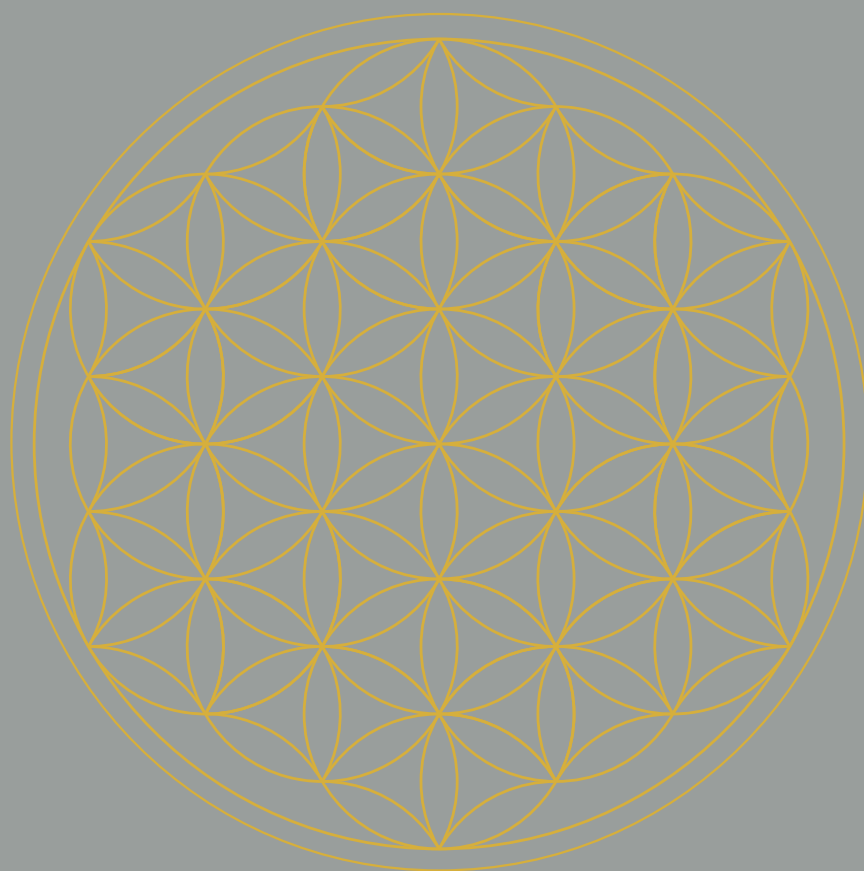

By increasing blood circulation and toning tissues, this massage can quickly relieve any feeling of heavy legs. It creates a water current that produces lymphatic drainage from the lower to upper body, complementing the ergonomic position that elevates your legs for a unique massage experience.

5. Benefits of Air

The air system consists of air blowers located at the bottom of the bathtub, arranged under the hips and legs. The injectors release pressurized air bubbles that rise to the surface, enveloping the body and creating a sensation of lightness and floating.

6. Foot Sole Massage

Those familiar with reflexology know that foot massage is essential, as it not only provides deep relaxation but also has positive effects on the entire body's organs.

BALNEOTHERAPY

The massage systems

A well-being that comes from afar

Hydrotherapy (or water therapy) is far from a recent innovation. The oldest civilizations used it: Egyptians, Greeks, Romans but also Native American and Japanese civilizations. This is evidenced by the many thermal baths, some of which still exist today. Religions, from India to the Middle East, have given water the sacred notion of salvation through purification.

In Europe, it was around 1850 that the Bavarian abbot Sebastian Kneipp rediscovered the virtues of bathing while trying to cure his tuberculosis. Gradually, bathing became part of his daily habits until his healing and beyond. He tested the temperature of the water and multiplied experiments and studies. He is the originator of spa treatments that were based on water jets and water temperature regulation:

39°C-40°C Hot water: helps reduce stress, relax muscles, and dilate blood vessels. It is recommended in the evening for better sleep.

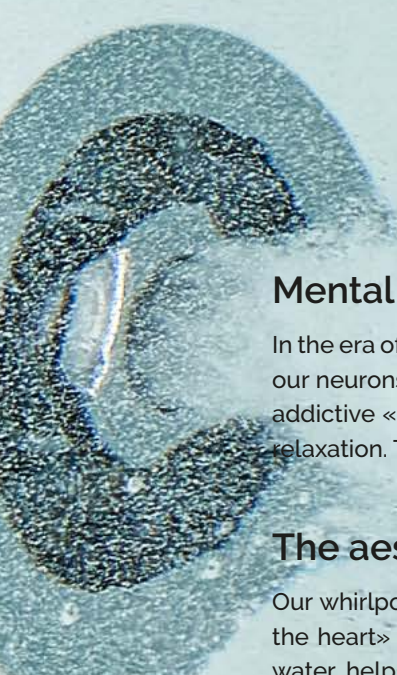

35°C-38°C This is body temperature: it promotes relaxation and allows sedation that opens the pores of the skin. It is recommended in the afternoon and evening.

27°C-30°C Warm water: reduces feelings of fatigue and tones the body and skin.

17°C-20°C Cold water: to be practiced after exercise, especially to cool the body and tone muscles.

2°C-8°C Icy water: to be practiced after warming up or sauna in the Scandinavian way. It helps strengthen the immune system overall, promotes good mood, and releases positive energies that fight stress and anxiety. Consult your doctor before any new experience.

The benefits of balneotherapy

Mental tranquility

In the era of social networks in which we live, our brain is constantly bombarded with information that keeps our neurons in a state of agitation. Taking a bath and getting a massage allows us to disconnect from this addictive «data» and the stress it conveys. Endorphins are released in the brain triggering a sensation of relaxation. The best system for that is In-Bride with Air-détente.

The aesthetics of the body and the epidermis

Our whirlpool systems are designed with strategically placed jets to promote blood circulation «towards the heart» and the lymphatic system. This stimulation by the water and air systems, combined with hot water, helps fight cellulite and promotes the drainage of adipose tissue. The Dermaclean system acts as a natural exfoliant on the layers of the epidermis and helps maintain clean, healthy skin that exudes vitality.

The ally of athletes

Balneotherapy is a complement to sports, and it is no coincidence that many high-level athletes have selected Condor bathtubs as a complement to their exercise routine. Balneotherapy allows muscles to be warmed up and prepared for exercise prior to physical activity, in addition to pre-workout warm-up sessions. After a workout, there's nothing more enjoyable than a cold bath that massages the muscles and invigorates the body. It helps alleviate muscle pain, firm the skin, and relax the joints. The Xtrem system is best suited for athletes as it allows for short and intense sessions.

Health and well-being

Every human being has their own sensitivity. Our balneotherapy systems are designed to touch each individual's senses in order to provide optimal comfort. Thus, music (preferably soft) combined with the sound of water and chromotherapy helps reduce tension and stress. Massages and different water temperatures act on the muscles and joints, promoting tissue drainage and offering a sensation of lightness. Vapors help clear the respiratory tract.

Air détente

As standard on the In-Bride 'air-détente' system, this bubble compressor allows for the diffusion of small bubbles in the water in a calm and serene manner. Combined with Chromotherapy and soft music, it provides unparalleled relaxation.

Air pulsé

The 'air-pulsé' system comes as standard on the Discreto and Forte systems, and is an option on the In-Bride system. This blower allows for the diffusion of powerful air from the bottom of the bathtub and increases the jet power on the Discreto and Forte system.

acoustic well-being

The goal of Condor is to continuously improve acoustic comfort during the bath. For this purpose, we have probably the most silent systems with the In-Bride system and unparalleled comfort for the other Balneotherapy systems

Anti-entrapment suction

If an object obstructs the suction cover from drawing water, its safety system allows it to draw in air instead and release the object.

Suction with stainer

The front face of the suction can be disassembled from inside the bathtub for stainer maintenance. Standard on In-Bride and Discreto systems.

Pipe drainage (Condor exclusive)

This feature is linked to the expertise and intrinsic quality of the product. The pipes between the water jets are hung to create a high point, allowing the water to drain out through the jets and reduce water retention.

Ozone generator (Condor exclusive)

Ozone, O₃, is active oxygen. It is a powerful and invisible treatment that purifies the bath water and attacks the majority of bacteria much faster than chemical products. When in contact with the skin at a low dose, it helps to regenerate and firm the skin. When in contact with air, ozone, which is naturally unstable, becomes biomolecular oxygen without leaving any traces

Total immersion

Condor offers a range of deep bathtubs (Utopia, Vanda 180, 190 and 200, Thun, Soko etc.) that allow for full soaking and envelopment in the water.

LED Chromotherapy

This is a chromotherapy system with LED lights that are controlled by an electronic keypad. The system comes with 8 LED lights as a standard feature. Custom orders are in multiples of 8.

Ref: 7425 at 591 points

Additional cost for 8 extra LEDs: 299 points

Built-in bluetooth speakers

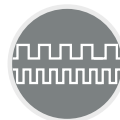

You can listen to your favorite music on your Smartphone (iPhone or Android). Keep listening to it while you bathe with the Bluetooth connectivity feature. Two speakers are placed on the exterior wall of the bathtub to transmit the sound through the wall for better quality.

Ref: 7446 at 876 points.

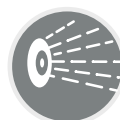

Anti-vibration pads

They are placed under the pump and blower to reduce vibrations and noise

Pulsed program

This is a program that turns on and off at a steady rhythm. Two programs can have the same pulse or a shifted pulse.

Power and massage

The common belief that there is a direct link between the power of motors and the effectiveness of massage is false. The effectiveness of massage depends on the flow rate of the jets, their arrangement, the quality and diameter of the pipes, as well as the installation as a whole. The only certainty is that a power that does not match the system leads to excessive electricity consumption, noise, and vibration.

Air Heater

Included in the In-Bride models with Air Pulsé, Forte, and Discreto, it allows the air to be warmed up before being propelled into the bathtub.

Water heater

This is a device that compensates for the drop in water temperature caused by the massage, by regulating the water temperature in the circuit. The basic power of the water heater is 1000 W.

Ref: 7507 at 690 pts.

Thorough Drying

This feature comes standard with the Forte and Discreto systems. It automatically activates about ten minutes after the bathwater has been drained. A stream of hot, ozone-enriched air blows through the entire plumbing system, effectively drying any remaining water. After a few minutes, the system shuts off and waits for the start of the next cycle.

Waterless Operation Safety:

When there is no water, the system cannot be started.

Turbo

The turbo massage is an enhanced massage that utilizes hot air from the turbine. This provides a more intense massage experience that complements the pre-programmed massage settings.

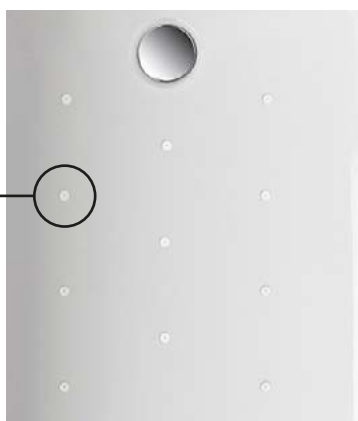

Venturi

This is a mechanical device that mixes air with water to increase the power of the jets. It is only available on the Xtrem and Piano system.

Discreto embodies the discreet charm of luxury. The quality of the massages is enhanced by the use of noble materials. The entire set of pieces and jets is crafted from solid brass, tinted to resist the effects of time and ultraviolet light. The massage experience is unisex, utilizing turbo water and air on the lateral jets and four hydrojets for the back. The air injectors on the bottom feature multiple diffusion for a truly indulgent massage. With automatic and complete drying included, Discreto is the epitome of relaxation and sophistication.

ADJUSTABLE AND DIRECTIONAL POWER JETS

The Xtrem system is a type of whirlpool that provides two independent configurations for highly effective back massages in a Balneo. Users have the option to use the systems separately or together, providing a range of massage options for maximum enjoyment. To vary the massages, the two back massages face each other, creating a spa-like experience or for couples to enjoy together.

To adjust the intensity of the back massage, the Power jets located on the side walls of the bathtub can be used to direct more or less water flow to each muscle group. Closing the Power jets can increase the pressure and boost the back massage on each side.

Dermaclean is a system dedicated to skin regeneration and relaxation. Its formula is based on a dual action through air inside the bathtub. The first action, patented as Microsilk®, the precursor to microbubbles, reduces air bubbles to the smallest size possible. The water becomes white and milky... the sign of the beginning of the bubble action that penetrates the pores of the skin and acts directly on hygiene and oxygenation.

The second system is a Balneotherapy system, to be activated before or after the first. The air is pulsed by 7-hole injectors located in the bottom of the bathtub. The air envelops the body and acts by levitation for optimal relaxation.

Dermaclean is 100% natural and hygienic. It does not require any particular maintenance.

MY BEAUTY AND
WELLNESS SOLUTION

Dermaclean

Oxygenation of the skin through MicroSilk® helps to regenerate cells in the epidermis

The MicroBubbles of MicroSilk® infuse the water with oxygen. Studies have shown that water with MicroSilk® contains over 13 mg of oxygen per liter, which is about 70% more than tap water. This oxygen facilitates intense hydration of the skin and cellular regeneration.

The MicroBubbles penetrate the pores of the skin and remove toxins and dead skin

MicroBubbles

Air bubble «pulsed air» from Balneo

Skin that can breathe is healthier and cleaner

Our skin is exposed to various environmental aggressions every day, such as pollution, dust, and cigarette smoke, just to name a few. The secretions generated by the skin and the natural renewal of cells can also cause pore blockages and reduce cellular respiration. This is where MicroBubbles come into play. With a bubble diameter of 50 microns, smaller than that of a hair, millions of MicroBubbles form a white cloud around the body. They penetrate the epidermis through the pores and release the skin from impurities, dead skin, and toxins. Therefore, MicroSilk® acts as a natural makeup remover, detoxifier, and exfoliant, purifying the entire surface of the body effortlessly and without any rubbing. It leaves the skin feeling soft and silky like that of a baby's skin!

MicroSilk is a natural and environmentally friendly method that does not leave any residue on the skin.

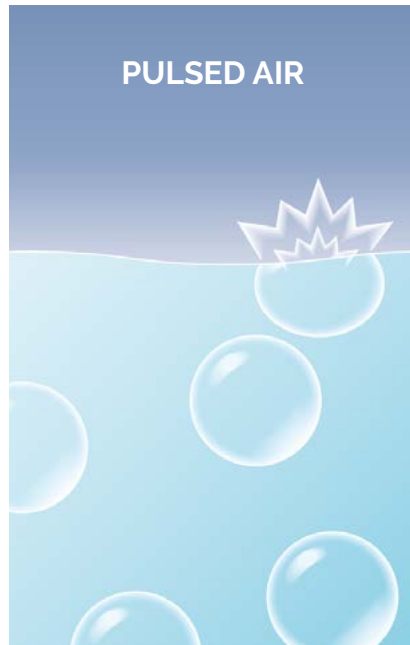

MicroSilk® is a 100% natural and eco-friendly process. It purifies the skin without the use of chemicals or soap, and without any discharge into the environment, relying solely on the power of water and air. When MicroBubbles are introduced into the bathtub, they create a white cloud in the water after a few minutes, and at the end of the bath, they disappear completely without leaving any trace. What's good for the environment is also good for you. No more cream stains on your clothes, sticky residue on your hands, or greasy, shiny skin. Say goodbye to disposing of expired tubes—your skin will simply be healthy, radiant, and able to breathe naturally.

MicroSilk[®] Improve Serotonin Levels and Enhance Well-Being

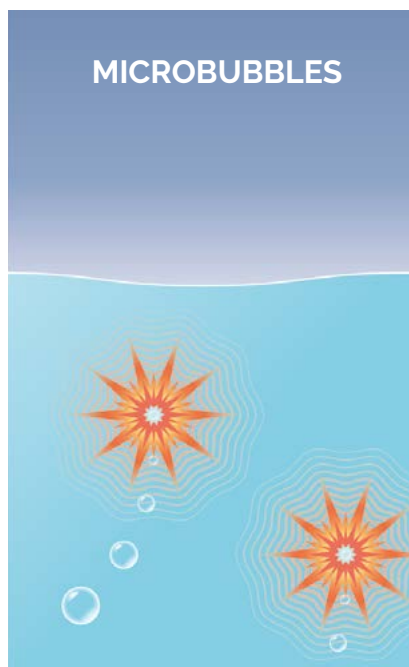

MicroBubbles increase the level of serotonin, which is known as the happiness hormone and helps the body inhale negative ions (anions). Our homes and offices that are kept clean and free of germs are actually filled with positive ions generated by various appliances such as lights, computers, heating and ventilation systems. The building materials used in construction also emit positive ions which can lead to stress, insomnia, anxiety, fatigue, and irritability.

In contrast, natural places such as mountains, forests, beaches, and waterfalls are rich in billions of negative ions. These ions, although invisible and odorless, have many health benefits such as reducing hypertension, asthma, hay fever, and burns. They are naturally produced when air molecules are broken down by sunlight and the movement of air and water.

When you take a MicroSilk[®] bath, the bubbles dissolve and create anions on the surface of the water. This results in an increase in serotonin levels which promotes deep sleep, enhances well-being, and stimulates the immune system.

The bubbles in the whirlpool that rise to the surface.

The MicroBubbles release energy into the water, providing a Sauna/Hammam-like effect.

MicroSilk[®] Enhances Lymphatic Circulation through a Sauna-Like Effect

MicroSilk[®] MicroBubbles do not cool down the water, but rather maintain and even increase its temperature. Unlike traditional whirlpool systems where air bubbles rise to the surface and cool the water, MicroBubbles remain suspended in the water. As they burst, they release energy that provides consistent warmth close to the body.

The body's temperature rises, providing a sauna-like effect without the discomfort associated with intense heat and dry air. This warmth helps to enhance the previous benefits of skin exfoliation, elimination of toxins, and improvement of cardiovascular activity. As a result, lymphatic circulation is improved, leading to a range of health benefits for the body.

Chromotherapy Luminx

It's a system consisting of illuminated points that can be controlled through an electronic keypad to adjust lighting, color and sequences. The base system includes 8 LED points, but it can also be customized with multiples of 8 points installed both inside and outside the bathtub.

Ref : 7425 à 591 pts

The additional 8 LED lights add value : 299 pts

The Benefits of Colors

BLUE Is the color of the sea and sky. It is associated with peace, rest, and tranquility. It can lower blood pressure and alleviate headaches and cramps.

TURQUOISE Like blue, turquoise also has soothing effects, mainly on pain.

GREEN It is the color of spring, renewal, and return to life. It is recommended in cases of

exhaustion or intense stress. It has a positive effect on decision making that prioritizes wisdom and longevity. It combats insomnia and stimulates sexual appetite.

YELLOW It is the color of the sun. It favors all forms of brain stimulation. It provides energy, motivation, and imagination. It also has an effect on the digestive system.

ORANGE It is the color of action. Highly effective in thyroid problems, orange is also effective in eliminating excess adipose tissue. It acts against muscle, arthritis, and lower back pain. It is recommended in cases of asthma and allergy to dilate the airways. Associated with luxury and pleasure, this color is a tonic that helps to maintain the youthfulness of the heart.

RED It is the color of blood. It is also the color of love, life, and sexual vigor, but also the color of aggressiveness and anger. It strengthens energy and stimulates the circulatory system and can counter anemia. It is also believed to have aphrodisiac properties.

Systems Options

Waterfall Cervical Massage

The cervical massage involves a warm cascade of water flowing over your neck and shoulders, which is part of a closed circuit with the other water systems in balneotherapy. You can adjust the strength of the jet using a button on the side without needing to stop it completely.

To place an order, please provide a diagram of the bathtub showing the position of the overflow and the desired location for the panel(s).

Bath filler with pop-up waste to connect

The Waste pop-up is constructed with chrome-plated brass and features the laser-engraved Condor logo. It is designed to connect to an appropriate faucet, enabling the bathtub to be filled. Ref. 7108 or 7109 (extended) : 323 pts

White Bath filler with pop-up waste to connect

Brass not engraved. Ref. 7108 or 7109 (extended) : 410 pts

Installation of pop-up

Ref. 7505 : 62 pts

Pop-up waste

Chrome-plated brass with the Condor logo laser-engraved on it. Whirlpool bathtubs come standard with this waste. It is an optional feature for standard bathtubs, with some exceptions Ref. 7105 or 7106 (extended) : 96 pts

Brass pop-up waste in matt white or matt black

Brass not engraved. Ref. 7105 or 7106 (extended) : 179 pts

Installation of pop-up

Ref. 7505 : 62 pts

Flower of life

On the drain valve, we had a flower of life engraved, which has the ability to transform your bath water through its geometric patterns. This valve will be randomly delivered on some bathtubs

Disinfectant bomb

It can be used to clean the water circuit of a balneotherapy system by injecting it into the water jets 500 ml. Ref. D211 : 80 pts

Built-in waterfall

Waterfall spout to be connected to the faucet with two mixed water inlets. Requires a flat surface of 170mm. Ref. 5519 : 491 pts

Built-in waterfall white

Ref. 5519 : 570 pts

Installation

Ref. 7518 : 62 pts

Headrest

Made of very durable like leather, the headrest is crafted by a saddler artisan in Paris. It is attached to the vast majority of bathtubs with suction cups placed flat Black or white.

Ref. 7462 : 242 pts

Pair of brass handles

is available in select models and is made of chrome-plated brass with a length of 25 cm. .

Ref. 7400 : 239 pts

Installation

Ref. 7504 : 62 pts

Steel-reinforced tub structure & base

It's a metal support that makes bathtub installation quick and easy, while also increasing its strength and rigidity. It also helps with the installation of panels. Some models come with it as standard, while others offer it as an optional extra that is installed at the factory.

Ref. 7302 à 463 pts

Disinfectant liquid

To be poured into the bathwater while turning the system on/off for good results. Works with all hydrotherapy systems.

Packaged in 1 liter bottles

Ref. D213 : 101 pts

STONE

The harmony of shapes and the sensuality of the material

The Stone range makes it simple to furnish your bathroom, bedroom, or living room with elegant and timeless sets of washbasins and bathtubs. These pieces feature clean lines and require no panel installation, making them easy to install. Made from Dado Quartz®, a solid surface resin blended with volcanic stone from southern Africa, the material is elevated by renowned designers such as Edward van Vliet and Brian Sironi, who have given it a sleek and sensuous appearance. Moreover, the exterior of these pieces can be customized with various finishes, colors, and even works of art to suit your preferences.

The City bathtub is a unique design that seamlessly blends dimensions and angles to achieve a flawless finish. The E-pure acrylic bathtub is now available in two sizes, offering even more versatility for your bathroom.

City

TAILOR-MADE
CONCEPT

The City bathtub is a unique resin casting bathtub that offers flexibility with its design. It can accommodate walls that are not straight by being cut diagonally. Additionally, it can make allowances for descending columns, or a bulky faucet by widening the deck's length or width. The bathtub's size options range from 180 to 210 cm in length and 80 cm to 110 cm in width, offering many possibilities. The bathtub can be built-in with a finishing panel under the rim or with 1, 2, or 3 aprons, or even as a freestanding version, depending on your preference.

City

TAILOR-MADE CONCEPT

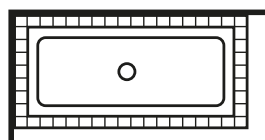

The City bathtub with a custom tub rim allows it to adapt to all bathroom configurations.

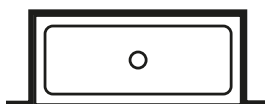

The interior of the bathtub is always 180 x 80 and the surrounding edges are customized.

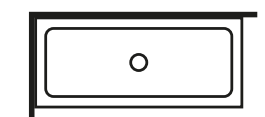

- A - Choose the length of the bathtub: minimum 180 cm and maximum 210 cm
- B - Specify the width of the surrounding edges on each side according to your needs
- C - Choose the width of the bathtub: minimum 80 cm and maximum 110 cm
- D - Specify the width of the surrounding edges on each side according to your needs
- E - Choose the number of side panels
- F - On quote: Choose the Balneotherapy system available only on to built-in version.

0 = Built-in Bathtub. This type of bathtub has no protruding edges or corners and is designed to blend seamlessly with the surrounding tilework for a sleek and seamless appearance. The edges can be custom-cut to fit the specific dimensions of the installation area.

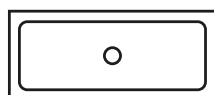

1 = Front or side panel: Please specify whether you would like a panel on the front or side of the bathtub. This option is commonly used for bathtubs installed in a niche or alcove.

2 = Front and side panel. This option is commonly used for corner bathtubs, where both the front and side of the bathtub require a panel to create a finished look.

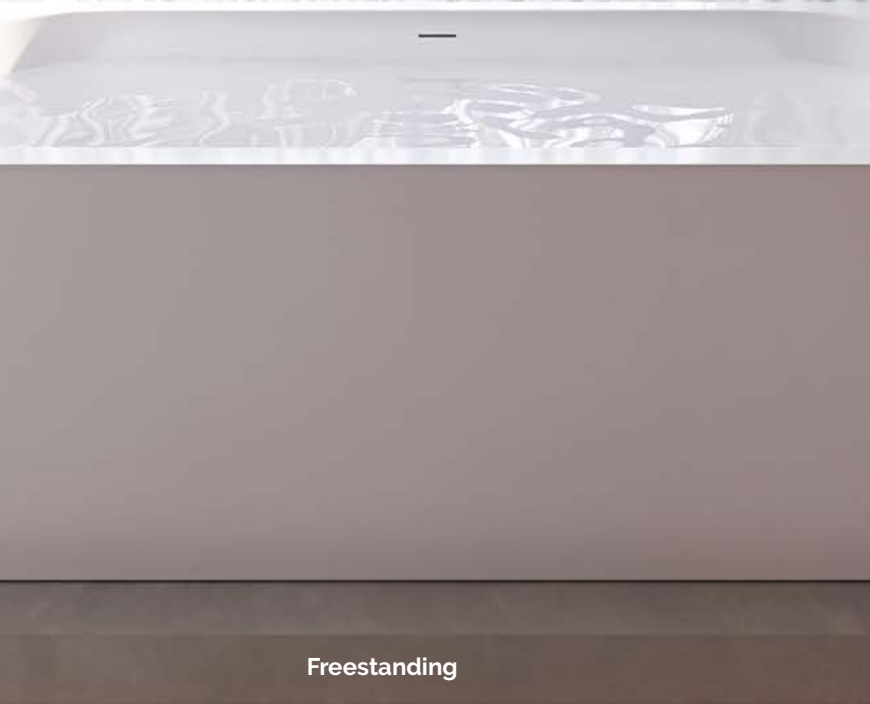

3 = 3-sided panel. This option is commonly used for bathtubs that are installed against a wall. It includes a front panel and two side panels that extend to the floor to create a cohesive and finished look.

4 = 4-sided panel. This option is commonly used for freestanding bathtubs, which are not attached to any walls. It includes panels on all four sides to create a fully finished look.

Terms and Conditions

1- General:

Any order is subject to these conditions, notwithstanding any additional or contrary clause that may appear on the purchase orders or any other document of the buyer. To be valid, any waiver or amendment to these conditions must be stipulated in writing and signed by a person authorized to commit our company. Failure to exercise a right provided by the foregoing conditions shall not be deemed a waiver of exercising a similar right or any other right provided by these conditions at a later date. The fact that a provision is void or unenforceable does not prevent the others from continuing to bind the parties.

2- Orders:

Only written orders will be taken into account. They only commit us after our written confirmation. No order can be partially or totally cancelled during execution.

3- Deliveries:

Unless otherwise agreed, delivery times are indicative only. Consequently, any delay, unless abnormally prolonged, shall not engage our liability, nor shall it result in even partial cancellation of the order. Fire, breakdown, strike, supply difficulties are deemed by the parties to be force majeure.

4- Price Conditions:

Our prices are generally determined at the time of ordering. If not, they are set by reference to the price list in effect at the time of delivery with application of the usual discount. Any modification of the fiscal taxes applicable to the contract will result in a repricing of the agreed price. The company also reserves the right to change its rates without notice.

5- Manufacturing:

We reserve the right to make any changes required by production imperatives to the information in our catalogs and advertising documents

6- Shipping:

Regardless of the sales conditions and the destination of the goods, even when shipped free of charge, they are deemed delivered ex-store and travel at the recipient's risk and peril. This principle cannot be derogated from by the fact that all or part of the transport is taken care of, the latter not modifying the time of transfer of responsibility. Consequently, it is the recipient's responsibility, in case of damage or missing goods, to take all necessary conservation measures against the carrier by making specific reservations on the delivery note with confirmation by registered letter within a maximum period of two days, date of delivery.

7- Guarantee:

The guarantee on our products (unless otherwise agreed) is strictly limited to the replacement of the product itself with an equivalent product, to the exclusion of any compensation and/or ancillary costs (e.g. installation and reinstallation costs). It is valid only under normal conditions of private use. As an example, some causes of definitive termination of the guarantee: bathtub sold for display, difficult or impossible accessibility to the bathtub's equipment, damages not reported upon receipt of the goods, use of non-compliant cleaning products such as bleach, non-compliant power supply and any modification made to the equipment without prior notice. The warranty period is 10 years for single bathtubs, 2 years for whirlpool bathtubs and 4 years for parts in exchange.

8- Force Majeure:

Strikes, mobilizations, breakage of goods, machine breakdowns, removals, fires or accidents that prevent or delay the manufacture or delivery of goods are deemed to be force majeure events. These force majeure events give us the right to terminate or suspend the performance of our commitments.

9- Returns:

Under no circumstances will goods delivered in accordance with the order be returned without our prior agreement. In this case, any transport costs and a deduction of 20% of the invoice amount will be borne by the buyer. Return costs to the factory for verification, revision, exchange, etc. are always borne by the customer.

10- Payment terms:

Unless otherwise agreed in writing, all sales are considered to be cash sales, with no discounts, and invoices are payable in cash at the seller's headquarters. Late payment will incur interest at a rate equal to the European Central Bank's latest financing operation rate plus 10 percentage points, in accordance with the LME law 2008-776. These amounts will be subject to VAT. In the event of non-payment of invoices on the due date (Article 1226 of the Civil Code), the buyer shall be automatically liable for damages equal to three times the current legal interest rate in France. In the event of non-payment after 60 days from the due date (Article 1226 of the Civil Code), the buyer shall also be automatically liable for damages equal to all amounts due on that date (due date + 60 days).

In accordance with Article L 441-6 of the Commercial Code, any professional in a situation of late payment shall automatically be liable to the creditor for a fixed indemnity of 40 Euros for recovery costs. When the recovery costs incurred are greater than the amount of this fixed indemnity, the creditor reserves the right to request additional compensation, subject to justification. This indemnity is payable without prior reminder. However, the creditor may not invoke the benefit of this indemnity when the opening of a safeguard, reorganization or liquidation procedure prohibits payment of the debt due at its due date.

11- Retention of title:

By express derogation from the provisions of Article 1583 of the Civil Code, although it assumes all risks, the buyer does not become the owner of the goods until payment of the full agreed price, plus any costs and penalties. Consequently, the buyer undertakes not to pledge or transfer the goods as security. In the event of non-payment on the due date of any amount due, as well as in the event of judicial reorganization, judicial liquidation, or failure to fulfill any of the buyer's commitments, current sales will be automatically terminated without any judicial formalities, eight days after a simple demand.

12- Jurisdiction attributive clause:

The Amiens High Court is the sole competent authority to hear any dispute related to our sales, regardless of the country to which our goods are destined. In the case of an international transaction, French law and the French language are the only applicable ones. Any contrary clause is deemed null and void and shall be set aside in favor of the present attribution of jurisdiction, which applies to any dispute, as well as in the case of a guarantee appeal and plurality of defendants.
